GORDON'S BROADLEAF AND DANDELION LAWN WEED KILLER

CONTAINS TRIMEC® HERBICIDE

-KEEP FROM FREEZING-

Covers 10800 Sq. Ft.

Controls DANDELION, KNOTWEED, HENBIT, PLANTAINS, SPURGE, POISON IVY,
and other broadleaf weeds.

ACTIVE INGREDIENTS:

* Dimethylamine salt of 2-(2-Methyl-4-chlorophenoxy) propionic acid.....	8.7%
** Dimethylamine salt of 2,4-Dichlorophenoxyacetic acid	13.2%
*** Dimethylamine salt of Dicamba (3,6-Dichloro-o-anisic acid).....	0.8%
INERT INGREDIENTS.....	<u>77.3%</u>
TOTAL 100.00%	

THIS PRODUCT CONTAINS:

- *0.64 lbs. 2-(2-Methyl-4-chlorophenoxy) propionic acid equivalent per gallon or 7.2%
- **0.97 lbs. 2,4-Dichlorophenoxyacetic acid equivalent per gallon or 10.9%
- ***0.06 lbs. 3,6-Dichloro-o-anisic acid equivalent per gallon or 0.7%

Isomer Specific by AOAC Methods.

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals:

CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wear face shield or goggles when mixing, loading or applying this product. Wear long pants, long-sleeved shirt, shoes and gloves when mixing, loading or applying this product.

When using this product, wear long-sleeved shirt, long pants, socks, shoes and rubber gloves. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.

In case of contact, immediately flush eyes or skin with plenty of water. If irritation develops, get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources. Do not apply when weather conditions favor drift from target areas.

Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D and MCPP have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D and MCPP pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried or dust has settled.

STORAGE & DISPOSAL

STORAGE: Keep from freezing. Store in original container in a locked storage area inaccessible to children.

PRODUCT DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.

USE PRECAUTIONS: Do not apply this product through any type of irrigation system. Avoid drift of spray mist onto vegetables, flowers, ornamental plants, shrubs, trees, and other desirable plants. Do not spray solution near these plants. Coarse sprays are less likely to drift. Do not spray on carpetgrass, dichondra, nor on lawns or turf where desirable bentgrass or clovers are present. Do not spray roots of trees and ornamentals. Do not exceed specified dosages for any area; be particularly careful within dripline of tree and other ornamental species. This product may be injurious to St. Augustinegrass and centipedegrass. Since injury can be expected, "spot-spray" weeds only with a pressure sprayer. After using this product, clean sprayer thoroughly with soap or detergent and water and rinse thoroughly before applying other pesticides. Failure to observe the above precautions may result in injury.

WHERE TO USE: Gordon's Broadleaf and Dandelion Lawn Weed Killer may be used on bluegrass, bermudagrass, or zoysiagrass lawns, vacant lots, playgrounds and other similar areas where hard-to-kill weeds are present. This product is especially effective on all types of hard-to-kill weeds such as HENBIT, CHICKWEED, KNOTWEED, SPOTTED SPURGE, OXALIS, BLACK MEDIC, and SHEEP SORREL. In addition to these, TRIMEC controls most other broadleaf lawn weeds, including Dandelion and Plantain and a partial list is given on this label.

WHEN TO USE: Spray at any time during the growing season when weeds are actively growing. Treat chickweed, henbit, wild onion and garlic in the fall or in the spring, as needed. On new lawns wait until the turf has reached a height of 2 inches before making an overall spray treatment. "Spot spray" treatments may be made at any time with a small pressure sprayer. Wait 3 weeks before seeding or planting stolons, plugs, or sprigs. Poor weed control may result if spray is applied during drought or just before rain. For best results mow before treating. Do not water lawn within 24 hours after treatment.

HOW MUCH TO USE – ENTIRE LAWN

The maximum application rate to turf is 1.0 pounds of 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

PROFESSIONAL LAWN APPLICATOR: Use 8.2 pints/Acre (3 fl. oz./1000 ft²) in 44 to 130 gallons water/Acre (1 to 3 gallons water/1000 ft²).

HOSE-END SPRAYER: Use a hose-end sprayer designed for lawns. Put recommended amount of product (Column 1) in bottle and add water to indicated level (Column 2), and spray on area indicated. For example – to spray 1,700 square feet, measure 5 fl. ozs. (10 tbsp.) in jar and add water to the 10 gallons level and mix. Turn on hose and spray as evenly as possible over 1,700 square feet.

COLUMN 1		COLUMN 2	COLUMN 3
Amount of TRIMEC® to Use		Fill Bottle to (gallons)	Area to Treat (Square Feet)
(Tbsp.)	(Fluid Oz.)		
1	1/2	1	170
5	2 1/2	5	850
10	5	10	1700
15	7 1/2	15	2500

PRESSURE SPRAYERS: Measure indicated amount of product into tank and dilute with water according to the following chart. Use a spray pattern which gives small spray droplets without any fine mist and cover the area indicated.

Amount of TRIMEC® to Use		Amt. of water in sprayer	Area to be Sprayed:
(Tbsp.)	(Fluid Oz.)	(gallons)	(Square Feet)
4	2	1	670
12	6	3	2000

NOTE: Whether using a hose-end sprayer or pressure sprayer, avoid sprays which are too fine because they can drift and damage ornamental or garden plants.

HOW MUCH TO USE - SPOT SPRAY

To spray small areas or individual weeds, do not use hose-end sprayers. Mix 1 fl. oz. (2 tbsp.) in 1/2 gallon water in pressure sprayer and spray as required being certain to "wet" each weed.

CONTROLS

Bedstraw	Henbit	Poison Oak
Black Medic	Knotweed	Purslane
Buckhorn	Lambsquarter	Ragweed
Chicory	Lespedeza	Shepherdspurse
Chickweed	Mallow	Speedwell
