Ì

e. Revise the First Aid heading from "If on skin" to "If on skin or clothing".

- f. The Environmental Hazards section should be revised per PR Notice 2008-1 by replacing the text "Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate." with the appropriate text based on formulation type.
- g. Add the statement "Do not contaminate water, food, or feed by storage and disposal." directly below the Storage and Disposal heading.
- h. Revise the heading from "Container Disposal" to "Pesticide and Container Disposal" and revise the text to read "Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain."
- i. Add the phrase "To the extent consistent with applicable law" directly in front of the warranty statements "The manufacturer neither makes nor intends any express or implied warranties..." and "In no case shall the manufacturer be liable for incidental..."
- j. On pages 4 & 9, remove the word "General" from the heading "General Precautions and Restrictions".
- k. On pages 4 & 9, revise the restriction to read "Do not enter or allow people or pets on treated area until sprays has have dried."
- 1. On pages 5 & 6, revise the sentence to read "Over-application or of rates above those recommended specified on this label can cause turf injury."
- m. Throughout the labeling, revise the maximum application/seasonal rate restrictions by including lb ai/ae per acre information for all 4 active ingredients.
- n. On pages 7 & 13, remove the sentence "A partial list is presented below." since the list is comprehensive and not a partial listing of weeds controlled.
- o. On page 8, revise the sentence to read "Broadcast (entire areas) application or follow-up applications at 2-to-6 4 to 6 week intervals are recommended for more mature weeds..."
- p. On page 9 under Kills Weeds and throughout the claims appendices, ensure that the claims include no more than the number of weeds listed in the Weeds Controlled table.
- q. The following claims must be removed or revised as they are false and misleading:
  - i. "<del>100%</del> root kill"
  - ii. "Total root kill"
  - iii. "Complete [root] [weed] kill"
  - iv. "Special lawn formula"
  - v. "Maximum weed [root] kill"
  - vi. "Kills (broadleaf) weeds roots and all"

Page 3 of 3 EPA Reg. No. 2217-898

١.

- vii. "Kills all major broadleaf lawn weeds including dandelion, chickweed, knotweed, in lawns."
- viii. "Kills all major broadleaf lawn weeds including dandelion, clover, oxalis, chickweed, knotweed, plantain, henbit, spurge and others"
- ix. "Specially formulated for residential use"
- x. "Superior cool weather performance"
- xi. "Maximum weed control"
- r. Remove the word "Now" and "New" from the following claims as this product is older than 6 months and is no longer new:
  - i. "Now for northern and southern lawns"
  - ii. "New formula for northern and southern grasses/lawns"
  - iii. "<del>Now</del> faster acting"
  - iv. "Now faster results"
  - v. "Now fast acting"

The basic Confidential Statement of Formula (CSF) dated August 31, 2007 is acceptable, and will supercede all previously accepted CSFs.

A stamped copy of your label is enclosed for your records. You must submit one (1) copy of the final printed label before you release the product for shipment. Products shipped after twelve (12) months from the date of this notice must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

## Language Common to All Sublabels

# **EH-1442 HERBICIDE**

# EPA Reg. No. 2217-898

ACTIVE INGREDIENT:	~*
2,4-D, 2-ethylhexyl ester	7.31%
Mecoprop-p acid	1.85%
Dicamba acid	
Carfentrazone-ethyl	0.37%
INERT INGREDIENTS:	90.01%
TOTAL	100.00%

#### THIS PRODUCT CONTAINS:

0.35 lbs. 2,4-dichlorophenoxyacetic acid equivalent per gallon or 4.85%. Isomer Specific by AOAC Methods.

### **KEEP OUT OF REACH OF CHILDREN**

### CAUTION

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

# PRECAUTIONARY STATEMENTS

#### Hazards to Humans and Domestic Animals

**CAUTION:** Harmful if absorbed through the skin. Avoid contact with skin, eyes, or clothing. Harmful if swallowed. Wear long-sleeved shirt and long pants, shoes plus socks and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

First Aid	
If swallowed:	<ul> <li>Call a poison control center or doctor immediately for treatment advice.</li> <li>Do not induce vomiting unless told to by a poison control center or doctor.</li> <li>Do not give any liquid to the person.</li> <li>Do not give anything by mouth to an unconscious person.</li> </ul>
lf on skin:	<ul> <li>Take off contaminated clothing.</li> <li>Rinse skin immediately with plenty of water for 15 - 20 minutes.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
	ct container or label with you when calling a poison control center or doctor or going for nay also contact 1-877-800-5556 for emergency medical treatment advice.

