Subject: Revised Disposal Instructions per PR Notice 2007-4; Revisions per Agency Letter

of September 4, 2008

EH-1426 Herbicide EPA Reg. No. 2217-885

Application, Dated May 13, 2010

Dear Dr. Kunstman:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 for the subject product.

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label changes requested fall within the scope of the PR Notice. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on <u>nonrefillable</u> containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please call me directly at (703) 305-1243 or Susan Stanton of my staff at (703) 305-5218.

Sincerely

Kathryn Montague, Product Manager 23

Dear Ms Montague:

SUBJECT: Labeling notification in response to Pesticide Registration Notice (PRN) 2007-4, Labeling Revisions Required by the Final Rule "Pesticide Management and Disposal: Standards for Pesticide Containers and Containment.

EH-1426 Herbicide (EPA Reg. No. 2217-885)

I. Your comments for labeling revisions on September 4, 2008:

We have incorporated or merged the revisions for the draft labeling listed in the Agency's letter into the current document.

Deficiency 1: Based on toxicity ranking per the acute toxicity review, the First Aid statements should be placed with the "If Swallowed" statement immediately before the "If in Eyes" statement.

Deficiency 2: Delete the text "except as noted on appropriate labels" from the Environmental Hazards section of the label.

Response: The revised labeling was corrected according to your comments. [Page 2].

Deficiency 3: Under the Limitations on 2,4-D and Dicamba for broadleaf control on residential turfgrass section, (due to the presence of dicamba in the formulation) revise the text "The maximum number of broadcast applications is limited to 2 per year ... " to read "The maximum number of applications is limited to 2 per year ... "

Response: The revised labeling was corrected according to your comments. [Page 4].

II. Labeling notification per Pesticide Registration Notice (PRN) 2007-4:

We ask to revise the disposal instructions and to adopt the exact language of Pesticide Registration Notice (PRN) 2007-4, Labeling Revisions Required by the Final Rule "Pesticide Management and Disposal: Standards for Pesticide Containers and Containment."

Please refer to page 8 of the draft labeling.

Certification: This notification is consistent with the guidance of PR Notice 2007-4 and the requirements of EPA's regulations at 40 CFR 156.10, 156.140, 156.144, 156.146, and 156.156. No other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to the EPA. I further understand that if this amended labeling is not consistent with the terms of 40 CFR 156.10, 156.140, 156.144, 156.146, and 156.156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under Section 12 and 14 of FIFRA.

Limitations on 2,4-D and Dicamba for broadleaf control on residential turfgrass

The maximum application rate is 5.0 fl.oz. of product per 1,000 sq.ft. per application [0.88 lb 2,4-D ae and 0.10 lb dicamba ae per acre per application]. The maximum number of applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 10.0 fl.oz. of product per 1,000 sq.ft. [1.77 lb 2,4-D ae and 0.20 lb dicamba ae per acre].

HOW MUCH TO USE:

See the following table for calculating the correct amount of product to use for the area to be treated.

I. SPOT TREATMENT

To treat small areas or individual weeds use a pressure sprayer for better control. Mix the indicated amount of product listed below with 1 gallon of water for each 500 sq.ft. to be treated. Shake well before spraying. Spray the target weeds thoroughly. Nozzle adjustments may be necessary to deliver small spray droplets of the target weeds for uniform coverage.

Amount of product to be diluted in one (1.0) gallon water required to treat 500 sq. ft. of lawn with pressure sprayers.			
Turfgrass	Amount of Product fl.oz. (Tbsp.)	Approximate Treated Area	
Kentucky bluegrass, Fescue spp., Perennial ryegrass, Zoysiagrass, Bermudagrass and Buffalograss	2.5 fl.oz. or 5 Tablespoons (Tbs.)	500 sq.ft.	

