

**Kills Trees • Sprouts • Stumps
Poison Ivy • Weeds & Grasses**

**A WATER SOLUBLE CRYSTAL
EASY TO MIX**

ACTIVE INGREDIENTS:
Ammonium Sulfamate 95%
INERT INGREDIENTS
Total 100%

**CAUTION
KEEP OUT OF REACH OF CHILDREN**

See Side Panel for Additional Precautionary Statements

E.P.A. Reg. No. 2169-262

E.P.A. Est. No. 2169-KS-1

NET WEIGHT: 1 LB.

GREEN UP

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Brush & Weed Killer is highly effective for killing undesirable woody plants, weeds and grasses. Temporary non-productivity of soil may be caused by heavy applications. This condition usually disappears in the "over winter" period. It is water soluble, non-volatile, and non-flammable.

BRUSH CONTROL—Right-of-ways, roadsides, drainage ditches, rangelands, pastures. For control of hardwood and evergreen species such as alder, ash, birch, cedar, elm, gum, hickory, maple oak, pine, and willow.

Spray Treatment—How to mix—Add 5 level tbsp (2½ oz.) per quart of water (60 pounds per 100 gallons). To improve control and thoroughly wet foliage, add 4 to 6 oz. of Green-Up Spreader Sticker per 100 gallons (10-15 drops per quart).

How to Spray—Treat brush after it has reached the "full leaf" stage and up until the foliage begins to discolor in the fall. Apply as a full coverage spray during periods of high temperatures and humidity. Prevent spray from drifting to desirable plants or vegetables. Retreatment of unsprayed portions will be necessary the following spring.

STUMP TREATMENT—How to Mix—Use 3½ pounds in 1 gallon of water. Treat stumps or sprouts as soon after cutting as possible. Spray or paint the stump thoroughly; be sure to wet the outer growth rings.

FRILL TREATMENT—For large hardwood species, such as black Jack Oak, sweetgum, poplar, pecan, maple, ash, oak and hickory, treat at any time of the year. Mix same as for stump treatment.

How to Apply—At a convenient height, make a continuous cut completely around the tree with downward axe strokes, cutting well into the sapwood and peeling the cut bark outward. Pour the solution into the cut "frills" to saturate the trunk area.

WEED AND GRASS CONTROL—Tennis courts, driveways, fence rows, industrial sites. For control of poison ivy, poison oak, poison sumac, leafy spurge, dock, goldenrod, ragweed, milkweed, crabgrass, broomweed, chickweed, cocklebur, jimsonweed, lambsquarter, larkspur, prickly lettuce, shepardspurge.

How to Mix—Add 1 pound per 1 gallon of water. Spray or pour to thoroughly wet foliage. Control will vary with weed species, rainfall, temperature and other conditions.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Avoid contact of skin with strong solutions of this material. In case of contact, wash off with plenty of water. Do not allow children or pets on treated area until it is dry. Do not contaminate feed or food stuffs.

ADDITIONAL HAZARDS—Keep out of lakes, streams or ponds. Do not apply in conditions favor spray drift. Do not contaminate water by cleaning or disposal of wastes. Apply this product only as specified on this label.

Do not reuse empty container. Wrap container and place in trash.

Wash sprayer very thoroughly after each use to reduce corrosion. Do not drain or flush equipment on desirable plants or vegetation.
