**USE PRECAUTIONS**

Do not use this product where desirable clovers are present or allow the material to "wind drift" onto flowers, vegetables or ornamental shrubbery. Do not spread over exposed roots of trees and ornamentals. Do not exceed specified dosages for any area; be particularly careful within dripline of tree and other ornamental species. Apply when the air is calm. Do not apply to newly seeded lawns. During application, close spreader openings when turning.

In addition to the 20-10-5 fertilizer, this product contains TRIMEC® Herbicide. The fertilizer supplies a generous portion of the plant food needed for normal season's growth and the herbicide controls hard-to-kill weeds such as chickweed, black medic, ground ivy, knotweed, plantain, dandelions, henbit, spurge and most other common lawn weeds.

If adverse low moisture conditions prevail and weeds are in a state of poor growth, possible retreatment may be necessary with Trimec liquid formulation when conditions improve.

**WHEN TO APPLY:** For best results apply when weeds are growing vigorously in the spring or early fall after heavy rains.

This material may be used on bluegrass, fescue, perennial ryegrass, bermudagrass and zoysiagrass lawns. Normally, at this time there is sufficient moisture for excellent response from the fertilizer as well as very effective weed control.

WEED-'N-FEED with Trimec is a remarkably effective premium lawn food which combines the advantages of both fast and long lasting feeding action plus the broad range of weed control of the Trimec®. The fertilizer produces a thick, green turf while killing weeds to make way for turf growth. Weeds contacted by the product stop growing gradually die, and disappear from the lawn.

- COVERS 5,000 SQ. FT. -

**HOW MUCH TO USE:** This 22 pound bag of WEED-'N-FEED with Trimec® should be used on 5,000 sq. ft. Apply evenly with a lawn spreader either as a one pass application or a two pass application by crisscrossing the area at half rate.

To get maximum weed killing results, do not rake, mow, or water the lawn for at least 24 hours after spreading the product.

Lawns which are heavily overrun by weeds and are in poor condition may require more than one application of this product. A suggested second application could be made in approximately 30 days.

The maximum application rate to turf is 1.0 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

During application close spreader openings when turning. Spreader setting should be adjusted as follows:

**SPREADER SETTINGS**

- Scott. . . . . 6
- Lawn Beauty. . . . . 5
- Jackson. . . . . 7 1/2
- Sears. . . . . 4

The above spreader settings are approximate. Calibrate your spreader on 100 sq. ft. and adjust to apply 1 pound per 100 sq. ft.
