ORNAMENTAL SHADE TREES AND SHRUBS:

For leafhopper control use 1 - 2 quarts of Methoxychlor Tree Spray in 100 gallons of spray (2 to 4 tablespoons per gallon). Apply full coverage spray. Repeat spray as needed.

For Elm leaf beetle control or for the control of cankerworms, use 2 to 3 quarts per 100 gallons of spray (4 to 6 tablespoons per gallon). Apply full coverage spray.

For best results add a spreader-sticker at the rate of 2 to 4 ounces per 100 gallons. Repeat spray as needed.

Dutch Elm Disease Control:

The control of Dutch Elm disease depends on the control of the Elm Bark Beetles, which cause the spread of the disease. Elm bark beetle can be controlled with sprays of Methoxychlor Tree Spray but more than spraying is required. The first and most important phase of Dutch Elm disease control is destruction of all dead or diseased wood in which elm bark beetles might develop.

Elm Bark Beetle Control:

To control Elm Bark beetles, make a dormant spray application in the spring before any leaves appear. Do not spray unless temperature is 40 degrees F or warmer.

Hydraulic Sprayers:

Mix 8 gallons Methoxychlor Tree Spray with 92 gallons of water and apply 20 to 30 gallons to each 50 foot elm tree. Be sure all bark on trunk, limbs and twigs is thoroughly wet with spray.

Mist Blowers:

Mix 5 gallons per 10 gallons of water and apply 2 to 3 gallons per 50 foot elm tree, wetting all bark surfaces thoroughly.
