CONTAINER DISPOSAL Do not reuse container. Rinse thoroughly before discarding in trash.

- USE PRECAUTIONS -

Avoid drift of spray to vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants. Do not pour spray on carpetgrass, dichondra, nor on lawns or turf where desirable clovers are present. Do not spray roots of ornamentals and trees. Do not exceed specified dosages for any area; be particularly careful within dripline of trees and other ornamental species. Use only lawn sprayers. Coarse sprays are less likely to drift away from target area. This product may be injurious to St. Augustinegrass and centipedegrass; "spot spray" only on such sensitive grasses.

WHERE TO USE: Trimec® BL 9600 Lawn Weed Killer may be used on BLUEGRASS, BERMUJDA, BAHIAGRASS, FESCUE, PERENNIAL RYEGRASS or ZOYSIAGRASS lawns, VACANT LOTS, PLAYGROUNDS and other similar areas where weeds are present. It is especially effective on all types of hard-to-kill weeds such as HENBIT, LESPEDEZA, MORNINGGLORY, POISON IVY and POISON OAK, SPOTTED SPURGE and OXALIS. In addition to these Trimec controls most other broadleaf lawn weeds including such sensitive species as BLACK MEDIC, CHICKWEED, DANDELION and PLANTAIN. A partial list is given below.

WHEN TO USE:

1. Spray at any time during the growing season when weeds are actively growing.
2. On new lawns, wait until the grass has reached a height of 2 inches before making an overall spray treatment. Spot-spraying may be made at any time with a small pressure-sprayer. Wait 3 weeks before seeding or planting stolons, plugs, or sprigs.
3. Poor weed control may result if spray is applied during drought or just before rain.
4. For best results, mow before treating.
5. Do not water lawn within 24 hours after treatment.

HOW MUCH TO USE: The maximum application rate to turf is 1.0 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year. Example Mix 1 fl. oz. (2 tbs.) in 1 gallon of water and apply on 300 sq. ft. in the spring for sensitive weeds. For larger or more dense weeds stands, apply 1 fl. oz. of product on 200 sq. ft. Follow the rate charts below.

Hose-End Sprayer: Use a hose-end sprayer designed for lawns. Put recommended amount of product in bottle and add water to proper level and spray on area indicated. For example to spray 3,000 sq. ft. measure 10 fl. oz. (20 tbs.) in jar and add water to the 10 gallon mark and mix. Turn on hose and spray as evenly as possible over 3,000 sq. ft.

Amount Lawn Weed Killer to Use:		Fill Bottle to (Gallons)	Area to Treat (Sq. Ft.)
(Tbsp.)	(Fl. Oz.)		
2	1	1	300
4	2	2	600
10	5	5	1500
20	10	10	3000
32	16	16	4800

5 4 5

PRESSURE-SPRAYERS: Measure indicated amount of product into tank and dilute with water according to the following chart. Use a spray pattern that gives small spray droplets without any fine mist, and cover the area indicated.

Amount of Lawn Weed Killer to Use:		Amount of water in sprayer (Gallons)	Area to be sprayed (Sq. Ft.)
(Tbsp.)	(Fluid Oz.)		
4	2	1/2	600
8	4	1	1200
16	8	2	2400
24	12	3	3600

SPOT-SPRAYING: To spray small areas or individual weeds, do not use a hose-end sprayer. Mix 2 fl. oz. (4 tbsp.) in 1/2 gallon of water in a pressure-sprayer, and spray as required, being certain to "wet" each weed.

NOTE: Whether using a hose-end sprayer or pressure-sprayer, avoid sprays which are too fine because they can drift and damage ornamental or garden plants.
