DANGER

See side panel for additional Precautionary Statements and Statement of Practical Treatment.

READ THE ENTIRE LABEL FIRST.
OBSERVE ALL PRECAUTIONS AND
FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENT

Hazards to Humans & Domestic Animals

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes or on clothing. Avoid breathing spray mist. Wear long pants, long-sleeved shirt, shoes and gloves when mixing, loading or applying this product. Wear face shield or goggles when mixing loading or applying this product. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Statement of Practical Treatment

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF SWALLOWED: Call a physician or get medical attention. Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available drink large quantities of water. Avoid alcohol.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS: Drift or runoff may adversely affect nontarget plants. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources. Do not apply when weather conditions favor drift away from target area.

Most cases of groundwater contamination involving phenoxy herbicides such as MCPP and MCPA have been associated with mixing/loading and disposal sites. Caution should be exercised when handling MCPP and MCPA pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit workers to reenter treated areas until sprays have dried or dusts have settled.

2. Do not pour spray solutions near these plants.
3. Do not use on lippia or dichondra nor on lawns or turf where desirable clovers are present.
4. Use only lawn-type sprayers.
5. NOTE: Coarse sprays are less likely to wind drift.
6. Do not spray exposed roots of trees and ornamentals. Do not exceed specified dosages for any area. Be particularly careful within the dripline of trees and other ornamental species.
7. Do not spray bermudagrass or zoysiagrass while emerging from dormancy, unless injury can be tolerated.
8. Applications to newly seeded lawns may cause injury. Delay application until well established, or after two or three mowings.
9. Applications should be made when air temperature is below 85°F to avoid injury to desirable grasses.
10. Seed can be sown 3 to 4 weeks after application.
11. Do not contaminate domestic or irrigation waters.
12. Be careful not to overdose centipedegrass or St. Augustinegrass.
13. After using this product, clean sprayer with soap or detergent and water, and rinse thoroughly before applying other pesticides.
14. Failure to observe the above precautions may result in injury to desirable plants.
15. Do not apply this product through any type of irrigation system.

- HOW MUCH TO USE & WHERE -

Bluegrass, Fescue and Zoysiagrass - Use 3 to 4 pints of product per acre.

Centipedegrass and St. Augustinegrass - Use 1 to 1½ pints of product per acre. Repeat after 3 weeks if necessary. Do not overdose or apply during hot summer months. These species are sensitive. It is important to use great care in spraying.

- GENERAL USE -

Mix M769 Herbicide in 20 to 240 gallons of water per acre for good coverage. Use higher rates when weeds are dense or in flower. If hardy weeds persist, make a second application after three weeks.
