**Hazards to Humans & Domestic Animals**

**CAUTION:** Harmful if swallowed. Do not inhale dust. Do not allow contact with skin, eyes or clothing. When using this product, wear long-sleeved shirt, long pants, socks and shoes.

After using this product, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water.

**ENVIRONMENTAL HAZARDS:**

Drift or runoff may adversely affect nontarget plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwater. Do not apply when weather conditions favor drift from target area.

**OPTION 1**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment area until spray has dried or dust has settled.

**STORAGE:** Store in original container and keep any bags containing unused product in a locked storage area inaccessible to children and domestic animals.

**PESTICIDE DISPOSAL:** Securely wrap bag in several layers of newspaper and discard in trash.

**CONTAINER DISPOSAL:** Do not reuse bag. Discard bag in trash.

**USE PRECAUTIONS:**

Do not use on dichondra, carpetgrass, closely-mowed bentgrass putting greens or St. Augustinegrass.

Do not use this product where desirable clovers are present or allow the material to drift onto flowers, vegetables or ornamental shrubbery. Do not apply in areas underlaid by roots of desirable trees or shrubs. Apply when the air is calm. Do not apply to newly seeded lawns. During application, close spreader openings when turning.

**INSTRUCTIONS:**

Gordon's Trimec® Weed & Feed 33½ is a Trimec® complex, a combination of three proven weed killers - 2,4-D, Mecoprop and Dicamba. Together, they control a wide range of lawn weeds, including dandelion, chickweed, knotweed, plantain, henbit, spurge and many others commonly found in home lawns. In addition, a 24-4-8 fertilizer provides a balanced supply of plant nutrients. Possible retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth.

Apply 3.0 to 3.64 pounds of product per 1,000 square feet of turfgrass. A second application may be made in approximately 30 days.

The maximum application rate to turf is 1.2 pounds 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least 1 to 2 days before application to sustain moisture until the next watering (see step 5).
3. Apply when weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto nontarget plants
4. Avoid applying when temperatures are consistently above 90°F.
5. Do not wash from weed leaves for 1 to 2 days after application. At this time, a thorough watering should be made.

**CALIBRATION INSTRUCTIONS:**

Refer to the rate table for the area to be treated.

- ◆ For 3.0 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 333 square feet and adjust to apply at the rate of 1 pound of product per 333 square feet.
- ◆ For 3.2 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 310 square feet and adjust to apply at the rate of 1 pound of product per 310 square feet.

KEYS FOR SUCCESS	CALIBRATION
◆ Use when weeds are young and actively growing.	Measure your lawn. For example 20' X 50' equals 1,000 square feet.
◆ Mow lawn to normal height 1 to 2 days before application. Water thoroughly before application to sustain moisture until the next watering.	Make sure your spreader is dry. If spreader is not listed below, adjust to apply 1 pound of product per 280 square feet (28' X 10"). 18 pounds will cover 5,000 square feet.
◆ Apply preferably in the morning, when grass is moist from dew, or sprinkle lightly. Water will hold the particles on the foliage and prevent dust drift on to nontarget plants. Apply when air is calm. During application, close spreader openings when turning.	The spreader settings are only approximate. <i>Drop Spreader Settings:</i> Republic EZ Drop/                      4¼ Scotts    5¼ Sears, K-Gro                                      4¼ True Temper                                      3¼ Red Devil    8½ Old or rusty spreaders will discharge products at different rates.
◆ Do not water treated area for 1 to 2 days after application. Then water thoroughly.	The spreader settings are only approximate. <i>Rotary Spreader Settings</i> Republic EZ Rotary                              2¼ Scotts Easy Green                              26 Scotts Speedy Green                              5¼ Republic EZ Grow                              5¼ Cyclone, True Temper                              3¼ Red Devil    5 Sears, K-Gro    2¼ Ortho Whirlybird                              2½
◆ Use Precautions: Do not use on desirable clovers, dichondra, carpetgrass, closely mowed bentgrass or St. Augustinegrass. Do not use or allow the material to wind drift onto flowers, vegetables or ornamental shrubbery. Do not apply in areas over root systems of desirable trees or shrubs. Do not apply to newly seeded lawns until after the third mowing.	

If necessary, reapply in approximately 30 days, if lawn is heavily overrun by weeds, or if adverse low moisture conditions prevail.

The maximum application rate to turf is 1.2 pounds 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

- ◆ Stimulates thick, lush grass blades:
- ◆ Ortho product quality you've come to trust.
- ◆ One-step application for a lush green lawn.
- ◆ Fast deep greening balanced with long-term feeding by patented Polyon® coated fertilizer technology.
- ◆ Small particle size for uniform coverage to control a wide range of weeds.
- ◆ Patented Polyon® coated fertilizer technology for timed release of fertilizer.
- ◆ Polyon® coating prevents burning.
- ◆ Scientific blend of small particles promotes fast deep greening and balanced long term feeding.
- ◆ Outdoor use only
- ◆ Satisfaction guaranteed\* or your purchase price refunded with proof-of-purchase and original cash register receipt.
- ◆ Controls broadleaf lawn weeds.
- ◆ Controls 35 common lawn weeds including dandelion and clover.
- ◆ Feeds, greens and thickens lawns while controlling weeds.
- ◆ Poly-S® Technology.
- ◆ Scotts® slow-release polymer-encapsulated nitrogen fertilizer for uniform growth with extended feeding.
- ◆ Feeds up to 8 weeks.
- ◆ These products are the quality choice in complete lawn care. You determine what your lawn needs, and you'll find a product to help you. Fertilizers, lawn starters, crabgrass prevention, weed and insect control - everything for a lush green lawn and year-round protection. Each one is easy to apply and guaranteed to produce quick, long-lasting results.
- ◆ This product is designed to be used in the spring, when weeds are actively growing.
- ◆ The fertilizer combination of nitrogen, phosphate, and potash gives your lawn strength above and below the surface. This product promotes root and rhizome development, helping the grass to produce more blades. The result is a thicker, greener lawn.
- ◆ With the right weather conditions and correct application, your lawn will be greener and thin areas of turf will fill in, making the density of your lawn more uniform.
- ◆ An easy guide to timing your application is to look for dandelions on your lawn.
- ◆ This product can be applied in the fall when weeds are actively growing. Because plants are taking nutrients into their roots at this time of year, it's easier to control some weeds in the fall than in the spring.
- ◆ This product makes it easier to have a lush, green lawn. Our four (4) simple applications eliminate the guesswork and give you professional lawn care results. Each stage combines just the right amount of fertilizer with the right amount of control and prevention. Just match each stage to the correct season and you'll prevent crabgrass, control weeds and insects, and prepare your lawn for the winter. It's what your lawn needs for strong growth.

Stage One is a preemergent. - Stage Two is a broadleaf postemergent. - Stage Three is an insecticide. - Stage Four is a fall broadleaf postemergent.

**IV. Addition of a referral claim:**

- ◆ To spot treat individual weeds, use Ortho Weed-B-Gon Weed Killer®.