NOTE TO PHYSICIAN: Contains petroleum distillates - vomiting may cause aspiration pneumonia.

#### ACCEPTED with COMMENTS In EPA Letter Dated:

**NOV 1 0** 2009 Under the Federal Insecticide, Fungicide, and Rodenticide Aot as amended, for the pesticide registered under EPA Reg. No.

#### **Environmental Hazards**

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

# DIRECTIONS FOR USE

#### STORAGE AND DISPOSAL

**PESTICIDE STORAGE:** Store in original container in a locked storage area inaccessible to children or pets. Keep from freezing.

**CONTAINER DISPOSAL:** If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partially filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

## LIMITED WARRANTY AND DISCLAIMER

FOR USE ONLY AS DIRECTED. THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTIAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. If these terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full. The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere.

## SUBLABEL 1

# Directions For Use will be intended for use by homeowners only on lawns and turfgrass in residential sites. This product will be marketed by PBI/Gordon Corporation.

### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read entire label before using this product.

General Precautions and Restrictions:

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Do not enter or allow people or pets on treated area until sprays has dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

#### **PRODUCT DESCRIPTION:**

EH-1442 Herbicide is a combination of four proven weed killers[: 2,4-D, mecoprop-p, dicamba and carfentrazone-ethyl]. Postemergent applications of this product control a wide range of broadleaf lawn weeds in residential lawns including dandelion, chickweed, spurge, pennywort (dollarweed), knotweed, plantain, clover and ground ivy (creeping charlie).

#### WHERE TO USE:

EH-1442 Herbicide can be applied to residential lawns with the following turfgrass species:

Kentucky bluegrass	Common bermudagrass
Perennial ryegrass	Hybrid bermudagrass
Tall fescue	Bahiagrass
Red or fine leaf fescues	Buffalograss
Colonial bentgrass	Zoysiagrass
Mixtures of cool season species	St. Augustinegrass (except 'Floratam')
	Centipedegrass

#### **Turfgrass tolerance:**

When used as directed, EH-1442 Herbicide kills weeds without harming your lawn. Turfgrass species listed on this label have demonstrated tolerance to this product. EH-1442 Herbicide may injure certain turfgrass species, however when applied to diseased turf, in drought conditions or other extreme conditions. To reduce risk of lawn injury, avoid spraying drought stressed lawns or when temperatures are above 90°F.

St. Augustinegrass, centipedegrass and hybrid bermudagrass may vary in their tolerance to this product, and temporary turfgrass yellowing may occur. Use the lowest application rate listed on this labeling for St. Augustinegrass, centipedegrass and hybrid bermudagrass to minimize the potential injury symptoms. Do not apply this product to St. Augustinegrass during spring green-up which is the transition period between dormancy and active growth. Do not use this product on 'Floratam' St. Augustinegrass in Florida.

#### A. Entire Lawn Treatments With READY-TO-USE HOSE-END SPRAYERS:

This product may be packaged as a ready-to-use product with no mixing. The retail plastic container is fitted with a sprayer body that delivers spray droplets at a fixed rate.

Use rates of EH-1442 Herbicide as a broadcast treatment are presented in Table 1.

This retail sprayer bottle will cover the approximate areas described below when this product is applied to established turfgrass. Over-application or rates above those recommended on this label can cause turf injury.

Table 1. Approximate treated areas of turfgrass when applying EH-1442 Herbicide with a ready-to-u	se hose-
end sprayer.	

	Amount	Treated area, sq.ft.		
Species	Of Product to Use	1.0 pt. (16 fl.oz.) sprayer jar or retail container	1.0 qt. (32 fl.oz.) sprayer jar or retail container	
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species Common bermudagrass, bahiagrass and zoysiagrass	3.0 fl.oz./1,000 sq.ft.	5,300 sq.ft	10,600 sq.ft	
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	1.5 fl.oz./1,000 sq.ft.	10,600 sq.ft.	21,300 sq.ft.	

