PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animal

CAUTION: Harmful if swallowed. Avoid breathing spray mist. Avoid contact with skin, eyes, or clothing. When using this product, wear long-sleeved shirt, long pants, socks, shoes and rubber gloves. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried or dust has settled.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a locked storage area inaccessible to children and pets.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.

OTHER USE PRECAUTIONS: Do not allow drift onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result. Do not pour spray solutions near these plants. Whether using a hose-end sprayer or pressure-sprayer, do not use sprays that are fine because they can drift and cause damage to non-target plants. Coarse droplet sprays are less likely to drift. Use only lawn-type sprayers. Do not spray on bentgrass, carpetgrass, centipedegrass, dichondra, St. Augustinegrass nor on lawns or turf where desirable clovers are present. Do not spray roots of trees and ornamentals. Do not exceed specified dosages for any area; be particularly careful within dripline of tree and other ornamental species.

WHERE TO USE: May be used on bluegrass, bermudagrass and zoysiagrass lawns, vacant lots, playgrounds and other similar areas where HARD-TO-KILL weeds are present. Effective against these weeds such as SHEEP SORREL, KNOTWEED, SPOTTED SPURGE, CHICKWEED, OXALIS and HENBIT.

Also, spray as directed for the control of the following weeds:

Buckhorn
Chicory
Clover
Dandelion
Dock
Ground Ivy
Heal-All
Lambsquarter

Mallow
Morningglory
Peppergrass
Pigweed
Plantain
Poison Ivy
Poison Oak
Purslane

Ragweed
Speedwell
Wild Carrot
Wild Garlic
Wild Lettuce
Wild Onion
Yarrow

WHEN TO USE: Spray at any time during the growing season when weeds are actively growing. Treat chickweed, henbit, wild onion and garlic in the fall and again in the spring if needed. On new grass lawns wait until the turf has reached a height of 2 inches before making an overall spray treatment. Spot spray treatments may be made at any time with a small pressure sprayer. Wait 2 weeks before seeding or planting stolons, plugs or sprigs. Do not spray weeds during drought periods unless the lawn has been thoroughly watered 2-3 days before.

The maximum application rate to turf is 1.1 pounds 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.
