NET WEIGHT ONE POUND

ROACH AND CRICKET BAIT

ROACH & CRICKET BAIT, a ready-to-use product, is very effective for the control of crickets and the following cockroaches listed below. It gives rapid kill of these insects including those resistant to certain chlorinated hydrocarbon and phosphate insecticides. Crickets and roaches die quickly after feeding on the bait.

Cockroaches: American, Brown banded, German, Oriental roaches

Crickets

DIRECTIONS FOR USE

IMPORTANT: Read these entire Directions and Conditions of Sale, including the Warranty and Limitation of Damages provision, before using Roach & Cricket Bait.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness under normal conditions of use of toxicity to laboratory animals. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller, PBI-Gordon Corporation and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

For Use in and around Homes, Apartment Buildings, Stores, Restaurants and Warehouses

Apply bait lightly to floors near baseboards, in closets, under sinks and refrigerators and in other areas where insects may hide but which are inaccessible to children such as cracks and crevices. Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Use approximately 4 ounces of bait per 1,000 sq. ft. of space and scatter lightly so that bait is barely visible. Repeat as necessary. Keep out of reach of children.

For Use By Pest Control Operators in Poultry Packing, Red Meat Packing and Food Processing Plants, Including Plants that are Federally Inspected.

Apply bait on paper, pasteboard, or other material that will permit removal. Locate these bait stations on floor near walls, in storage areas and other areas where insects have been observed. Maintain strict account of location and number of bait stations. Do not apply bait in edible product areas until operations have ceased for the day. Remove all bait stations from the edible products areas before resuming operations.

For Use in Research Facilities

The use of Roach & Cricket Bait in and around research animal quarters for pest control will not induce changes in liver microsomal enzyme activity in these animals.

RESTRICTIONS

Do not apply to floors or other surfaces likely to be contacted by children or pets.

CONTAINER & WASTE DISPOSAL

Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

CAUTION

May be harmful if swallowed or absorbed through the skin. Do not contaminate feed or food. Avoid skin contact. Wash thoroughly after using.

SYMPTOMS OF POISONING: A sense of "tightness" in the chest, Sweating, Contracted pupils, Stomach pains, Vomiting and diarrhea.

TREATMENT: In case of poisoning call a physician immediately. Have patient lie down and keep quiet. If swallowed induce vomiting by giving a tablespoonful of salt in a glass of warm water. Administer milk or water freely and again induce vomiting until vomit fluid is clear. If on skin, remove contaminated clothing and wash skin immediately with soap and warm water. If eyes are contaminated, wash with flowing water for at least 15 minutes.

TO PHYSICIAN

ANTIDOTE: Administer atropine sulfate in large therapeutic doses. Repeat as necessary to the point of tolerance.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment, will vary, Seller makes no claims other than those stated on this label.
