 \*\*\* 99% of the 2-Methyl-4-chlorophenoxyacetic acid is contained in the granules.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

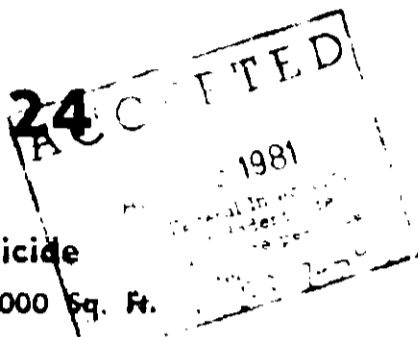

**STATEMENT OF PRACTICAL TREATMENT**

In case of contact, wash skin with plenty of water. If swallowed, drink plenty of water for 15 minutes and seek medical attention.

See back panel for additional information.

TRIMEC is a registered trademark of GORDON CORPORATION. Patent No. 3,284,186.

**NET WEIGHT 25 POUNDS**

Stop! Read the entire label first.  
 Observe all directions and warnings carefully.

**PRECAUTIONARY STATEMENT**

**Hazards to Humans & Domestic Animals**  
 CAUTION: Harmful if swallowed. Causes severe eye irritation. Wash face with water after use. Avoid contact with clothing.

**Environmental Hazards**  
 This product is toxic to fish and aquatic life. Do not apply near water.

**DIRECTIONS FOR USE**  
 Apply to lawns and areas where weeds are present. Do not use on ornamental plants.

**STORAGE & DISPOSAL**

Store in original container. Do not reuse empty container. Wrap container for disposal.

**USE PRECAUTIONS**  
 Do not use this product where desirable clover is present or allow the material to wind drift onto flowers, vegetables, shrubs or ornamental plants. Do not apply in areas where there are many desirable trees or shrubs. Apply when the air is calm. Do not apply if rain is expected within 24 hours of application. Close spreader openings when turning.

**INSTRUCTIONS**  
 Gordon's Weed & Feed 24 is a 18-4-8 fertilizer. It is a potent combination of 2,4-Dichlorophenoxyacetic acid, 2-Methyl-4-chlorophenoxyacetic acid, and Dicamba. Together they control a wide range of lawn weeds including dandelion, chickweed, knotweed, plantains, henbit, spurge and many others commonly found in home lawns. In addition, a 18-4-8 fertilizer provides a source of plant food needed for a normal season's growth. Possible reticulation may be necessary if a lawn is heavily overgrown by weeds, or if adverse lawn conditions prevail and weeds are causing a total stoppage of growth. A second application may be made in late summer or early fall. Do not use on dichondra, carpetgrass, or any other grasses growing in the area. Apply to lawns.  
 1. Mow lawns to a normal height 2 days before application.  
 2. Water lawns thoroughly at least 2 days before application to sustain moisture until the next watering.  
 3. Apply when weeds are young and actively growing, preferably in the morning when the sun is shining. Do not apply in the evening at time of application, sprinkle lightly with water to settle granules and prevent drift. Do not use on target plants.  
 4. Do not water lawns when weeds are young 2 days after application. Watering should be made the next watering should be made.  
 Be patient. TRIMEC works slowly and gently and is friendly to your lawn.

**SPREADER SETTINGS**

Drop	6
Low Speed	5
Medium Speed	7 1/2
High Speed	4

These spreader settings are for a broadcast application of 250 sq. ft. and should be adjusted for other applications.

**FERTILIZER GUARANTEE**

Total Nitrogen	5%
Water Soluble Nitrogen	4%
Available Phosphorus	8%
Available Potash	18%
