TRIMEC® 869

A TRIMEC® ORNAMENTAL TURF HERBICIDE FORMULATION

CONTROLS DANDELION, CHICKWEED, KNOTWEED, PLANTAIN, HENBIT,
SPURGE

and many other broadleaf weeds, some of which are shown on the side panel.

- KEEP FROM FREEZING -

ACTIVE INGREDIENTS:

*Dimethylamine Salt of 2-(2-methyl-4-chlorophenoxy) propionic acid.....	34.73%
**Dimethylamine Salt of 2-methyl-4-chlorophenoxyacetic acid.....	19.07%
***Dimethylamine Salt of Dicamba (3,6-dichloro-o-anisic acid).....	3.85%
INERT INGREDIENTS.....	42.35%
TOTAL	100.00%

THIS PRODUCT CONTAINS:

- *2.73 lbs. 2-(2-methyl-4-chlorophenoxy)propionic acid equivalent per gallon or 28.70%.
- **1.48 lbs. 2-methyl-4-chlorophenoxyacetic acid equivalent per gallon or 15.57%.
- ***0.30 lbs. 3,6-dichloro-o-anisic acid equivalent per gallon or 3.20%.

**STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS
AND FOLLOW DIRECTIONS CAREFULLY.**

PRECAUTIONARY STATEMENT

Hazards to Humans & Domestic Animals

DANGER: Corrosive, causes damage to eyes. Do not get into eyes, on skin, or on clothing. Wear long pants, long-sleeved shirt, shoes and gloves when mixing, loading or applying this product. Wear face shield or goggles when mixing, loading or applying this product. Harmful if swallowed or inhaled. Avoid exposure to spray mist. Wash thoroughly after handling.

Statement of Practical Treatment

IF IN EYES: In case of eye contact, immediately flush eyes with plenty of water for 15 minutes. Call a physician at once.

IF SWALLOWED: Drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air and apply respiration if indicated.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

Environmental Hazards: Drift or run-off may adversely affect nontarget plants. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water source. Do not apply when weather conditions favor drift away from target area.

Most cases of groundwater contamination involving phenoxy herbicides such as MCP and MCPA have been associated with mixing/loading and disposal sites. Caution should be exercised when handling MCP and MCPA pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit workers to reenter treated areas until sprays have dried or dusts have settled.

STORAGE & DISPOSAL

STORAGE: Store in original container in a locked storage area inaccessible to children or pets. Keep from freezing. To prevent cross-contamination, do not store near other herbicides, fertilizers, insecticides, fungicides, or near seeds.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law and may contaminate groundwater. If these wastes can not be disposed of by use according to label instructions, contact your state Pesticide or Environmental Control Agency or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: FOR METAL CONTAINERS - Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. FOR PLASTIC CONTAINERS - Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

OTHER USE PRECAUTIONS - OBSERVE CAREFULLY.

1. Avoid drift of spray mist onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants.
2. Do not pour spray solutions near these plants.
3. Do not use on lippia or dichondra nor on lawns or turf where desirable clovers are present.
4. Use only lawn-type sprayers.
5. NOTE: Coarse sprays are less likely to wind drift.
6. Do not spray exposed roots of trees and ornamentals. Do not exceed specified dosages for any area. Be particularly careful within the dripline of trees and other ornamental species.
7. Do not spray bermudagrass or zoysiagrass while emerging from dormancy, unless injury can be tolerated.
8. Applications to newly seeded lawns may cause injury. Delay application until well established, or after two or three mowings.
9. Applications should be made when air temperature is below 85°F to avoid injury to desirable grasses.
10. Seed can be sown 3 to 4 weeks after application.
11. Do not contaminate domestic or irrigation waters.
12. Be careful not to overdose centipedegrass or St. Augustinegrass lawns.
13. After using this product, clean sprayer with soap or detergent and water, and rinse thoroughly before applying other pesticides.
14. Failure to observe the above precautions may result in injury to desirable plants.
15. Do not apply this product through any type of irrigation system.

- HOW MUCH TO USE & WHERE -

Bermudagrass and Bentgrass - Use 2 pints of product per acre. Do not overdose closely-mowed bentgrass. Read the use precautions and observe carefully. Do not use more than the recommended rate.

Bluegrass, Fescue and Zoysiagrass - Use 3 to 4 pints of product per acre.

Centipedegrass and St. Augustinegrass - Use 1 to 1 3/4 pints of product per acre. Repeat after 3 weeks if necessary. Do not overdose or apply during hot summer months. These species are sensitive. It is important to use great care in spraying.

- GENERAL USE -

Mix TRIMEC®889 in 20 to 240 gallons of water per acre for good coverage. Use higher rates when weeds are dense or in flower. If hardy weeds persist, make a second application after three weeks. Apply when weeds are young and actively growing. Avoid applications during long excessively dry or hot periods. When grasses are under stress use reduced rates to reduce potential injury. Do not irrigate within 24 hours of application. Do not apply to newly seeded turf until after the first mowing. Seed can be sown 3 to 4 weeks after application at recommended rates.
