PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if absorbed through the skin. Avoid contact with skin, eyes, or clothing. Harmful if swallowed. When using this product, wear long-sleeved shirt, long pants, socks, shoes, and chemical resistant gloves.

Personal Hygiene Statements:

After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.

Engineering Control Statements:

Containers over 1 gallon and less than 5 gallons: Persons engaged in open pouring of this product must also wear coveralls or a chemical resistant apron.

Containers of 5 gallons or more: Do not open-pour from this container. A mechanical system (such as probe and pump or spigot) must be used for transferring the contents of this container. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal.

ENVIRONMENTAL HAZARDS:

Carfentrazone-ethyl is very toxic to algae and moderately toxic to fish. This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water.

Do not contaminate water when disposing of equipment washwater. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources.

Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D and MCPP-p have been associated with mixing, loading and disposal sites. Caution should be exercised when handling 2,4-D and MCPP-p pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

PRODUCT DESCRIPTION:

This Trimec[®] product is a combination of four proven weed killers: 2,4-D, mecoprop-p, dicamba and carfentrazone-ethyl. Postemergent applications of this product control a wide range of broadleaf lawn weeds in residential lawns including dandelion, chickweed, spurge, pennywort (dollarweed), knotweed, plantain, and clover.

This product offers these advantages:

- Rapid and effective weed control for common and troublesome weed species in turfgrass
- Superior cool weather performance.
- Fast acting with evidence of injury within hours. Generally, the injury symptoms can be noticed within hours of the application and plant death can occur within 7-14 days.

WHERE TO USE:

This product is intended for use on most ornamental lawns including:

Cool Season Turfgrass	Warm Season Turfgrass
Kentucky bluegrass	Common bermudagrass
Perennial ryegrass	Hybrid bermudagrass
Tall fescue	Bahiagrass
Red or fine leaf fescues	Zoysiagrass
Colonial bentgrass	Buffalograss
Mixtures of cool season species	St. Augustinegrass
	Centipedegrass

Turfgrass tolerance:

The turfgrass tolerance to Speed-Zone[®] St. Augustine Residential may vary and temporary turfgrass yellowing may occur on St. Augustinegrass and certain varieties (F1) hybrids of hybrid bermudagrass.

Speed-Zone St. Augustine Residential may injure certain turfgrass species. To reduce risk of lawn injury, avoid spraying drought stressed lawns or when temperatures are above 90°F.

Prohibitions:

- Do not use this product on carpetgrass, dichondra or lawns containing desirable clovers.
- Do not apply this product to St. Augustinegrass during spring green-up which is the transition period between dormancy and active growth.
- Do not spray roots of trees and ornamentals.
- Do not allow spray to drift onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result.
- Do not exceed specified dosages for any area. Be particularly careful within dieline of trees and other ornamental species.

WHEN TO APPLY:

Spray when broadleaf weeds are young and actively growing for best results. Speed-Zone St. Augustine Residential may be applied in the spring, summer, or fall. Spring and fall treatments under adequate soil moisture conditions are preferred to the summer treatments. Generally, summer broadcast applications to older, drought stressed weeds are less effective.

Broadcast (entire areas) applications or follow-up applications at 2-6 week intervals are recommended for more mature weeds, for dense infestations, and for adverse environmental conditions.

Spot treatments during the summer may be appropriate for sparse infestations, or as a follow-up treatment, or any time broadleaf weeds are susceptible.

CULTURAL TIPS FOR IMPROVED CONTROL:

Irrigation:

- Do not apply this product immediately before rainfall or irrigation. Rain or watering within 4 hours after treatment may reduce effectiveness.

Mowing:

- Delay mowing 1 to 2 days before and after the application of this product.

Reseeding Interval:

- Treated areas may be reseeded 2 weeks after application.

THREE EASY STEPS TO MIX AND APPLY:

1. Determine (Measure) the lawn area to be sprayed. Calculate square feet by multiplying length by width. The application rate for this product is presented as fl. oz. (tablespoons) per 1,000 sq. ft. of lawn.
2. Use hand-operated sprayers (backpack sprayers, compression sprayers, knapsack sprayers or tank type) or hose end sprayers. Carefully measure and mix the proper amount of product with water. See below for instructions for the various types of sprayers.
3. Spray evenly over the lawn.

