NOTE: Whether using a hose-end sprayer or pressure sprayer, avoid sprays which are too fine because they can drift and damage ornamental or garden plants.

HOW MUCH TO USE: SPOT SPRAY

To spray small areas or individual weeds, do not use hose-end sprayers. Mix 1 oz. (2 tbsp.) in 1/2 gal. water in pressure sprayer and spray as required being certain to "wet" each weed.

—FOR COMMERCIAL USE—

HOW MUCH TO USE - ENTIRE LAWN:

Apply BL 10,000 at the rate of 1 gallon per acre (or 1 quart per 10,880 sq. ft.) in sufficient water for adequate coverage.

HOSE END SPRAYER - Use sprayer designed for lawns. Put recommended amount of chemical in sprayer bottle and add water to indicated level and spray on specified area.

PRESSURE SPRAYERS - Mix 2 fl. oz. (4 tbsp.) in each gallon of water and uniformly spray each gallon of dilute spray on about 675 sq. ft. of lawn.

CAUTION: Harmful if swallowed. Avoid contact with eyes, skin, and clothing. In case of contact, flush with water. Avoid contamination of feed or foodstuffs.

Avoid drift of spray mist onto vegetables, flowers, ornamental plants, shrubs, trees, and other desirable plants. Do not contaminate domestic or irrigation water. Do not pour spray solution near these plants. Do not store in contact with fertilizers, seeds, insecticides, or fungicides. Do not spray on carpetgrass, dichondra nor lawns or turf where desirable bentgrass or clovers are present. Use only lawn sprayers ~~for this use~~. Coarse sprays are less likely to drift. Do not apply to areas underlaid by roots of desirable trees and shrubs. This product may be injurious to St. Augustine grass.

DO NOT REUSE CONTAINER. WHEN EMPTY, WASH THOROUGHLY AND DESTROY. DO NOT BURN.

NOTICE: Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment will vary, Seller makes no claims other than those stated on this label.
