#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not reenter or permit others to reenter treated area until sprays have dried or dusts have settled.

#### STORAGE AND DISPOSAL

**STORAGE:** Store in original container and keep any bags containing unused product in a locked storage area inaccessible to children and domestic animals. Do not store near food or feedstuffs.

PESTICIDE DISPOSAL: Securely wrap bag in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

#### WHERE TO USE:

EH 1154 Weed and Feed is a Trimec<sup>®</sup> brand herbicide containing fertilizer, MCPA, mecoprop, and dicamba. This granular weed and feed provides a balanced supply of plant nutrients and controls a broad spectrum of broadleaf weeds in turfgrass. Supplemental nitrogen, phosphorous, and potash should be applied according to soil tests or State Extension Service recommendations.

EH 1154 Weed and Feed controls broadleaf weeds commonly found in cool season and warm season turfgrass established in residential/domestic areas. Established turf of bermudagrass, zoysiagrass, St. Augustinegrass, and centipedegrass may be treated. Also, Kentucky bluegrass, fescues, and perennial ryegrass may be treated. Residential/domestic areas include turfgrass established around residences, apartment complexes, condominiums, vacant lots, or areas associated with households.

Do not apply this product to bentgrass, carpetgrass, dichondra, ornamentals, or lawns containing desirable clovers.

#### WHEN TO USE:

The maximum control of weeds will be obtained from spring or fall applications when the weeds are actively growing.

Dandelion, chickweed, plantain, and henbit are controlled with EH 1154 Weed and Feed. A partial list of susceptible weeds is shown below:

Bedstraw	Dandelion	Knotweed	Purslane
Black medic	Dock	Lambsquarters	Ragweed
Burdock	Ground ivy	Peppergrass	Sheep sorrel
Chicory	Healall	Pigweed	Shepherdspurse
Chickweed	Henbit	Plantain	Thistle
Clover			

#### **APPLICATION INSTRUCTIONS:**

- Spring and fall applications are recommended for the best control. However, EH 1154 Weed and Feed can be applied any time broadleaf weeds are present and actively growing. Treatments of newly established warm season turfgrass should be delayed until 3 to 4 weeks after the sodding, sprigging or plugging operations. Application of this product to newly seeded areas of cool season grasses should be delayed until the third mowing.
- 2. Mow the turfgrass 2 to 3 days before application.
- 3. Water the turfgrass thoroughly ( ½ inch) at least 1 to 2 days before application.
- 4. It is recommended that this product be applied when plant leaves are moist by dew in the early morning or just <u>after</u> watering the lawn. Herbicide granules retained in water droplets on the leaves are readily absorbed. So, schedule applications in the morning when dew is present. Or, sprinkle or irrigate lightly (1/2 inch) before application to provide maximum control.
- 5. Do not irrigate or water the turfgrass within 24 hours after application.

#### HOW MUCH TO APPLY:

For bermudagrass, zoysiagrass, St. Augustinegrass and centipedegrass: Apply 4.0 pounds of product per 1,000 square feet of turfgrass. A second or follow-up application may be required for dense infestations of weeds or for adverse seasonal conditions. If needed, the second application of 4.0 pounds of product per 1,000 square feet should be used 30 days after the first application.

For Kentucky bluegrass, fescues, and perennial ryegrass: Apply 4.0 pounds of product per 1,000 square feet of turfgrass. A second or follow-up application may be required for dense infestations of weeds or for adverse seasonal conditions. If needed, the second application of 4.0 pounds of product per 1,000 square feet should be used 30 days after the first application.

A uniform broadcast distribution of product on the treated area is essential. Do not exceed the specified application rate for any area; and use care in the application of this product within the dripline of trees, shrubs, and other ornamentals.

Drop spreaders and rotary spreaders should be calibrated for uniform applications of this product. Refer to the rate table for the appropriate bag sizes and the area to be treated.

Note to Supplemental Registrants: Select the appropriate bag size and present only the information provided for that bag size on your product labeling. Also, equipment settings of drop spreaders, rotary spreaders, and other granular applicators may be presented on the container labels.
