## HAND SPRAYER PRODUCT

(Directions & Storage and Disposal)

1. Shake well.
2. Connect trigger sprayer. Unscrew and discard the white cap on the bottle. Insert the hose into the bottle and tighten the cap securely.
3. Prime Sprayer: Turn the sprayer nozzle one-half turn counter-clockwise. Hold the sprayer lower than the bottle and squeeze the trigger several times until it sprays. Adjust the nozzle to coarse spray pattern to minimize wind drift. (graphic)
4. Spray just enough [EH-1428 Herbicide] [product] to lightly cover [broadleaf and grass] weeds. ***Excessive spraying can injure some lawns.*** Do not apply when daytime temperatures are above 85° F as lawn injury can occur. (graphic) Spray only the weeds, not the entire lawn.
5. Weeds will begin wilting and browning overnight.

### USE TIPS

- Some hard-to-kill weeds may require re-treatment. Wait at least 3 weeks between applications — some weeds can take that long to die.
- Rainproof [Rain fast] – rain or watering 8 hours after application will not wash away effectiveness. [If rainfall occurs within 8 hours of application, the product should be reapplied.]
- Do not allow spray to drift onto desirable plants since injury may result.

### STORAGE AND DISPOSAL

**PESTICIDE STORAGE:** Turn the nozzle to "OFF" position and store with sprayer above the level of liquid in container to prevent leakage. Store in original container in an area inaccessible to children and pets.

#### DISPOSAL:

**If empty:** Do not reuse this container. Place in trash or offer for recycling if available.

**If partly filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
