## STOPI READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

#### **PRECAUTIONARY STATEMENTS**

#### Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wear long pants, long-sleeved shirts and shoes when applying this product. Wear goggles when applying this product. In case of contact, wash skin with plenty of soap and water; for eyes, flush eyes with plenty of water and get medical attention. Avoid contamination of food or feedstuffs.

Environmental Hazards: Drift or run-off may adversely affect nontarget plants. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water wher disposing of equipment washwaters or rinsate. Do not apply when weather conditions favor drift from larget area. Do not contaminate domestic or irrigation waters.

#### **DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit others to reenter treated areas until sprays have dried or dusts have settled.

#### STORAGE & DISPOSAL

STORAGE: Keep from freezing. Store in original container in a locked storage area inaccessible to children. Do not store near food or feedstuffs.

PRODUCT DISPOSAL:Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.

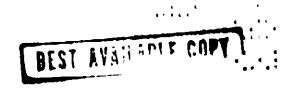

OTHER USE PRECAUTI. NS: Do not allow spray to drift to vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result. Do not spray where grass is emerging from dormancy. Do not apply to newly seeded lawn grasses until well established. Seed can be safely sown 3 to 4 weeks after application. Do not use on carpetgrass, dichondra, or on lawns or turf where desirable clovers are present. Do not spray roots of trees and ornamentals. Do not exceed specified dosages. Be particularly careful within driptine of trees. This product may be injurious to St. Augustinegrass, bentgrass, and Centipedegrass under conditions of high temperature and moisture. Under these conditions, or in cases of accidental overdose, some slight discoloration of the St. Augustinegrass may occur.

20-0-0 GUARANTEED ANALYSIS

#### (OPTION 1 OR 2 TO BE USED DEPENDING ON THE SUBREGISTRATION)

#### **OPTION 1**

A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 square feet each growing season. When applied as directed, this product supplies 0.19 pounds of nitrogen per 1,000 square feet with each application. Use this product in conjunction with an additional fertilization program to provide at least 1 pound of nitrogen per 1,000 square feet each growing season. Consult your local Agricultural Extension Agent for the proper amount of nitrogen to be applied in your area.

#### **OPTION 2**

TRIMEC® M 907 LIQUID WEED AND FEED should be supplemented by Liquid Lawn Fertilizer every 3 weeks from March through September (or April through October depending upon the growing season in your area). Please consult your local extension office concerning a regular fertilizer program.

WHERE TO USE: TRIMEC® M907 LIQUID WEED AND FEED is especially formulated for sensitive southern grasses - St. Augustine, Bentgrass, Bahia, Bermuda and Centipede grasses, but can also be used on Bluegrass, Fescue, and other northern grasses in lawns, vacant lots, playgrounds and other similar areas where broadleaf weeds are present. This product is especially effective on all hard-to-kill weeds such as Poison Ivy, Poison Oak, Sheep sorrel and Spurge. TRIMEC M 907 LIQUID WEED AND FEED also controls the easy-to-kill weeds such as Chickweed, Clover, Dandelion, Knotweed, and Plantains. In addition, TRIMEC M907 LIQUID WEED AND FEED also feeds your lawn with a 20% nitrogen. For best results, spraying should be done when weeds are young and tender. Older weeds are harder to kill.

#### WHEN TO USE:

- 1. Spray at any time during the growing season when weeds are active growing.
- On new lawns, wait until the grass has reached a height of 2 inches before making an overall spray treatment. Wait 3 weeks before putting new grass seed or stolons down in the bare spots.
- 3. Poor weed control may result if spray is applied during drought or just before rain.
- 4. For best results, mow 1 to 2 days before treating.
- 5. Do not water lawn within 24 hours after treatment.

HOW TO USE: Shake well before using.

# (One of the following will be used depending on the hose-end applicator used). OPTION (A)

#### INSTRUCTIONS:

- 1. Connect spray nozzle to garden hose.
- 2. Shake contents of bottle well,
- 3. Remove sa ety cap.
- 4. Attach tube to nozzle applicator.
- 5. Attach bottle to open end of spray nozzle. Turn bottle counter-clockwise until threads mesh. Then turn bottle clockwise until tightly closed.
- 6. Turn on water; place finger over hole on right side of nozzle and proper ratio will automatic, lly be dispersed. Spray directly over area requiring application evenly and uniformly. (Check handy measuring guide to see how much of this liquid has been used.)

#### OPTION (B)

Connect spray nozzle to garden hose; remove safety cap from container; attach tube to applicator and insert tube section. Attach container to end of nozzle.

Turn on water; place finger over hole on right side of nozzle and proper ratio will automatically be dispersed. Spray directly over area requiring application evenly and uniformly. (Check handy measuring guide to see how much liquid has been used.)

#### OPTION (C)

- 1. Attach garden hose to connector on dispenser.
- 2. Insert screwdriver into slot in orange lock ring and twist, snapping lock ring in two.
- 3. Remove both parts of separated lock ring.
- 4. Turn arrow on activator switch to OFF position.
- 5. Push activator switch securely down against top of sprayer, which will pierce the safety seal inside the dispenser.
- 6. To begin spraying, turn on water and then move activator switch to the ON position.
- 7. To stop dispensing the product, turn off water.

#### OPTION (D)

- 1. Attach spray nozzle to garden hose. Turn nozzle clockwise to firmly attach it to hose.
- 2. Remove cap from bottle (directions on cap) and screw bottle into spray nozzle.
- 3. Turn the ON/OFF switch on top of the spray nozzle counter-clockwise to the OFF position. Then turn on the water at the faucet.
- 4. To begin spraying, turn the sprayer nozzle switch clockwise to the ON position. The water automatically mixes with the product. Walk at a steady pace spraying in a side to side arc, slightly overlapping treated areas. Refer to graduated scale on side of container to guide coverage.
- 5. To stop spraying, turn the sprayer nozzle switch counter-clockwise to the OFF position and turn off water at the faucet.

#### OPTION (E)

This gallon package is intended as a refill for the one-half gallon hose-end sprayer applicator/container of TRIMEC® M 907 LIQUID WEED & FEED. However, this product may be used in any hose-end sprayer in which herbicides have been used.

Add TRIMEC® M 907 LIQUID WEED & FEED to the hose-end sprayer jar. DO NOT ADD WATER TO THE JAR. One-half gallon covers 5,000 square feet. One gallon covers up to 10,000 square feet.