#### Instructions for a ready-to-use hose-end sprayer:

- Determine (Measure) the total lawn area to be sprayed by multiplying the length by the width to obtain total square feet.
- **CONNECT:** Attach [connect] garden hose to spray nozzle. Turn the spray nozzle lever (valve) to the "OFF" position.
- SPRAY: Turn on water at faucet. Extend hose to the farthest area of lawn [turf] to be treated. To begin spraying, turn [rotate] the spray nozzle lever (valve) to the "SPRAY" (ON) position. The herbicide mixes automatically with the water. Walk at a steady pace while spraying evenly and working towards the faucet. Refer to view strip [graduated scale] on side of container to guide coverage. [This xx fl. oz. container will treat up to xxxx sq.ft. of turfgrass.]
- FINISH: To stop spraying, turn [rotate] spray nozzle lever [valve] to the "OFF" position. Turn off water at faucet. To relieve pressure, turn [rotate] spray nozzle to the "SPRAY" (ON) position and point sprayer away from any desirable plants before disconnecting the sprayer nozzle from the garden hose.

#### B. Entire Lawn Treatments With DIAL TYPE HOSE-END SPRAYERS

Three (3) Steps To Mix And Apply:

#### 1. FILL

- Determine (Measure) the total lawn area to be sprayed by multiplying the length by the width to obtain total square feet.
- Add an adequate amount of herbicide to the spray bottle, as indicated on the following chart, to treat the total lawn area. Do not add water to the sprayer jar.

#### 2. SET THE DIAL

Set the dial to the rate per gallon and keep the dial set to this setting while spraying. Dial settings or rates per gallon for this product are presented as follows:

Turfgrass	Application rate	Dial setting or rate per gallon
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species Common bermudagrass, bahiagrass and zoysiagrass	3.0 fl.oz./1,000 sq.ft.	1 oz. or 6 teaspoons or <sup>*</sup> 2 Tablespoons
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	1.5 fl.oz./1,000 sq.ft.	3 teaspoons or 1 Tablespoon

#### 3. SPRAY

)

Insert siphon tube into the base of the sprayer head, attach water hose to sprayer and apply evenly over the lawn. Over-application or rates above those recommended on this label can cause turf injury.

#### Limitations on broadcast applications to residential turfgrass

The maximum application rate is 3.0 fl.oz. of product per 1,000 sq.ft. per application (0.36 lbs 2,4-D ae, 0.14 lb MCPP-p ae, and 0.04 lb dicamba ae per acre per application). The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 6.0 fl.oz. of product per 1,000 sq.ft. (0.73 lbs 2,4-D ae, 0.28 lb MCPP-p ae, and 0.07 lb dicamba ae per acre).

#### **C. SPOT TREATMENTS**

#### HAND OPERATED, PUMP-UP SPRAYERS OR COMPRESSED AIR SPRAYERS:

Mix an adequate amount of product with an appropriate amount of water as indicated on the following table for Spot Treatments to localized areas of weeds. Apply any time the emerged broadleaf weeds are susceptible. Spray the target weeds thoroughly and wet the entire leaf surface of the undesirable plants.

Turfgrass	Spray volume, gals. of water	Amount of product	Area to be treated, sq.ft.
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species Common bermudagrass, bahiagrass and zoysiagrass	1 gallon 2 gallons 3 gallons	1.0 fl.oz. (2 Tbs) 2.0 fl.oz. (4 Tbs) 3.0 fl.oz. (6 Tbs)	330 sq.ft. 660 sq.ft. 1,000 sq.ft.
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	1 gallon 2 gallons 3 gallons	0.5 fl.oz. (1 Tbs) 1.0 fl.oz. (2 Tbs) 1.5 fl.oz. (3 Tbs)	330 sq.ft. 660 sq.ft. 1,000 sq.ft.
Equal measures: 1.0 fl.oz. = 2 tablespoons.	1 tablespoon (Tbs) =	3 teaspoons (tsp)	• ·

#### Limitations on spot treatments:

Spot treatment is defined as a treatment area no greater than 1,000 sq.ft. per acre. The maximum application rate is 3.0 fl.oz. per 1,000 sq.ft. per application (0.14 lbs MCPP-p acid equivalent per acre). The maximum number of spot treatments is limited to 2 per year with a minimum of 30 days between applications.

