USE PRECAUTIONS:

Do not allow spray to drift onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result. Do not pour spray solutions near these plants. Avoid fine mist sprays. Coarse spray droplets are less likely to drift and cause damage to nontarget plants. Do not spray roots of desirable trees and shrubs. Do not exceed specified dosage; be particularly careful within dripline of tree and other ornamental species. This product is intended for spot spraying individual weeds only.

WHAT IT IS & HOW TO USE IT:

Gordon's Trimec® Spot Weeder contains Trimec® turf herbicide, a combination of three proven weed killers 2,4-D, mecoprop and dicamba. Together they control a wide range of broadleaf lawn weeds; some of which are listed on this label.

Use to "spot-treat" weeds in the lawn. For best results, apply when weeds are actively growing. Do not water within 24 hours after spraying. Use as is. Do not mix. Do not dilute. Aim at weed and spray. Only a short burst is needed. Overspraying only wastes the product and may cause damage to grasses such as centipedegrass, St. Augustinegrass, and Floratam. Effects begin to show after a few days and weeds gradually die. Up to 4 weeks may be required for complete kill. Be patient, Gordon's Trimec® Spot Weeder works slowly. Repeat in 3 to 4 weeks if necessary.

For lawns with many weeds, requiring an overall treatment, spray with Acme Trimec® Lawn Weed Killer, a concentrate you'll have to mix with water in your hose end or hand-operated sprayer.
