READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH CAUTIONS, WARNINGS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS. TIMING AND DOSAGE MAY VARY AS A CONSEQUENCE OF LOCAL WEATHER OR CONDITIONS; WE RECOMMEND REFERENCE TO AGRICULTURAL EXPERIMENT STATIONS ON SPECIFIC USAGE.

Soybean Seed Protector is a specifically designed formulation for the treatment of soybean seed. It protects sound and/or mechanically injured seed against seed and soil-borne diseases such as seedling blights, damping-off and seed decay organisms at planting time. It also provides molybdenum which is essential to the nitrogen-fixing nodule bacteria.

Designed to protect seed at planting time, Soybean Seed Protector enables the farmer to avoid the additional handling of commercial seed treatment, thus lowering the percent of cracked or split seed planted. At recommended dosage rates, this product assures adequate seed coverage and allows any excess to flow down with the seed into the furrow, thus affording maximum protection. Can be used on previously treated seed.

Soybeans are most likely to benefit from treatment with this product when planted in acidic soils (soils needing liming), heavily leached soils, or soils high in iron content.

DIRECTIONS - MEASURING CUP ENCLOSED: Use Soybean Seed Protector as a planter box treatment. Add 4 ozs. of this product to the amount of seed required to plant one acre. This will give the needed $\frac{1}{2}$ ounce of Sodium Molybdate per acre. Four level cups will give approximately 4 ounces of product.

CAUTION: Avoid inhalation of dust. Wear a respirator. Avoid contact with skin. Avoid contamination of feed and foodstuffs. Do not use treated seed for human consumption. Soybean Seed Protector treated seeds sold or shipped as feed or foodstuffs may be considered adulterated under state and federal laws. When container is empty, immediately wash thoroughly and destroy. Never re-use.

NOTICE: Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment, will vary, Seller makes no claims other than those stated on this label.