#### **BROADLEAF WEEDS CONTROLLED:**

EH-1442 Herbicide will control or suppress the following broadleaf weeds. A partial list is presented

#### TIPS FOR BEST RESULTS

)

When to Apply	Spring and fall	Spray when broadleaf weeds are young and actively growing for best results.	
		EH-1442 Herbicide may be applied in the spring, summer or fall. Spring and fall treatments under adequate soil moisture conditions are preferred to the summer treatments. Generally, summer broadcast applications to older, drought stressed weeds are less effective.	
		Broadcast (entire areas) applications or follow-up applications at 2 to 6 week intervals are recommended for more mature weeds, for dense infestations, and for adverse environmental conditions.	
		Spot treatments during the summer may be appropriate for sparse infestations, as a follow-up treatment, or any time broadleaf weeds are susceptible.	
	for established lawns	<ul> <li>Apply when daytime temperatures are below 90°F.</li> </ul>	
	for newly seeded areas	<ul> <li>Apply this product to newly seeded grasses when well-established (approximately 6 weeks after seedling emergence) or after the third mowing.</li> </ul>	
	for newly sodded, sprigged, or plugged areas	<ul> <li>Apply this product 3 to 4 weeks after the sodding, sprigging, or plugging operations.</li> </ul>	
Seeding:		<ul> <li>Treated areas can be reseeded at 2 weeks after the application of this product.</li> </ul>	
Irrigation:	Non-stressed turfgrass	Adequate soil moisture and favorable growing conditions enhance     the performance of this product.	
	Stress from high temperatures, drought, insects or diseases.	• Avoid applications of this product when turfgrasses are under stress since injury may result. If dry conditions exist, schedule irrigations (watering) before and after the application. For best results, delay the irrigation until approximately 24 hours after application of this product.	
Mowing:		<ul> <li>Avoid mowing 1 to 2 days before and after the application of this product.</li> </ul>	
Nontarget plants:		<ul> <li>Do not apply this product to carpetgrass, dichondra, food crops (gardens, fruits and vegetables), forage crops, or ornamental plants including flowers, trees, shrubs, hedges, woody ornamentals, groundcovers established in landscape plantings and other nontarget plants.</li> <li>Do not apply as a fine mist because of potential for injury to desirable plants.</li> <li>Do not use this product on or near desirable plants, including within the drip line of the roots of desirable trees and shrubs, since injury may result.</li> <li>Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do</li> </ul>	
		not apply when windy. To prevent product run-off, do not over water the treated area(s) to the point of runoff or apply when raining or when rain is expected that day. Rinse applicator over lawn area only.	

# SUBLABEL 2

# Directions For Use will be intended for use by homeowners only on lawns and turfgrass in residential sites and marketed by supplemental registrants.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General Precautions and Restrictions:

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Do not enter or allow people or pets on treated area until sprays has dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

#### HOW MUCH TO USE:

#### A. For Tank Sprayers

)

Spot treat broadleaf weeds with this product as they appear. Repeat treatment for hard-to-control weeds in 30 days. Do not exceed specified dosages for any area.

#### For St. Augustinegrass and centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

- Mix 1/2 fluid ounce (1 Tablespoon.) of product per gallon of water to cover 300 square feet of lawn.
- Do not use on 'Floratam' St. Augustinegrass. Do not apply to St. Augustinegrass or centipedegrass emerging from winter dormancy. Temperatures below 45°F within 72 hours of application may cause damage.

# For Kentucky bluegrass, fescues, perennial ryegrass, bahiagrass, common bermudagrass and zoysiagrass:

• Mix 1 fluid ounce (2 Tablespoons) of product per gallon of water to cover 300 square feet.

Equal measures: 1 Tablespoon (Tbs.) = 3 Teaspoons (tsp.) =1/2 fluid ounce (fl.oz.)

#### Limitations on spot treatments:

Spot treatment is defined as a treatment area no greater than 1,000 sq.ft. per acre. The maximum application rate is 3.0 fl.oz. per 1,000 sq.ft. per application (0.14 lbs MCPP-p acid equivalent per acre). The maximum number of spot treatments is limited to 2 per year with a minimum of 30 days between applications.