II. ENTIRE LAWN TREATMENTS

Three easy steps to mix and apply with hand-operated sprayers:

- 1. Calculate (measure) the total lawn area to be treated. For rectangular areas, multiply the length of the area by the width to obtain total square feet. Prepare enough spray solution to treat the area calculated.
- 2. Prepare the spray mixture according to Table 1. Measure the proper amount of product to treat 1,000 sq. ft. If more or less than 1,000 sq. ft is to be treated, adjust the amount of product against shown in Table 1.
- 3. Shake the spray solution before and during application. Use a spray pattern that gives small droplets without any fine mist.

PRESSURE SPRAYERS [OPTIONAL DIRECTIONS]

Zoysiagrass,	10.0 fl.oz.	2,000 sq.ft.	
Bermudagrass ¹ and Buffalograss	25.0 fl.oz.	5,000 sq.ft.	

Table 1. Amount of product to be diluted in one (1.0) gallon water required to treat 1,000 sq. ft. of lawn with

¹Application to bermudagrass may cause temporary yellowing or discoloration but full recovery can be expected. Do not apply to bermudagrass when daytime temperatures exceed 85° F.

FOR DIAL-IN HOSE END SPRAYERS WITH NO PRE-MIXING [OPTIONAL DIRECTIONS]

- 1. From the Table 2 [chart] below, determine amount of EH-1426 to be applied for each 1,000 sq.ft. of lawn.
- 2. Fill sprayer jar with enough concentrate to cover the total area to be treated. DO NOT add water to the sprayer jar.
- 3. Set dial on sprayer to the "Rate per Gallon" setting shown in Table 2 [chart] below.
- 4. Attach sprayer to garden hose. Extend hose to the farthest area of lawn to be treated and work toward faucet. Apply evenly to lawn.
- 5. Unused product can be returned to the original container when completed.

Turfgrass	Rate per Gallon or Dial settings *	Amount of herbicide applied per 1,000 sq.ft.
Kentucky bluegrass, Fescue spp., Perennial ryegrass, Zoysiagrass and Bermudagrass ¹ and Buffalograss	4 Tablespoons or 12 teaspoons or 2 fl.oz.	5.0 fl.oz.

^{*} This assumes the sprayer delivers approximately 2.5 gallons per 1,000 sq ft sprayed

Example for Kentucky bluegrass: To treat 5,000 sq ft of lawn, measure 25 fl.oz. of product into sprayer jar. Do not add water. **Set dial on 4 Tablespoons [Tbs.] or 12 Teaspoons [tsp.]** and apply uniformly on 5,000 sq.ft. of turfgrass.

- To BEGIN spraying: Attach hose to sprayer. Extend the garden hose to the farthest section of lawn to be treated. Rotate sprayer nozzle tip to direct spray up or down. Turn on water and squeeze trigger or rotate on/off knob to begin.
- **AFTER spraying:** Unused product or concentrate can be poured back into the original container. Except the dial setting and clean the sprayer by rinsing the sprayer jar with water for one minute.

Check the directions you received when you purchased your sprayer for further details on the proper use of your dial sprayer.

FOR CONCENTRATE-PLUS-WATER SPRAYERS OR HOSE-END SPRAYERS WITH PRE-MIXING [OPTIONAL DIRECTIONS]

For sprayers that require the addition of water and concentrate before application:

1. From Table 3, determine the amount of concentrate required to treat the entire lawn. Pour concentrate into sprayer jar to the required "fl.oz." level.

¹ Application to bermudagrass may cause temporary yellowing or discoloration but full recovery can be expected. Do not apply to bermudagrass when daytime temperatures exceed 85° F.

- 2. Add the appropriate amount of water to the "gals." level. Replace sprayer top on jar and shake well before spraying.
- 3. Attach sprayer to hose. Extend hose to the farthest area of lawn to be treated and work toward faucet. Apply evenly to lawn.

