**WHERE TO USE:**

EH1335 Herbicide is intended for residential and ornamental lawns with applications by homeowners only. This product contains four proven herbicides that are effective on hard-to-kill grass and broadleaf weeds. EH1335 Herbicide is recommended for sparse weed infestations and for follow-up treatments of broadcast herbicide applications. This ready-to-use herbicide is intended for spot treatments only. Weeds that have not emerged at the time of application will not be controlled.

EH1335 Herbicide controls a wide range of broadleaf weeds including dandelion, spurge, oxalis, crabgrass, dallisgrass, and yellow nutsedge in bermudagrass, Kentucky bluegrass, tall fescue, and zoysiagrass lawns. A partial list of weeds controlled is shown below.

**HOW TO USE:**

**For Containers with Triggers Sprayers:** EH1335 Herbicide is ready-to-use and is applied directly from the container fitted with the trigger sprayer. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Usually, two (2) pumps of this trigger sprayer will provide adequate coverage of individual weeds. Excessive spraying can injure some lawns.

**For Refill Containers:** EH1335 Herbicide is ready-to-use and is applied directly from the container. Remove the cap from the container and attach the trigger sprayer. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Excessive spraying can injure some lawns.

**USE PRECAUTIONS:**

- ◆ Do not use a hose end sprayer.
- ◆ Avoid drift of spray mist onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants.
- ◆ Do not use this product on St. Augustinegrass, centipedegrass, carpetgrass, creeping fescue, dichondra, nor on lawns with desirable clovers.
- ◆ Keep children and domestic animals off treated area until this material has been watered into the soil or the grass has dried.
- ◆ Do not apply when grass is emerging from dormancy.

**WHEN TO APPLY:**

Apply when weeds are young and actively growing for the best results. Schedule the application to match the conditions of adequate soil moisture and these air temperatures. For Kentucky bluegrass and tall fescue, apply this product when air temperatures are between 70°F and 80°F. For bermudagrass and zoysiagrass, apply this product when air temperatures are between 70°F and 90°F.

Applications made when air temperatures exceed these conditions may result in injury to the lawn. Temporary discoloration may occur with the use of this product.

Weed regrowth may occur because of the growth from stems and rhizomes, environmental conditions, or misapplication. Also, weeds can germinate from seed and emerge throughout the season. Two or more applications at 10 - 14 day intervals may be required.

Weed control may be reduced when applications are made during periods of inadequate soil moisture. If the soil is dry, then water thoroughly 24 hours before application. Do not water lawns for 24 hours after application.

Newly seeded lawns may be treated after the fourth mowing. Seed can be sown 3 to 4 weeks after application.