#### B. For Ortho® Dial-N-Spray® hose-end sprayers THREE EASY STEPS TO MIX AND APPLY

- 1. Measure the lawn area to be sprayed. Calculate square feet by multiplying length by width.
- 2. Carefully mix the proper amount of concentrate with water. See below for directions for the Ortho® Dial-N-Spray® hose-end sprayer below
- 3. Spray evenly over the lawn.

#### Narrative format:

For St. Augustinegrass, centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

• Add 1.5 fl.oz. of product into sprayer jar for each 1,000 sq.ft. of lawn. Do not add water to jar. Set dial to 1 Tablespoon (Tbs) and spray.

For Kentucky bluegrass, fescues, perennial ryegrass, bahiagrass, common bermudagrass and zoysiagrass:

• Add 3 fl.oz. of product into sprayer jar for each 1,000 sq.ft. of lawn. Do not add water to the container jar. Set dial on 1 oz. and spray.

Equal Measures: 1 Tablespoons = 3 Teaspoons (tsp.) = 1/2 fl.oz.

#### Tabular Format [optional]

Sprayer Type	Product To Measure	Area to Treat	Comments
Tank Sprayer	0.5 fl.oz. (1 Tbs.) into 1 gallon of water and spray.	300 sq.ft.	*Do not use on 'Floratam' St. Augustinegrass.
Dial 'N Spray®	1.5 fl.oz. (3 Tbs.) into sprayer jar. DO NOT ADD WATER. Set dial on 1 tablespoon (Tbs.) and spray	1,000 sq.ft.	Do not apply to St. Augustinegrass and centipedegrass emerging from winter dormancy.
Ortho Plant & Weed Sprayette®	1.5 fl.oz. (3 Tbs.) into sprayer jar. DO NOT ADD WATER. Set dial on 1 tablespoon (Tbs.) and spray	1,000 sq.ft.	Applying when temperatures below 45°F within 72 hours of application may cause damage
Tank.Sprayer	1 fl.oz. (2 Tbs.) into 1 gallon of water and spray.	300 sq.ft.	
Dial 'N Spray®	3 fl.oz. (6 Tbs.) into sprayer jar. DO NOT ADD WATER. Set dial on 1 oz. and spray.	1,000 sq.ft.	
Ortho Plant & Weed Sprayette®	3 fl.oz. (6 Tbs.) into sprayer jar. Fill with water to the 5 gallon mark and spray.	1,000 sq.ft.

#### Limitations on broadcast applications to residential turfgrass

The maximum application rate is 3.0 fl.oz. of product per 1,000 sq.ft. per application (0.36 lbs 2,4-D ae, 0.14 lb MCPP-p ae, and 0.04 lb dicamba ae per acre per application). The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 6.0 fl.oz. of product per 1,000 sq.ft. (0.73 lbs 2,4-D ae, 0.28 lb MCPP-p ae, and 0.07 lb dicamba ae per acre).

#### C. Ready-to-use hose-end sprayers THREE EASY STEPS TO MIX AND APPLY

- 1. Measure the lawn area to be sprayed. Calculate square feet by multiplying length by width.
- 2. See below for directions for the ready-to-use hose-end sprayer below.
- 3. Spray evenly over the lawn.

#### AMOUNT TO SPRAY

Use the amount indicated for your type of lawn:

# St. Augustinegrass (except 'Floratam'), centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

(Quart size): This container covers approximately 21,300 square feet. (Pint Size) This container covers approximately 10,600 square feet

#### Bahiagrass, bermudagrass, fescues, Kentucky bluegrass, perennial ryegrass and zoysiagrass:

(Quart size): This container covers approximately 10,600 square feet. (Pint size): This container covers approximately 5,300 square feet.

#### Limitations on broadcast applications to residential turfgrass

The maximum application rate is 3.0 fl.oz. of product per 1,000 sq.ft. per application (0.36 lbs 2,4-D ae, 0.14 lb MCPP-p ae, and 0.04 lb dicamba ae per acre per application). The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 6.0 fl.oz. of product per 1,000 sq.ft. (0.73 lbs 2,4-D ae, 0.28 lb MCPP-p ae, and 0.07 lb dicamba ae per acre).
