HOW TO APPLY AND USE PRECAUTIONS:

Gordon's Horse and Pony Spray protects against biting flies and will impart a bright sheen to your animal's coat.

Gordon's Horse and Pony Spray will provide short-term protection (3 to 14 days) depending upon the fly species.

Gordon's Horse and Pony Spray may be applied as a fine mist with a sprayer or wiped on with a soft cloth. Read the entire label before application and refer to the chart for spray intervals and instructions.

TO PREVENT INJURY APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL. DO NOT WET THE ANIMAL'S SKIN.

Avoid any direct contact between the product and the animal's skin, particularly when skin pores are open, such as after exercise or when the animal is perspiring heavily. Use extra care with young, old or sick animals. Also, use extra care with thin haired or light skinned animals such as Arabians and Palominos.

If the animal has open sores, skin lesions, cuts, wounds, or irritated skin from pest infestations contact your veterinarian before using this product. Avoid any direct contact between the product and the animal's skin.

Do not contaminate feed or feeding utensils. Cover or remove feed before spraying. Do not use on meat or dairy animals. Do not apply to horses intended for slaughter or human consumption.
