### DIRECTIONS FOR USE

Horse & Pony Spray has been specifically formulated for use on your horse and pony show stock. Do not use on meat animals. The product may be sprayed or wiped on to the animal's coat and will protect your animal from biting flies. The product will also impart a bright sheen to the animal's coat. Apply regularly during fly season.

### AS A SPRAY

Select a hand sprayer which will apply the product in a fine mist or fog. Use one to two ounces per animal per day. Also treat adjacent stable areas for more effective fly control. Do not wet the animal's skin. After application, brush the coat to give over-all coverage. Make sure that legs and ankles are treated. For face area treat as a wipe-on application.

### TO WIPE-ON

Rub the animal down with your hand. Pour a small amount of product into a bucket and wipe on against the hair grain. Make sure to treat legs, belly, the neck and the face as well as the back line. Do not wet skin. After the application, brush the coat to bring out a bright sheen. Repeat as needed to kill and repel biting flies. During fly season, best protection will be achieved by treating animals 2 to 3 times each week.

### CAUTION

Keep this spray out of the reach of children and pets. Do not use on meat animals. Do not use on horses or ponies that are to be used for show purposes. Do not use on horses or ponies that are to be used for riding purposes. Do not use on horses or ponies that are to be used for breeding purposes.
