PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. Avoid breathing of spray mist. Wash hands after using. Wear protective clothing when handling or applying this product, including long pants, long-sleeved shirt, and impermeable gloves and boots. Avoid contamination of food and feedstuffs. Keep children and domestic animals off treated area until this material has been watered into the soil and the grass is dry. Keep livestock off treated areas.

Statement of Practical Treatment

IF SWALLOWED: Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Call a physician at once.

IF IN EYES: In case of eye contact, immediately flush eyes with plenty of water for 15 minutes. Call a physician at once.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly. If imitation develops, get medical attention

IF INHALED: Remove victim to fresh air and apply respiration if indicated.

Environmental Hazards

For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate waters used for domestic consumption, or by wildlife or aquatic life, or for irrigation purposes. Do not apply when weather conditions favor drift from area treated. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE & DISPOSAL

STORAGE: Store in original container in a locked storage area inaccessible to children or bets. Do not store near food or feedstuffs. Keep tightly closed when not using.

PRODUCT DISPOSAL: Securely wrap original container with unused product in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bottle. Rinse thoroughly before discarding in trash.

CONTROLS CRABGRASS, NUTGRASS, DALLISGRASS, and SANDBUR in BLUEGRASS of ZOYSIAGRASS LAWNS.

USE PRECAUTIONS:

DO NOT USE ON NEWLY SEEDED LAWNS UNTIL AFTER THE THIRD MOWING.

DO NOT USE ON ST. AUGUSTINEGRASS, CENTIPEDEGRASS, or BAHIAGRASS.

KEEP CHILDREN AND DOMESTIC ANIMALS OFF TREATED AREA UNTIL THIS MATERIAL HAS BEEN WATERED INTO THE SOIL AND THE GRASS IS DRY.

DO NOT USE A HOSE-END SPRAYER.

DO NOT USE HIGH SPRAYER PRESSURE SINCE FINE DROPLETS COULD BE FORMED WHICH MIGHT DRIFT TO NEARBY SENSITIVE PLANTS.

ABOUT NUTGRASS: Nutgrass grows from seed and small nut-like tubers on the roots. Unless controlled, nutgrass will spread rapidly. Look for grass-like, but triangular yellowish green leaves growing upright above the normal lawn grass. Make application promptly to prevent seed and tuber formation. Treat only infested areas since some temporary yellowing of the lawn grass may occur. Where only a few nutgrass plants are found, place 2 or 3 drops of undiluted chemical directly in the crown of the plant (an eye dropper or small spoon may be used) and retreat in 10 to 14 days.

WHEN . HOW TO APPLY:

Apply anytime when temperatures are above 75°F. Apply early because young plants require less chemical and are easier to kill than older plants. Determine average size of growth of plants to be treated and make dilutions as given in the table. Use coarse spray droplets. On new lawns, wait until after the third mowing before treating. Be sure soil is moist and lawn healthy before treating. During droughts, water grass well several days in advance and restore turf to healthy green color with fertilizer before treating. Treat only infested areas since some temporary yellowing of the lawn grass may occur. If directions are followed, turf grasses will quickly return to normal. Repeat applications may be necessary if new growth appears. Use a compressed air sprayer.

- 1. Keep lawn mowed about 1-1/2 to 2 inches during treatment.
- 2. Water lawn well before treatment.
- 3. In a compressed air sprayer, mix according to the dilution table.
- 4. Set sprayer wand at low pressure for a coarse droplet spray.
- 5. Apply uniformly over the areas to be treated for example: 2 tablespoons (for young seedlings) in 1 gallon water over 250 square feet.
- 6. Keep children and domestic animals off treated area until this material has been watered into the soil and the grass is dry.
- 7. Flush out sprayer with clean water.
- 8. Repeat treatments as needed.

DILUTION TABLE FOR COMPRESSED AIR SPRAYER (DO NOT USE A HOSE-END SPRAYER)

Amount of Product to Use					
Young Plants or 90⁰ Weather		Amount of Water In Sprayer	Area to be Treated
