**WHERE TO USE:**

TRIMEC® 901 may be used on Bahia, Bermuda, Bluegrass, Fescue, Pigeon or Zoysia lawns, vacant lots, playgrounds and other similar areas where broadleaf weeds are present. This product is especially effective on all hard-to-kill weeds such as Porson Ivy, Porson Oak, Sheepsorrel and Spurge. In addition TRIMEC® 901 controls most other broadleaf weeds, including sensitive weeds such as Chickweed, Clover, Dandelion, Knotweed and Plantain.

**WHEN TO USE:**

Spray at any time during the growing season when weeds are actively growing. Wait until the grass has reached a height of 2 inches before making an overall spray treatment. Wait 3 weeks before putting new grass seed or sod down in the bare spots. Poor weed control may result if spray is applied during drought or just before rain. For best results, mow 1 to 2 days before treating. Do not water lawn within 24 hours after treatment.
