PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Do not inhale dust. Do not allow contact with skin, eyes or clothing. When using this product, wear long-sleeved shirt, long pants, socks and shoes.

After using this product, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water.

ENVIRONMENTAL HAZARDS:

This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Do not apply when weather conditions favor drift from target area. Do not contaminate domestic or irrigation waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment area until spray has dried or dust has settled.

STORAGE & DISPOSAL

STORAGE: Store in original container in a locked storage area inaccessible to children and domestic animals. Do not store near food or feedstuffs.

PESTICIDE DISPOSAL: Securely wrap bag in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

USE PRECAUTIONS:

Do not use this product where desirable clovers are present or allow the material to wind drift onto flowers, vegetables or ornamental shrubbery. Do not apply in areas underlaid by roots of desirable trees or shrubs. Apply when the air is calm. Do not apply to newly seeded lawns. During application, close spreader openings when turning.

[This product may stain concrete and stone. Where spilling occurs, sweep off immediately, then flush with water. (For use for products when iron is present in the fertilizer.)]

INSTRUCTIONS:

Gordon's Trimec® Weed & Feed 4 controls a wide range of lawn weeds including dandelion, chickweed, knotweed, plantains, henbit, spurge and many others commonly found in home lawns. This product may be applied to established lawns of bermudagrass, bentgrass, bahiagrass, centipedegrass, Kentucky bluegrass, fescues, perennial ryegrass, zoysiagrass, and St. Augustinegrass. Do not use on dichondra or carpetgrass. Do not apply this product to 'Floratam' St. Augustinegrass in Florida. In addition, a 23-3-7 fertilizer provides a balanced supply of plant nutrients or plant food.

Possible retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. A second application may be made in approximately 30 days.

The maximum application rate to turf is 1.0 pound 2,4-D acid equivalent per acre per application, per site. The maximum number of broadcast applications per treatment site is 2 per year.

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least 1 day before application to sustain moisture until the next watering (see step 4).
3. Apply when weeds are young and growing actively, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto nontarget plants.
4. Do not wash from weed leaves for 1 to 2 days after application. At this time a thorough watering should be made.

II. Advertising claims that may be presented on the retail containers:

- ◆ (For products where iron is present) - This product may stain concrete and stone. Where spilling occurs, sweep off immediately, then flush with water.
- ◆ (Brand Name) enhances the fertilizer portion of this product with Agrico Turf[®], a stabilized form of urea nitrogen that remains in the stable available ammonium form for longer periods of time. Agrico Turf[®], when watered into the soil, attaches itself to clay particles where it remains for use by the plant, longer than if unstabilized. The result is a lawn that is greener longer than if fertilized with unstabilized urea nitrogen. Added iron and other essential micronutrients promote root development, color enhancement, and seed production.
- ◆ ~~Contains Trimec[®] Herbicide~~
