EH-1441 Herbicide

ACTIVE INGREDIENTS:	
2,4-D, 2-ethylhexyl ester	5.61%
Mecoprop-p acid	1.42%
Dicamba acid	
Carfentrazone-ethyl	
INERT INGREDIENTS:	
TOTAL	100.00%

THIS PRODUCT CONTAINS: 0.268 lbs. 2,4-dichlorophenoxyacetic acid equivalent per gallon or 3.72%. Isomer Specific by AOAC Methods.

KEEP OUT OF REACH OF CHILDREN

CAUTION

First Aid			
If swallowed:	 Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. 		
lf on skin:	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control center or doctor for treatment advice. 		
Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-800-5556 for emergency medical treatment advice.			
NOTE TO PHYSICIAN: Contains petroleum distillates - vomiting may cause aspiration pneumonia.

READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if absorbed through the skin. Avoid contact with skin, eyes, or clothing. Harmful if swallowed. When using this product, wear long-sleeved shirt, long pants, socks, shoes, and chemical resistant gloves.

Personal Hygiene Statements:

After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.

Engineering Control Statements:

Containers over 1 gallon and less than 5 gallons: Persons engaged in open pouring of this product must also wear coveralls or a chemical resistant apron.

Containers of 5 gallons or more: Do not open-pour from this container. A mechanical system (such as probe and pump or spigot) must be used for transferring the contents of this container. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal.

User Safety Recommendations:

- Uses should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- If pesticide gets on skin, wash immediately with soap and water.
- Users should remove PPE immediately after handling this product.
- Wash the outside of gloves before removing.
- As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS:

This pesticide is toxic to algae, fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark except as noted on appropriate labels. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

Sublabel 1: Directions For Use will be intended for use by homeowners only on lawns and turfgrass in residential sites. This product will be marketed by PBI/Gordon Corporation.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read entire label before using this product.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Do not enter or allow people or pets on treated area until sprays has dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

PRODUCT DESCRIPTION:

EH-1441 Herbicide is a combination of four proven weed killers: 2,4-D, mecoprop-p, dicamba and carfentrazone-ethyl. Postemergent applications of this product control a wide range of broadleaf lawn weeds in residential lawns including dandelion, chickweed, spurge, pennywort (dollarweed), knotweed, plantain, clover and ground ivy (creeping charlie).

WHERE TO USE:

EH-1441 Herbicide can be applied to residential lawns with the following turfgrass species:

Kentucky bluegrass Perennial ryegrass Tall fescue Red or fine leaf fescues Colonial bentgrass Mixtures of cool season species Common bermudagrass Hybrid bermudagrass Bahiagrass Buffalograss Zoysiagrass St. Augustinegrass (except 'Floratam') Centipedegrass 4721

Turfgrass tolerance:

When used as directed, EH-1441 Herbicide kills weeds without harming your lawn. Turfgrass species listed on this label have demonstrated tolerance to this product. EH-1441 Herbicide may injure certain turfgrass species, however when applied to diseased turf, in drought conditions or other extreme conditions. To reduce risk of lawn injury, avoid spraying drought stressed lawns or when temperatures are above 90°F.

St. Augustinegrass, centipedegrass and hybrid bermudagrass may vary in their tolerance to this product, and temporary turfgrass yellowing may occur. Use the lowest application rate listed on this labeling for St. Augustinegrass, centipedegrass and hybrid bermudagrass to minimize the potential injury symptoms. Do not apply this product to St. Augustinegrass during spring green-up which is the transition period between dormancy and active growth. Do not use this product on 'Floratam' St. Augustinegrass in Florida.

A. Entire Lawn Treatments With READY-TO-USE HOSE-END SPRAYERS:

This product may be packaged as a ready-to-use product with no mixing. The retail plastic container is fitted with a sprayer body that delivers spray droplets at a fixed rate.

Use rates of EH-1441 Herbicide as a broadcast treatment are presented in Table 1.

This retail sprayer bottle will cover the approximate areas described below when this product is applied to established turfgrass. Over-application or rates above those recommended on this label can cause turf injury.

5721

Table 1. Approximate treated areas of turfgrass when applying EH-1441 Herbicide with a ready-touse hose-end sprayer.

	Amount	Treated area, sq.ft.	Treated area, sq.ft.
Species	Of Product to Use	1.0 pt. (16 fl.oz.) sprayer jar or retail container	1.0 qt. (32 fl.oz.) sprayer jar or retail container
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species common bermudagrass, bahiagrass and zoysiagrass	4.0 fl. oz. / 1,000 sq.ft.	4,000 sq.ft	8,000 sq. tft
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	2.0 fl. oz. / 1,000 sq.ft.	8,000 sq.ft.	16,000 sqft.

Instructions for a ready-to-use hose-end sprayer:

- Determine (Measure) the *total* lawn area to be sprayed by multiplying the length by the width to obtain *total* square feet.
- **CONNECT:** Attach [connect] garden hose to spray nozzle. Turn the spray nozzle lever (valve) to the "OFF" position.
- SPRAY: Turn on water at faucet. Extend hose to the farthest area of lawn [turf] to be treated. To begin spraying, turn [rotate] the spray nozzle lever (valve) to the "SPRAY" (ON) position. The herbicide mixes automatically with the water. Walk at a steady pace while spraying evenly and working towards the faucet. Refer to view strip [graduated scale] on side of container to guide coverage. [This xx fl. oz. container will treat up to xxxx sq.ft. of turfgrass.]
- FINISH: To stop spraying, turn [rotate] spray nozzle lever [valve] to the "OFF" position. Turn off water at faucet. To relieve pressure, turn [rotate] spray nozzle to the "SPRAY" (ON) position and point sprayer away from any desirable plants before disconnecting the sprayer nozzle from the garden hose.

