Subject: Notification per PRN 98-10 – Add optional sprayer instructions
Product Name: EH 1404 Herbicide
EPA Registration Number: 2217-865
Application Date: April 15, 2019
Decision Number: 551458

Dear Mr. Smith:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, please contact Lydia Crawford by phone at 703-347-0622, or via email at Crawford.Lydia@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Mindy Ondish".

PRODUCT FACTS:

EH 1404 Herbicide contains four active ingredients including carfentrazone-ethyl that broaden the spectrum of weed control. EH 1404 Herbicide offers these advantages:

- Excellent postemergent activity with proven performance for broadleaf weed control in turfgrass.
- Superior cool weather performance.
- Rapid and effective weed control for common and troublesome weed species in turfgrass, e.g. spurge, pennywort (dollarweed), dandelion, and white clover.
- Injury to weeds can be noticed within hours of the application and plant death can occur within 7 to 14 days.

WHERE TO USE:

On Lawns: Use to spot treat broadleaf weeds commonly found in cool season and warm season grasses such as: Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Mixtures of cool season species, Common bermudagrass, Hybrid bermudagrass, St. Augustinegrass (excluding 'Floritam'), Zoysiagrass

WHEN TO APPLY:

For best results, treat weeds in the spring and the fall when weeds are actively growing. However, this product is effective any time during the growing season.

- Do not apply when air temperatures are above 85°F as lawn injury can occur.
- Hard-to-kill weeds may require a repeat application in 3 weeks.
- Do not water lawn within 12 hours of application. If rainfall occurs within 12 hours after application, retreatment may be necessary.
- Do not apply to newly seeded lawns until after the second mowing.
- Delay application to newly sodded, plugged, or sprigged lawns until new grass has been mowed four times.
- Treated areas may be reseeded 2 weeks after application.
- Applications to dormant bermudagrass, zoysiagrass, and St. Augustinegrass may be used to control actively growing broadleaf weeds.

HOW TO USE:

[For Containers with Trigger Sprayers:] EH 1404 Herbicide is ready-to-use and is applied directly from the container fitted with the trigger sprayer. Shake the container well. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Apply to the point of runoff only. Excessive spraying can injure lawns.

[For Refill Containers:] EH 1404 Herbicide is ready-to-use and is applied directly from the container. Remove the cap and attach the trigger sprayer. Direct the spray to the target weeds to provide uniform coverage of the upper leaf surfaces. Apply to the point of runoff only. Excessive spraying can injure lawns.
