Explanation: Use additional page(s) if necessary. (For section I and Section II.)

NOTIFICATION - Addition of advisory statements and nonpesticidal claims per PRN 95-2: Our request to add a colorant as an alternate formulation of the CSF was approved on 10/29/97. We are requesting to add advisory statements for the colorant named C.I. Acid Blue 9 (also named FD&C Blue No. 1.) that are consistent with the Precautionary Statements and the Directions for Use. Also, we ask to describe the features and benefits of this colorant as nonpesticidal claims. One (1) copy of the proposed labeling is enclosed for your review. Please refer to the appendix on page 6. This notification is consistent with the provisions of PRN 95-2 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to the EPA. I further understand that if this notification is not consistent with the terms of PRN 95-2 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under Section 12 and 14 of FIFRA.

READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW LABEL DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Causes moderate eye injury. Harmful if swallowed, or absorbed through the skin, or inhaled. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Statement of Practical Treatment

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF SWALLOWED: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

IF INHALED: Remove victim to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. Get medical attention.

ENVIRONMENTAL HAZARDS:

Drift or runoff may adversely affect nontarget plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Do not apply when weather conditions favor drift from target area. Do not contaminate domestic or irrigation waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit others to reenter treated area until sprays have dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

STORAGE & DISPOSAL

STORAGE: Keep from freezing. Store in original container in a locked storage area inaccessible to children. Do not store near food or feedstuffs. Avoid contamination of food or feedstuff.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.

USE PRECAUTIONS:

Avoid drift of spray mist to vegetables, flowers, ornamental plants, shrubs, trees, and other desirable plants. Do not pour spray solutions near desirable plants. Do not use on carpetgrass, dichondra, nor on lawns or turf where desirable clovers are present. Do not spray roots of ornamentals and trees. Do not exceed specified dosages for any area. Be particularly careful within dripline of trees and other ornamental species. Use only lawn type sprayers. Coarse sprays are less likely to drift from target area. This product may be injurious to St. Augustinegrass and centipedegrass under conditions of high temperatures (85°F) and drought. Do not apply this product to 'Floritam' St. Augustinegrass in Florida.

WHERE TO USE:

Trimec® M 905 Lawn Weed Killer may be used on bluegrass, bermudagrass, bahiagrass, fescue, ryegrass, zoysiagrass, St. Augustinegrass, and centipedegrass. Lawns, vacant lots, and playgrounds may be treated.

It is especially effective on all types of hard-to-kill weeds such as henbit, lespedeza, morningglory, poison ivy and poison oak, spotted spurge and oxalis. In addition to these, Trimec® M 905 controls most other broadleaf lawn weeds including such sensitive species as black medic, chickweed, dandelion, and plantain. A partial list is given on the side panel.

4/27

WHEN TO USE:

Spray at any time during the growing season when weeds are actively growing. Do not apply this product when air temperatures exceed 90°F. On new lawns, wait until the grass has been mowed three (3) times before making an overall spray treatment. Spot spraying may be made at any time with a pressure sprayer. Wait 3 weeks before putting new grass seed or stolons down in the bare spots. Poor weed control may result if spray is applied during drought or just before rain. For best results mow before treating. Do not water lawn within 24 hours after treatment.

FOR BERMUDAGRASS, BAHIAGRASS, KENTUCKY BLUEGRASS, FESCUES, AND PERENNIAL RYEGRASS:

Tank or Pressure Sprayers - Mix 1 - 1½ fluid ounces (2 - 3 tablespoons) of product with 1.0 gallon of water to cover 300 square feet of turf. Use the higher rate for large weeds or dense weed stands.

Hose End Sprayers - Put 3½ fluid ounces (6½ tablespoons) of product into the sprayer jar for every 1,000 square feet of turf. Fill the sprayer jar with water to the proper level and spray to cover 1,000 square feet of turf. For example, to spray 3,000 square feet of lawns, measure 10 fluid ounces (20 tablespoons) of product into the sprayer jar. Fill the jar with water to the 10 gallon mark and spray evenly to cover 3,000 square feet of lawn.

FOR ST. AUGUSTINEGRASS, BENTGRASS, BUFFALOGRASS, AND CENTIPEDEGRASS:

Tank or Pressure Sprayers - Mix ½ fluid ounce (1 teaspoon) of product with 1.0 gallon of water to cover 300 square feet of turf. If hard-to-control weeds persist repeat the application at the same rate in three (3) weeks.

Hose End Sprayers - Put 1½ fluid ounces (3½ tablespoons) of product into the sprayer jar for every 1,000 square feet of turf. Fill the sprayer jar with water to the proper level and spray to cover 1,000 square feet of turf. For example, to spray 3,000 square feet of lawns, measure 5 fluid ounces (10 tablespoons) of product into the sprayer jar. Fill the jar with water to the 10 gallon mark and spray evenly to cover 3,000 square feet of lawn.

◆ Safer® Weed-Away (Product Brand Name) contains Safer's (Company Name)'s unique Weed-Marker™ (Colorant brand name) colorant. Treated areas will be marked by a green colorant, making areas sprayed clearly visible. Weed-Marker™ (Colorant brand name) helps avoid overapplication and allows immediate detection of overspray onto desirable plants; if overspray occurs, immediately rinse off exposed plant surface areas with water. The Weed-Marker™ (Colorant brand name) colorant breaks down quickly and will be immediately removed by watering or rains. NOTE: Some staining may occur if Weed-Marker™ (Colorant brand name) comes into contact with clothing or shoes. Shoes should be checked for staining after application so that the colorant will not transfer onto carpets. Remove contaminated clothing and wash clothing before reuse. The Weed-Marker™ (Colorant brand name) colorant can be removed by normal laundering.
