PRECAUTIONARY STATEMENTS
Hazard to Humans & Animals
CAUTION: Harmful if swallowed. Keep out of reach of children and domestic animals. Do not contaminate feed or feeding utensils. Cover or remove feed before spraying. Do not use on meat or dairy animals. Do not wet the animal's skin.
STATEMENT OF PRACTICAL TREATMENT
If Swallowed: Call a physician immediately. Gastric lavage is not indicated if material was taken internally. DO NOT INDUCE VOMITING unless other treatment is not available. Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting, give victim one or two glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.
If Inhaled: Remove victim to fresh air. Apply respiration if indicated.
If On Skin: Wash contaminated skin with soap and water.
If In Eyes: Flush eyes with plenty of water for at least 15 minutes. Get medical attention.
Environmental Precautions:
 This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.
Pesticide or Chemical Label:
 Do not use your tank or store near heat or open flame.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
STORAGE & DISPOSAL: Do not store near other pesticides, feed or feeding utensils. When container is empty, wrap and put in trash collection. Do not reuse empty container.
 APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL.

USE: Horse & Pony Spray is formulated for use on horse and pony show stock. Horse & Pony Spray protects against biting flies and will impart a bright sheen to your animal's coat. Horse & Pony Spray may be misted or wiped on no more than 1 or 2 ounces per animal per day.
MISTING: Adjust the sprayer nozzle to the Fine Mist position. Do not use coarse sprays. Do not wet the animal's skin. A gentle fine mist is all that is required. Do not make applications in direct or hot sunlight. Do not use on meat or dairy animals.
 Use one or two ounces per animal per day. After application brush the coat to give overall coverage. Make sure legs and areas not treated for face area. Treat as a wipe on application. Also spray adjacent stable areas for more effective fly control.
WIPING ON: Do not wet the animal's skin. Rub the animal down and remove dirt. Mist a small amount of Fine Mist into a soft comb and wipe or apply against the hair grain. Make sure to treat legs, belly, neck, face and back line. Afterward brush the coat to bring out a bright sheen. Repeat as needed to 3 and repeat brushing. During fly time best protection will be given by treating animals 3 to 4 times each week.
NOTE: Remember, only a small amount per animal is needed per day. As a mist, set your sprayer to the Fine Mist position only and brush across the coat to achieve overall coverage. As a wipe on, lightly mist a small amount onto a soft comb and wipe against the hair grain. Brushing afterward will bring out a bright sheen to the animal's coat.
 The user should make a barrier on the hair that will both repel and kill biting flies. Precautions should be taken to avoid any wetting of the animal's skin.