HOW MUCH TO USE:

I. BROADCAST TREATMENTS FOR COOL SEASON TURFGRASS:

Use rates of Speed-Zone St. Augustine Residential on cool season turfgrass as broadcast treatments are presented in Table 1.

HOW TO APPLY:

FOR ORTHO HOSE-END SPRAYERS FOR COOL SEASON TURFGRASS

• **For Ortho® Dial'N Spray Hose-End Sprayer:** Measure 2.0 fl. oz. (4 Tbs.) into sprayer jar. Do not add water. Set dial on 1 oz. and spray uniformly on 1,000 sq. ft. of lawn.

• **For Ortho® Plant & Weed Sprayette® Hose-End Sprayer:** Measure 2.0 fl. oz. (4 Tbs.) into sprayer jar. Fill with water to the 5 gallon mark and spray to cover 1,000 sq. ft.

• **For Gilmour® 20-Gallon Lawn Sprayer, Model 390B, Sprayer Jar with 32 fl. oz. and Dilution Rate of 80:1:**

• **For 1.5 fl. oz. of product per 1,000 sq. ft.:** Measure 10 fl. oz. of product into sprayer jar. Add water or fill with water to the 32 fl. oz. line of the sprayer jar. Spray entire contents uniformly on 6,700 sq. ft. of lawn.

• **For 2.0 fl. oz. of product per 1,000 sq. ft.:** Measure 13.3 fl. oz. of product into sprayer jar. Add water or fill with water to the 32 fl. oz. line of the sprayer jar. Spray entire contents uniformly on 6,700 sq. ft. of lawn.

• **For Gilmour® Metering Dial Insecticide & Fertilizer Sprayer:** This sprayer can be set to meter tablespoons per gallon of water or can be set to teaspoons per gallon of water by using the converting orifice in the top of the mixing head.

• **For 1.5 fl. oz. of product per 1,000 sq. ft.:** Turn the metering dial until the desired setting number is next to the setting arrows on the side of the mixing head. Set the dial at 1 tablespoon per gallon or 3 teaspoons per gallon. Add herbicide to the sprayer bottle. Insert siphon tube into the base of the sprayer head. Attach water hose to sprayer. By squeezing the handle, you will be automatically spraying the proper spray concentration.

• **For 2.0 fl. oz. of product per 1,000 sq. ft.:** Turn the metering dial until the desired setting number is next to the setting arrows on the side of the mixing head. Set the dial at 1 tablespoon per gallon or 4 teaspoons per gallon. Add herbicide to the sprayer bottle. Insert siphon tube into the base of the sprayer head. Attach water hose to sprayer. By squeezing the handle, you will be automatically spraying the proper spray concentration.

The maximum application rate to turf is 0.5 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

II. SPOT TREATMENTS FOR COOL SEASON TURFGRASS.

HAND OPERATED SPRAYERS:

For cool season turfgrass, mix 1.5-2.0 fl. oz. of Speed-Zone St. Augustine Residential per 1.0 gallon of water for treatment of approximately 1,000 sq. ft. of turfgrass. Apply any time the emerged broadleaf weeds are susceptible. Spray the target weeds thoroughly and wet the entire leaf surface of the undesirable plants.

Spray volume, gals. of water	Fluid ounces (fl. oz.) of product	Tablespoons (tbs.) of product	Area to be treated, sq. ft.
1 gallon	1.5-2.0 fl. oz.	3.0- 4.0 tbs.	1,000 sq. ft.
2 gallons	3.0-4.0 fl. oz.	6.0- 8.0 tbs.	2,000 sq. ft.
3 gallons	4.5-6.0 fl. oz.	9.0-12.0 tbs.	3,000 sq. ft.

Equal measures: 1.0 fl. oz. = 2 tablespoons.

Use rates of Speed-Zone St. Augustine Residential on cool season turfgrass as broadcast treatments are presented in Table 2.

TABLE 2. RATE RECOMMENDATIONS FOR WARM SEASON TURFGRASS.
