# TRIMEC 26 WEED-'N-FEED

A 20-10-5 Lawn Fertilizer Plus Trimec<sup>™</sup> a New Patented Herbicide (U. S. Patent 3,284,186) Containing 2,4-D Plus MCPP and Dicamba

**- KILLS WEEDS -  
- FEEDS THE LAWN -**

**CHICKWEED, DANDELION, KNOTWEED, PLANTAINS, HENBIT, SPURGE AND MANY OTHER WEEDS AS LISTED.**

**ACTIVE INGREDIENTS:**

*Diethanolamine salt of 2,4 dichlorophenoxyacetic acid	2.01%
**Diethanolamine salt of 2-(2-methyl-4-chlorophenoxy) propionic acid	1.34%
***Diethanolamine salt of Dicamba (3,6 dichloro-p-anisic acid)	0.12%
<b>INERT INGREDIENTS:</b>	<b>96.53%</b>
<b>TOTAL</b>	<b>100.00%</b>
*Equivalent to 2,4 dichlorophenoxyacetic acid	1.36
**Equivalent to 2-(2-methyl-4-chlorophenoxy) propionic acid	.90
***Equivalent to 3,6 dichloro-p-anisic acid	.034

**CAUTION: Keep Out of Reach of Children**

NET WEIGHT 22 POUNDS

### WEED-'N-FEED

In addition to the 20-10-5 fertilizer, this product contains the new Trimec<sup>™</sup> formula of 2,4-D plus MCPP and Dicamba. This herbicide is superior to generally available products because it kills weeds as well as feeds the lawn. It is especially effective against chickweed, dandelion, knotweed, plantain, henbit, spurge and many other weeds.

The weed killing action of Trimec<sup>™</sup> is superior to any other herbicide in the market. It kills weeds before they can spread and provides longer weed control. It works in adverse soil moisture conditions, and weeds do not come back. Poor growth, possibly due to treatment, may be necessary with a 2-3 week interval application when conditions improve.

**WHEN TO APPLY:** For best results, apply when weeds are growing vigorously in the spring or early fall after heavy rains. The material may be used on bluegrass, fescue, ryegrass, Bermuda and zoysia lawns. Apply only at this time to insure sufficient moisture for excellent response from the fertilizer as well as very effective weed control.

Weed-'N-Feed with Trimec<sup>™</sup> is a remarkably effective premium lawn food which combines the advantages of both fast and long lasting feeding action plus the broad range of weed control of the Trimec<sup>™</sup>. The fertilizer produces a thick, green turf while killing weeds to make way for turf growth. Weeds contacted by the product stop growing, gradually wither and die, pulling from the lawn.

**- COVERS 5,000 SQ. FT. -**

**HOW MUCH TO USE:** This 22 lb. bag of Weed-'N-Feed with Trimec<sup>™</sup> should be used on 5,000 sq. ft. Apply evenly with a lawn spreader either as a one-pass application or a two-pass application, cross crossing the lawn at half the rate each time. To get maximum weed killing results, do not rake, mow, or water the lawn for at least 24 hours after spreading the product.

Lawns which are heavily overgrown by weeds and are in poor condition may require more than one application of this product. A suggested second application could be made in approximately 30 days.

**CAUTION:** Avoid inhaling dust or contact with skin, eyes and clothing. Do not use this product unless protective gloves are present or allow the product to wind drift on flowers, vegetables or ornamental shrubbery. Do not apply to newly seeded lawns. During application, close spreader openings when turning. Apply when the air is calm. Keep away from fertilizers, seeds, insecticides or fungicides. Do not apply to areas underlaid by roots of deciduous trees and shrubs. Spreader setting should be calibrated as follows:

Scott	6
Lawn Beauty	5
Jackson	7 1/2
Sears	4

The above spreader settings are approximate. Check your spreader on 100 sq. ft. and adjust to apply one lb. per 100 sq. ft. Use normal rate of walk when applying to avoid an error in rate of application.

**NOTICE:** Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use such as weather, compatibility with other chemicals and condition of application equipment will vary, Seller makes no claims other than those stated on this label.

#### FERTILIZER GUARANTEE

Total Nitrogen, not less than	20%
Water Insoluble Nitrogen, not less than	5%
Available Phosphate Acid, not less than	10%
Soluble Potash, not less than	5%

U.S.D.A. Reg. No. 2217-492

571-569

In addition to the 20-10-5 fertilizer, this product contains the new patented formula-  
tion of Trimec Turf Herbicide. The fertilizer supplies a generous portion of the  
plant food needed for normal season's growth and the herbicide controls hard-to-  
kill weeds such as chickweed, black medic, ground ivy, knotweed, plantain, dandel-  
ions, henbit, spurge and most other common lawn weeds.

The weed killing benefits derived from this product are far superior to any other  
herbicide on the market. Increased herbicide content hastens weed kill and provides  
longer weed control. However, if adverse low moisture conditions prevail and  
weeds are in a state of poor growth, possible retreatment may be necessary with  
a Trimec liquid formulation when conditions improve.

**WHEN TO APPLY:** For best results apply when weeds are growing vigorously in  
the spring or early fall after heavy rains.  
The material may be used on bluegrass, fescue, rye, Bermuda and zoysia lawns.  
Normally, at this time there is sufficient moisture for excellent response from the  
fertilizer as well as very effective weed control.

Weed-'N-Feed with Trimec is a remarkably effective premium lawn food which  
combines the advantages of both fast and long lasting feeding action plus the  
broad range of weed control of the Trimec. The fertilizer produces a thick, green  
turf while killing weeds to make way for turf growth. Weeds contacted by the  
product stop growing, gradually die and disappear from the lawn.

**- COVERS 5,000 SQ. FT. -**

**HOW MUCH TO USE:** This 22 lb. bag of Weed-'N-Feed with Trimec should be used  
on 5,000 sq. ft. Apply evenly with a lawn spreader either as a one pass applica-  
tion or a two pass application, criss-crossing the area at half the rate each time.  
To get maximum weed killing results, do not rake, mow, or water the lawn for  
at least 24 hours after spreading the product.

Lawns which are heavily overrun by weeds and are in poor condition may require  
more than one application of this product. A suggested second application could  
be made in approximately 30 days.

**CAUTION:** Avoid inhaling dust or contact with skin, eyes and clothing.  
Do not use this product where desirable clovers are present or allow the product  
to "wind drift" on flowers, vegetables or ornamental shrubbery. Do not apply to  
newly seeded lawns. During application close spreader openings when turning.  
Apply when the air is calm. Keep away from fertilizers, seeds, insecticides or  
fungicides. Do not apply to areas underlaid by roots of desirable trees and shrubs.  
Spreader setting should be calibrated as follows:

Scott	6
Lawn Beauty	5
Jackson	7 1/2
Sears	4

The above spreader settings are approximate. Check your spreader on 100 sq. ft.  
and adjust to apply on 1/2 lb. per 100 sq. ft. Use normal rate of walk when apply-  
ing to avoid an error on rate of application.

**NOTICE:** Seller warrants that this product conforms to the ingredient statement on  
the label. Since conditions of use, such as weather, compatibility with other  
chemicals and condition of application equipment, will vary, Seller makes no claims  
other than those stated on this label.
