

P R E C U R B  
FOR BERMUDA GRASS LAWNS  
A Pre & Post Emergence Herbicide

Use In The Dormant Or Growing Season  
Kills Grassy & Broadleaf Weeds In Bermuda Lawns

COVERS 5,000 SQ. FT.

ACTIVE INGREDIENT:  
3,5-dichloro-N-(1,1-dimethyl-2-propynyl)  
benzamide . . . . . 0.57%  
INERT INGREDIENTS . . . . . 99.43%  
Total 100.00%

Contains "Kerb" Herbicide Rohm & Haas Company Reg. T.M.  
U.S. Patents 3,534,098 and 3,640,699.

KEEP OUT OF REACH OF CHILDREN

CAUTION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRECURB is a selective herbicide for use on Dormant or Actively growing Bermudagrass lawns & ornamental turf. At recommended rates it is generally effective against the following list of Annual and Perennial Grasses and certain Broadleaf weeds as listed.

GRASSES - Annual Bluegrass(Poa Annua), Perennial Bluegrass, Barnyardgrass, Canarygrass, Cheatgrass, Crabgrass, Fall Panicum, Foxtail, Foxtail Barley, Goosegrass, Lovegrass, Orchardgrass, Quackgrass, Ryegrass, and Volunteer Oats, Barley, Rye and Wheat.

BROADLEAF WEEDS - Annual Morning Glory, Carpetweed, Chickweed, Henbit, Knotweeds, Lambsquarter, Nettles, Nightshade, Purslane, Smartweed, and Volunteer Tomato.

WHERE TO USE - For use only on Bermudagrass lawns since bermuda is resistant to the herbicide action of Precurb. It also is not effective against Nutgrass, Johnson Grass or any number of Composite Family plants such as Dandelion, Dogfennel, Groundsel, Sow Thistle & Wild Lettuce or leguminous species such as Clover or Black Medic. These must be controlled by other suitable EPA approved herbicides.

This product is especially effective for Pre & Post Emergence control of Poa Annua (Annual Bluegrass) growing in Bermudagrass. It will control "Poa" from pre-germination and seedling stages through tillering, heading and seed formation. It kills plants slowly. Target weeds may first become dark green & then gradually turn yellow & die over a 3 to 5 week period.

The following plants are sensitive to Precurb treatments and should not be treated unless extensive damage can be tolerated: Dichondra, Bluegrass, Annual and Perennial Ryegrass (includes all new patented strains of Ryegrass), Fescue Grasses, and Bentgrass.

Do not use on areas that are to be overseeded with susceptible cool season grasses within 90 days of treatment. Do not treat fairways or approaches that drain into Bentgrass greens.

HOW IT WORKS - This product works mainly thru the root absorption of the herbicide. If no rain occurs, the application should be followed with a light overhead irrigation to move the chemical into the root zone. Avoid heavy irrigation of more than 1 inch water which might wash or leach the herbicide from the area of application.

HOW & WHEN TO USE: Apply contents of bag to 5,000 Sq.Ft. of lawn surface. The turf should be mowed first, catching the clippings. Do not feed clippings to Livestock. May be applied to Bermudagrass during the dormant or growing season. A Fall-Winter application should be made where weeds have become established during the summer months. All susceptible weeds will die during the winter. Fall treatment should be made on winter annuals such as Chickweed. For Quackgrass and other perennial weedy grasses apply in the fall prior to winter freeze-up.

SPREADER SETTINGS : Scott 5 1/2 Cyclone 3 1/2

Walking speed and spreader condition may require adjustments in setting.
