

RES DISINFECTANT POWDER**

DIRECTIONS

Mix GORDON RES-Q SEED DISINFECTANT DIRECTLY with the seed in the drill or planter box or in a regular dust treater at the rate of:

WHEAT	BARLEY, OATS, RYE	FLAX
1 oz.	2 oz.	4 oz.
per bushel	per bushel	per bushel

Follow these steps to ensure thorough mixing with the seed:

When starting with an empty drill or planter box enough seed to cover the bottom of the box is to be treated in a separate container and placed in the bottom of the empty drillbox. This seed can be treated in an empty carton or drum which can later be destroyed. This treatment of seed in a separate container is not necessary when, at refilling, enough treated seed remains to cover the bottom of the drill or planter box.

- 1. Fill the planter box to one-half capacity. (Do not fill the planter box over one-half full).
- 2. Sprinkle seed disinfectant over the seed surface at the rate of 1 oz. per bushel of wheat, 2 oz. per bushel of barley, rye and oats and 4 oz. per bushel of flax.
- 3. Mix well by stirring with a stick or paddle until the seed is evenly coated with the powder. Do not mix with bare hands.
- 4. Add the remaining half to fill the seed box and sprinkle the seed disinfectant over the seed surface at the above recommended rates, per bushel, and mix as directed in step 3 above.

NOTE: Not effective against Loose Smut of Wheat and True Loose Smut of Barley.
