WEED-'N-FEED

In addition to the 20-10-5 fertilizer, this product contains TRIMEC Turf Herbicide. The fertilizer supplies a generous portion of the plant food needed for normal season's growth and the herbicide controls hard-to-kill weeds such as chickweed, black medic, ground ivy, knotweed, plantain, dandelions, henbit, spurge and most other common lawn weeds.

The weed killing benefits from TRIMEC Turf Herbicide are especially important because excellent control results from minimum amounts of chemical. However, if adverse low moisture conditions prevail and weeds are in a state of poor growth possible retreatment may be necessary with a TRIMEC Turf Herbicide Liquid formulation when conditions improve.

WHEN TO APPLY: For best results apply when weeds are growing vigorously in the spring or early fall after heavy rains.

The material may be used on bluegrass, fescue, ryegrass, Bermuda and zoysia lawns. Normally, at this time there is sufficient moisture for excellent response from the fertilizer as well as very effective weed control.

Super TRIMEC Weed-'N-Feed is a remarkably effective lawn food which combines the advantages of both fast and long lasting feeding action plus the broad range of weed control of the TRIMEC. The fertilizer produces a thick, green turf while killing weeds to make way for turf growth. Weeds contacted by the product stop growing, gradually die and disappear from the lawn.

- COVERS 5,000 SQ. FT. -

HOW MUCH TO USE: This 20 lb. bag of Super TRIMEC Weed-'N-Feed should be used on 5,000 sq. ft. Apply evenly with a lawn spreader either as a one pass application or a two pass application, criss-crossing the area at half the rate each time.

To get maximum weed killing results, do not rake, mow, or water the lawn for at least 24 hours after spreading the product.

Lawns which are heavily overrun by weeds and are in poor condition may require more than one application of this product. A suggested second application could be made in approximately 30 days.

CAUTION: Avoid inhaling dust or contact with skin, eyes and clothing.

Do not reuse container. Destroy when empty.

Do not use this product where desirable clovers are present or allow the product to wind drift on flowers, vegetables or ornamental shrubbery. Do not apply to newly seeded lawns. During application close spreader openings when turning. Apply when the air is calm. Keep away from fertilizers, seeds, insecticides or fungicides. Do not apply to areas undercut by roots of desirable trees and shrubs.

Spreader setting should be calibrated as follows:

Scott	6
Lawn Beauty	5
Jackson	7½
Sears	4

The above spreader settings are approximate. Check your spreader on 100 sq. ft. and adjust to apply one lb. per 100 sq. ft. Use normal rate of walk when applying to avoid an error on rate of application.

NOTICE: Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment will vary Seller makes no claims other than those stated on this label.

FERTILIZER GUARANTEE

U.S. PATENT

WEED-'N-FEED

WEED-'N-FEED is a 20-10-5 lawn fertilizer plus TRIMEC, a new patented herbicide (U. S. Patent 3, 284,186) containing 2, 4-D plus MCPP and Dicamba. It kills weeds and feeds the lawn.

WHEN TO APPLY

Apply WEED-'N-FEED to lawns in the spring and fall. It can be applied to lawns that are dormant or growing. It can be applied to lawns that are being established or to lawns that are already established.

COVERS 5,000 SQ. FT. -

HOW MUCH TO USE

Apply 1/2 lb. of WEED-'N-FEED per 5,000 sq. ft. of lawn. For lawns that are being established, apply 1 lb. per 5,000 sq. ft. of lawn.

FERTILIZER GUARANTEE

WEED-'N-FEED contains 20% nitrogen, 10% phosphorus and 5% potassium. It is guaranteed to contain these amounts.
