**ENVIRONMENTAL HAZARDS:** This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate water when disposing of equipment washwaters.

#### **DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

#### **STORAGE AND DISPOSAL**

**STORAGE:** Store in original container in a locked storage area inaccessible to children and pets.

**PESTICIDE DISPOSAL:** Securely wrap original container in several layers of newspaper and discard in trash.

**CONTAINER DISPOSAL:** Do not reuse empty container. Rinse thoroughly before discarding in trash.

**OTHER USE PRECAUTIONS:** Do not allow drift onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result. Do not pour spray solutions near these plants. Whether using a hose-end sprayer or pressure-sprayer, do not use fine sprays because they can drift and cause damage to non-target plants. Coarse droplet sprays are less likely to drift. Use only lawn-type sprayers. Do not spray on bentgrass, carpetgrass, centipede, dichondra, St. Augustinegrass nor on lawns or turf where desirable clovers are present. Do not spray roots of trees and ornamentals. Do not apply to areas underlaid by roots of desirable trees and shrubs. Do not exceed specified dosages for any area; be particularly careful within dripline of tree and other ornamental species. Do not apply this product through any type of irrigation system.

**WHEN TO USE:**

Spray at any time during the growing season when weeds are actively growing. Treat Chickweed, Henbit, Wild Onion and Garlic in the fall and again in the spring if needed. On new grass lawns wait until the turf has reached a height of 2 inches before making an overall spray treatment. Spot spray weed treatment, however, may be made at any time with a small pressure sprayer spraying only the weeds at ground level. Wait 2 weeks before putting new grass seed or stolons down in the bare spots. Do not spray weeds during drought periods unless the lawn has been thoroughly watered 2-3 days before.

**HOW MUCH TO USE:**

DANDELION AND BROADLEAF WEED KILLER contains dicamba plus 2,4-D. IT IS NOT NECESSARY TO DOUBLE THE DOSE TO CONTROL HARD-TO-KILL WEEDS.
