WHEN TO USE

The best control of weeds in established turf will be obtained from spring or early fall applications when weeds are actively growing. However, this product is effective anytime during the growing season after full green-up in the spring.

Schedule the application to match the conditions of adequate soil moisture and air temperatures of 60° to 90°F.

Do not apply this product when turfgrass is under stress from drought, insects, or high temperatures (above 90°F). Avoid applications to St. Augustinegrass when the air temperature is greater than 90°F with high relative humidity.

APPLICATION SUGGESTIONS

1. Delay mowing 3 to 4 days before and after the application of this product.
2. Do not apply this product immediately before rainfall. Do not irrigate or water the turfgrass within 24 hours after application.
3. Do not apply this product to carpetgrass, dichondra, flowers, ornamentals, or lawns containing desirable clovers.
4. Additional applications may be required for some weed species. If necessary, repeat the application at 14 to 21 days after the first application or when regrowth of the weed species is noted.

HOW TO USE:

For Containers with Triggers Sprayers: Trimec® M915 Spot Weeder is ready-to-use and is applied directly from the container fitted with the trigger sprayer. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Excessive spraying can injure some lawns. Floratam® St. Augustinegrass may be injured.

For Refill Containers: Trimec® M915 Spot Weeder is ready-to-use and is applied directly from the container. Remove the cap from the container and attach the trigger sprayer. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Excessive spraying can injure some lawns. Floratam® St. Augustinegrass may be injured.
