### **INSTRUCTIONS**

Gordon's Weed & Feed 30 contains TRIMEC(R) herbicide. TRIMEC controls a wide range of lawn weeds, including dandelion, chickweed, plantains, henbit, spurge and many others commonly found in home lawns. In addition, a 24-4-8 fertilizer provides a generous supply of plant food needed for a normal season's growth. Possible retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. A second application may be

made in approximately 30 days. Do not use on dichondra, carpet-grass, closely-mowed bentgrass putting greens or St. Augustine lawns.

pg. 364

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least 1 day before application to sustain moisture until the next watering (see step 4)
3. Apply when weeds are young and actively growing, preferably in the morning when the dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto non-target plants.
4. Do not wash from weed leaves for 1 to 2 days after application. At this time a thorough watering should be made.
