

DIRECTIONS

Use to "spot-treat" weeds in the lawn. For best results apply when weeds are actively growing. Do not water within 24 hours after spraying.

Shake well. Spot Weeder is designed to permit easy treatment of lawn weeds without bending or stooping. Invert can, aim at weed and press valve. Only a short burst is needed. Overspraying only wastes the spray.

Effects begin to show after a few days and weeds gradually die. Up to 4 weeks may be required for complete kill. Repeat in 3-4 weeks if necessary.

For lawns with many weeds, requiring an overall treatment, spray with TRIMEC Turf Herbicide.

CAUTION—Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Call a physician immediately. Vapor harmful. Avoid breathing of vapor or spray mist. Use with adequate ventilation. Avoid contact with skin, eyes, or clothing. In case of contact, flush with plenty of water, and, in case of contact with eyes, get medical attention. Wash after each use.

Avoid spraying susceptible plants (flowers, shrubs, etc.). Avoid accidental drift or application to nearby garden plants, flowers, or shrubs. Do not apply within drip line of desirable plants. Bentgrass, Carpetgrass, and St. Augustine grass may be injured if contacted. Do not contaminate water used for irrigational or domestic purposes. Do not store near seeds, fertilizers, insecticides, or fungicides.

WARNING—Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° F may cause bursting. Never throw container into fire or incinerator.

NOTICE—Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment will vary, Seller makes no claims other than those stated on this label.
