**PRODUCT DISPOSAL:** Securely wrap bag in several layers of newspaper and discard in trash.

**CONTAINER DISPOSAL:** Do not reuse bag. Discard in trash.

## **- INSTRUCTIONS -**

TRIMEC® 973 Weed & Feed controls a wide range of lawn weeds, including dandelion, chickweed, knotweed, plantains, henbit, spurge and many others commonly found in home lawns. In addition, a 12-4-8 fertilizer provides a portion of the plant food needed for a normal season's growth. A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 square feet each growing season. When applied as directed this product supplies 0.48 pounds of nitrogen per 1,000 square feet with each application. Use this product in conjunction with an additional fertilization program to provide at least 1 pound of nitrogen per 1,000 square feet each growing season. Consult your local Agricultural Extension agent for the proper amount of nitrogen to be applied in your area.

Retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. A second application may be made in approximately 30 days. Do not use on dichondra, centipedegrass, or St. Augustinegrass.

## **- WHERE TO USE -**

TRIMEC® 973 Weed and Feed may be applied to residential yards, lawns, turf, playgrounds, vacant lots, and other areas associated with households. Cool season turfgrass species include Kentucky bluegrass, bentgrass, fine fescues, tall fescue and perennial ryegrass. Warm season turfgrass species include zoysiagrass. Do not apply to St. Augustinegrass, centipedegrass, or dichondra.

## **- WHEN TO USE -**

TRIMEC® 973 Weed and Feed can be applied during the spring or fall when weeds are actively growing. Two applications with a 30 day interval may be required. For the best results, follow these mowing and irrigation suggestions.

1. Mow lawn to normal height 1 to 3 days before application.
2. Water the lawn thoroughly at least 1 day before application to maintain the soil moisture until the next irrigation or rainfall and to ensure active weed growth.
3. Apply when weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto non-target plants.
4. Water the lawn thoroughly at 1 to 2 days after application unless rainfall has occurred. Do not water the lawn for at least 24 hours after application.

- HOW MUCH TO USE -

Apply 3.7 to 4.0 pounds of TRIMEC® 973 Weed and Feed per 1,000 square feet with a drop spreader, hopper spreader, bag spreader, or other granular spreaders. Do not exceed the specified application rates for any turf species.

The maximum application rate to turf is 1.0 pounds 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

Calibrate the spreader accurately. For an 18 pound bag, apply 1.0 pound of TRIMEC® 973 Weed and Feed per 270 square feet. For a 20 pound bag, apply 1.0 pound of TRIMEC® 973 Weed and Feed per 250 square feet.

The spreader settings shown below are approximate.

-USE PRECAUTIONS -

Do not use this product where desirable clovers are present or allow the material to "wind drift" onto flowers, vegetables or ornamental shrubbery. Do not apply in areas underlaid by roots of desirable trees or shrubs. Apply when the air is calm. Do not apply to newly seeded lawns. During application, close spreader openings when turning.
