Explanation: Use additional page(s) if necessary. (For section I and Section II.)

NOTIFICATION:

(1) Revision of the wetlands warning statement within the Environmental Hazards section according to definition stated in Pesticide Regulation (PR) Notice 93-3, "Labeling Statement Prohibiting Application to Water", March 9, 1993. This is to certify that this notification meets every requirement of PR-Notice 88-6. (2) Revision of the limited warranty and disclaimer statement. (3) Three copies of the revised labeling are enclosed.

TRIMEC® M 904

"ST. AUGUSTINE GRASS" BROADLEAF HERBICIDE

**CONTROLS: DANDELION, CHICKWEED, KNOTWEED,
PLANTAIN, HENBIT, SPURGE
and many other broadleaf lawn weeds;
some of which are shown on the side panel.**

ONE QUART COVERS UP TO 9,600 SQUARE FEET

-KEEP FROM FREEZING-

ACTIVE INGREDIENTS:

*Dimethylamine Salt of 2-(2-methyl-4-chlorophenoxy) propionic acid.....	6.86%
**Dimethylamine Salt of 2-methyl-4-chloro-phenoxyacetic acid.....	3.76%
***Dimethylamine Salt of Dicamba(3,6-dichloro-o-anisic acid).....	0.75%
INERT INGREDIENTS.....	88.63%
TOTAL	100.00%

THIS PRODUCT CONTAINS:

- *0.4869 lbs. 2-(2-methyl-4-chlorophenoxy)propionic acid equivalent per gallon or 5.67%
- **0.2638 lbs 2-methyl-4-chlorophenoxyacetic acid equivalent per gallon or 3.07%
- ***0.0535 lbs. 3,6-dichloro-o-anisic acid equivalent per gallon or 0.62%

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW LABEL DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals:

WARNING: Causes substantial but temporary eye injury. Do not get in eyes, on skin or on clothing. Wear long pants, long-sleeved shirt, shoes and gloves when mixing, loading or applying this product. Wear face shield or goggles when mixing, loading or applying this product. Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

Statement of Practical Treatment

IF IN EYES: In case of eye contact, immediately flush eyes with plenty of water for 15 minutes. Call a physician at once.

IF SWALLOWED: Drink one or two glasses of water. Induce vomiting by touching back of throat with finger. Call a physician at once. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air and apply respiration if indicated.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly.

Environmental Hazards: Drift or run-off may adversely affect nontarget plants. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. When cleaning equipment, do not pour the washwater on the ground: spray or drain over a large area away from wells and other water sources. Do not apply when weather conditions favor drift away from target area. Do not contaminate domestic or irrigation waters.

Most cases of groundwater contamination involving phenoxy herbicides such as MCPP and MCPA have been associated with mixing/loading and disposal sites. Caution should be exercised when handling MCPP and MCPA pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit workers to reenter treated areas until sprays have dried or dusts have settled.

STORAGE & DISPOSAL

STORAGE: Store in original container in a locked storage area. Keep from freezing.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your state Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

USE PRECAUTIONS: Do not apply this product through any type of irrigation system. Do not allow spray to drift onto vegetables, flowers, ornamental plants, shrubs, trees, and other desirable plants since injury may result. Do not pour spray solutions near these plants. Whether using a hose-end sprayer or pressure-sprayer, do not use sprays that are fine because they can drift and cause damage to non-target plants. Coarse spray droplets are less likely to wind-drift. Use only lawn-type sprayers. Do not spray on carpetgrass, dichondra, nor on lawns or turf where desirable clovers are present. Do not spray roots of trees and ornamentals. Do not exceed specified dosages for any area. Be particularly careful within

dripline of trees and other ornamental species. This product may be injurious to St. Augustine, bent and centipede grasses under conditions of high temperature and moisture. Under these conditions, or in cases of accidental overdose, some slight temporary discoloration of the St. Augustine foliage may occur.

WHAT IT IS. WHERE AND HOW TO USE IT: TRIMEC® M 904 controls a wide range of broadleaf lawn weeds. This particular formulation is low in MCPA for maximum safety to MCPA sensitive grasses such as St. Augustinegrass, bentgrass and buffalograss. Spraying should be done when broadleaf weeds are small and tender for best results. If weeds are older, they are going to be harder to kill. Older weeds require the higher rates. Avoid spraying St. Augustinegrass under conditions of high temperature and moisture. Under these conditions, or, in cases of accidental overdose, some slight temporary discoloration of the St. Augustinegrass may occur.

1. Irrigate the lawn 2 or 3 days prior to spraying to ensure that weeds are growing and able to absorb the herbicide.
2. Do not water for 24 hours after treatment.
3. Although spray works faster with temperatures above 70 degrees F, sprays can be applied at any time plants are growing.
4. The amount of water is not important except to evenly distribute the herbicide. If directions advise 1 ounce in 1 gallon of water on 300 square feet, it may be more convenient to use 1 ounce in 2 gallons of water on 300 square feet, depending on the sprayer used. Generally large volumes of water result in more uniform coverage.

St. Augustinegrass, Bentgrass & Buffalograss: Mix 1 ounce of product in 1 gallon of water and uniformly spray 300 square feet (i.e. an area 10 feet wide by 30 feet long). If necessary, repeat treatment in 2 to 3 weeks if hard-to-kill weeds persist.

Bermudagrass, Bahiagrass, Bluegrass, Centipedegrass, Fescue & Perennial Ryegrass: Mix 1 1/2 ounce of product in 1 gallon of water and uniformly spray over 300 square feet. On hard-to-kill species, or, under poor growing conditions, or on older weeds, mix 2 ounces in 1 gallon of water and spray on 300 square feet with special attention to thorough coverage of the hard-to-kill weeds.
