

WASP & HORNET BOMB

Directions for Use

Use this bomb in the areas where the wasps and hornets are most likely to be found. It is especially effective in the areas where they enter the home. It is also effective in the areas where they enter the porch, windows, and halls. Repeat treatment as needed. Do not apply to screens.

CLOVER MITES—Clover mites may invade the home in cool weather and appear on windowsills where they become unsightly. They do no harm but are extremely bothersome. Spray the outside windowsills only, also areas where the mites may enter porches, windows, and halls. Repeat treatment as needed. Do not apply to screens.
