**GENERAL INFORMATION:** This product contains a special formulation low in 2,4-D for maximum safety to St. Augustinegrass. The fertilizer provides needed plant food while the herbicide will control hard-to-kill weeds such as creeping charlie, knotweed, chickweed, dandelions and plantains and most other broadleaf weeds.

If adverse low moisture conditions prevail and weeds are in a state of poor growth, possible retreatment may be necessary with a TRIMEC Herbicide liquid formulation when conditions improve.

This product can be used on such sensitive grasses as St. Augustinegrass, bahiagrass, centipedegrass, bermudagrass, bentgrass and zoysiagrass. Under conditions of adequate moisture, high temperature

and high humidity, over application may cause minor transitory discoloration on St. Augustine.

**WHEN TO APPLY:** For best weed control, application should be made when weeds are growing vigorously. Application can be made at any time but for maximum safety to St. Augustinegrass, make application during spring and fall when temperatures are moderate.

**HOW MUCH TO USE:** This 20 pound bag should be used on 5,000 square feet. Apply evenly with a lawn spreader either as a one-pass application or a two-pass application by crisscrossing the area at one half the rate each time.

To get maximum weed killing results, do not rake, mow, or water the lawn for at least 24 hours after spreading the product.

Lawns which are heavily overrun by weeds and are in poor condition may require more than one application of this product. A suggested second application could be made in approximately 30 days.

The maximum application rate to turf is 0.4 pounds 2,4-D acid equivalent per acre per application per site, The maximum number of broadcast applications per treatment site is 2 per year. Spreader setting should be adjusted as follows:

- Scott..... 6
- Lawn Beauty..... 5
- Jackson..... 7 1/2
- Sears..... 4

The above spreader settings are approximate. Calibrate your spreader on 100 square feet and adjust to apply at the rate of 1/2 pound of product per 100 square feet.
