GUARANTEED ANALYSIS

Total Nitrogen(N).....20.00%
20% Urea Nitrogen
Derived from Urea.

(OPTION 1 OR 2 TO BE USED DEPENDING ON THE SUBREGISTRATION)

OPTION 1

A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 square feet each growing season. When applied as directed, this product supplies 0.095 pounds of nitrogen per 1,000 square feet with each application. Use this product in conjunction with an additional fertilization program to provide at least 1 pound of nitrogen per 1,000 square feet each growing season. Consult your local agricultural extension agent for the proper amount of nitrogen to be applied in your area.

OPTION 2

TRIMEC® M886 should be supplemented by Liquid Lawn Fertilizer every 3 weeks from March through September (or April through October depending upon the growing season in your area). Please consult your local extension office for questions regarding frequency of this product in your area.

WHERE TO USE: TRIMEC® M 886 LIQUID WEED & FEED is especially formulated for sensitive southern grasses - St. Augustine, Bentgrass, Bahia, Bermuda, and Centipede grasses in lawns, vacant lots, playgrounds and other similar areas where broadleaf weeds are present. TRIMEC® M 886 LIQUID WEED & FEED is especially effective on all hard-to-kill weeds such as Poison Ivy, Poison Oak, Sheep sorrel and Spurge. TRIMEC® M886 LIQUID WEED & FEED also controls the easy-to-kill weeds such as Chickweed, Clover, Dandelion, Knotweed and Plantains. In addition, TRIMEC® M886 LIQUID WEED & FEED also feeds your lawn with a 20% urea nitrogen. For best results, spraying should be done when weeds are young and tender. Older weeds are harder to kill.

WHEN TO USE: Spray at any time during the growing season when weeds are actively growing. On new lawns, wait until the grass has reached a height of 2 inches before making an overall spray treatment. Wait 3 weeks before putting new grass seeds or stolons down in the bare spots. Poor weed control may result if spray is applied during drought or just before rain. For best results, mow 1 to 2 days before treating. Do not water lawn within 24 hours after treatment.

HOW TO USE: Shake well before using.

(One of the following will be used depending on the hose-end applicator used.)