Area to be treated, sq.ft.	Kentucky bluegrass, Fescue spp., Perennial ryegrass, Zoysiagrass Bermudagrass¹ and Buffalograss	Gallon mark/level on spraye
1,600 sq.ft.	8 fl.oz.	4 gal
2,400 sq.ft.	12 fl.oz.	6 gal
3,200 sq.ft.	16 fl.oz.	8 gal
4,800 sq.ft.	24 fl.oz.	12 gal

¹Application to bermudagrass may cause temporary yellowing or discoloration but full recovery can be expected. Do not apply to bermudagrass when daytime temperatures exceed 85° F.

Example for Kentucky bluegrass: To treat 4,800 sq.ft. of lawn, pour 24 fl.oz. of product into sprayer jar. Add water to the 12 gallon mark, and apply uniformly on 4,800 sq.ft. of turfgrass.

Check the directions you received when you purchased your sprayer for further details on the proper use of your sprayer.

FOR READY SPRAY NOZZLE (Dial Button) [OPTIONAL DIRECTIONS]

Marketing Phrase: Just connect to your garden hose and spray!

HOSE END SPRAYER INSTRUCTIONS [Dial Button]

- 1. Shake container well before using.
- 2. Connect a garden hose to the Ready-Spray nozzle. Make sure the dial on the nozzle is in the "OFF" position with the [green] safety tab in the valve notch.
- 3. Turn on water at faucet. Extend hose to the farthest area to be treated and work toward the faucet.
- 4. To BEGIN spraying, point nozzle toward lawn
 - a) bend the green safety tab (located at right of [yellow] dial) back and hold.
 - b) using your other hand, QUICKLY turn the dial clockwise until it stops. Water will automatically mix with the product.
- 5. Spray until wet to control weeds. Walk at a steady pace while spraying using an even sweeping motion, slightly overlapping treated areas. One quart will treat up to 6,400 sq.ft. of Southern or Northern grasses.
- 6. For rectangular areas, calculate square feet by multiplying length by width. Refer to sight gauge to guide coverage (example: when bottle is half empty, you should have covered half the area).
- 7. To STOP spraying, QUICKLY turn the dial in the opposite direction of "ON" (counter clockwise) until it stops and the safety tab engages into the notch. Turn water off at faucet. To relieve pressure before removing nozzle from hose, bend the safety tab back and turn dial "ON" until water stops spraying.
- 8. To STORE unused product, make sure the dial is in the "OFF" position with the [green] safety tabin the valve notch.

CULTURAL TIPS AND NOTES:

Adequate moisture and mild environmental conditions enhance the performance of EH-1426 Herbicide. Applications should be made to actively growing weeds. Apply when daytime temperatures are between 40° and 90°F. Avoid applications of this product when turfgrasses are under stress since injury may result.

For newly seeded areas:

 Do not apply within 4 weeks after seedling emergence of Kentucky bluegrass, fine fescue blends and perennial ryegrass. Apply this product to newly seeded grasses when well-established (approximately 6 weeks after seedling emergence) or after the third mowing.

For newly sodded, sprigged, or plugged areas:

• The application of this product to newly sodded, sprigged, or plugged grasses should be delayed until 3 to 4 weeks after the sodding, sprigging, or plugging operations.

Seeding:

• Turf species listed on this label can be seeded into the treated areas at four (4) weeks after the application of this product.

Irrigation:

• Do not apply this product immediately before rainfall or irrigation. For best results, do not irrigate อสาย water the turfgrass within 24 hours after application.

 If dry conditions exist, a scheduled irrigation or watering 24 hours before and 24 hours after application is recommended.

Mowing:

- Delay moving 2 days before and until 2 days after the application of this product. Additional stress
 from low moving heights may increase the possibility of turf injury.
- Clippings from the first three mowings should be left on the treated area. Do not use clippings from the treated areas as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.

PROHIBITIONS:

- Do not treat when air temperatures exceed 90°F as damage to grass may occur.
- Application at rates above specified on this label may cause injury to turfgrass.
- Do not apply this product to food crops (gardens and vegetables), forage crops, or ornamental plants including flowers, trees, shrubs, hedges, woody ornamentals, groundcovers established in landscape plantings and other nontarget plants.
- Do not spray exposed roots of ornamentals and trees.
