For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. ~~May cause staining (darkening) of asphalt surfaces and shingles.~~ **Remove protective cap.** Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill **wasps, hornets, yellow jackets** and **bees** under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1—2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter such as plumbing, faucets, etc., and cracks or crevices in foundation, as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. ~~Avoid spraying vegetation directly.~~ Do not spray vegetation directly to prevent damage to foliage. If spray accidentally contacts foliage, immediately wash with water. This product may discolor exterior surfaces of building, structures, and painted surfaces and may cause staining (darkening) of asphalt surfaces and shingles.