1. FILL

• Determine (Measure) the *total* lawn area to be sprayed by multiplying the length by the width to obtain *total* square feet.

6721

• Add an adequate amount of herbicide to the spray bottle, as indicated on the following chart, to treat the *total* lawn area. Do not add water to the sprayer jar.

2. SET THE DIAL

Set the dial to the rate per gallon and keep the dial set to this setting while spraying. Dial settings or rates per gallon for this product are presented as follows:

Turfgrass	Application rate	Dial setting or rate per gallon
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species common bermudagrass, bahiagrass and zoysiagrass	4.0 fl. oz. / 1,000 sqft	1½ oz. or 9 teaspoons or 3 Tablespoons
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	2.0 fl. oz. / 1,000 sq.ft.	4 teaspoons

3. SPRAY— Insert siphon tube into the base of the sprayer head, attach water hose to sprayer and apply evenly over the lawn. Over-application or rates above those recommended on this label can cause turf injury. The maximum application rate to turf is 0.4 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year. The maximum seasonal rate is 3 gallons of product per acre excluding spot treatments.

C. SPOT TREATMENTS

HAND OPERATED, PUMP-UP SPRAYERS OR COMPRESSED AIR SPRAYERS:

Mix an adequate amount of product with an appropriate amount of water as indicated on the following table for spot treatments to localized areas of weeds. Apply any time the emerged broadleaf weeds are susceptible. Spray the target weeds thoroughly and wet the entire leaf surface of the undesirable plants.

7 7 21

Turfgrass	Spray volume, gals. of water	Amount of product	Area to be treated, sq.ft.
Kentucky bluegrass, Perennial ryegrass, Tall fescue, Red or fine leaf fescues, Colonial bentgrass, Mixtures of cool season species common bermudagrass, bahiagrass and zoysiagrass	1 gallon 2 gallons 3 gallons	1.5 fl.oz. (3 Tbs) 3.0 fl.oz. (6 Tbs) 4.5 fl oz. (9 Tbs)	330 sq.ft. 660 sq.ft. 1,000 sq.ft.
St. Augustinegrass (except 'Floratam') Centipedegrass and Hybrid bermudagrass	1 gallon 2 gallons 3 gallons	2/3 fl.oz. (1 1/3 Tbs) 1 1/3 fl. oz. (2 2/3 Tbs) 2.0 fl. oz. (4 Tbs)	330 sq.ft. 660 sq.ft. 1,000 sq.ft.

Equal measures:

1.0 fl.oz. = 2 tablespoons.

1 tablespoon (Tbs.) = 3 teaspoons (tsp)

BROADLEAF WEEDS CONTROLLED:

EH-1441 Herbicide will control or suppress the following broadleaf weeds. A partial list is presented below.

TIPS FOR BEST RESULTS

TIPS FOR B	EST RESULTS	
When to Apply	Spring and fall	Spray when broadleaf weeds are young and actively growing for best results.
		EH-1441 Herbicide may be applied in the spring, summer or fall. Spring and fall treatments under adequate soil moisture conditions are preferred to the summer treatments. Generally, summer broadcast applications to older, drought stressed weeds are less effective.
		Broadcast (entire areas) applications or follow-up applications at 2 - 6 week intervals are recommended for more mature weeds, for dense infestations, and for adverse environmental conditions.
		Spot treatments during the summer may be appropriate for sparse infestations, as a follow-up treatment, or any time broadleaf weeds are susceptible.
	for established lawns	 Apply when daytime temperatures are below 90°F.
	for newly seeded areas	 Apply this product to newly seeded grasses when well- established (approximately 6 weeks after seedling emergence) or after the third mowing.
	for newly sodded, sprigged, or plugged areas	 Apply this product 3 to 4 weeks after the sodding, sprigging, or plugging operations.
Seeding:		 Treated areas can be reseeded at 2 weeks after the application of this product.
Irrigation:	Non-stressed turfgrass	 Adequate soil moisture and favorable growing conditions enhance the performance of this product.
	Stress from high temperatures, drought, insects or diseases.	 Avoid applications of this product when turfgrasses are under stress since injury may result. If dry conditions exist, schedule irrigations (watering) before and after the application. For best results, delay the irrigation until approximately 24 hours after application of this product.
Mowing:		 Avoid mowing 1-2 days before and after the application of this product.
Nontarget plants:		• Do not apply this product to carpetgrass, dichondra, food crops (gardens, fruits and vegetables), forage crops, or ornamental plants including flowers, trees, shrubs, hedges, woody ornamentals, groundcovers established in landscape plantings and other nontarget plants.
		 Avoid spraying exposed roots of ornamentals and trees.

10 2 21

STORAGE & DISPOSAL

PESTICIDE STORAGE: Store in original container in a locked storage area inaccessible to children or pets. Keep from freezing.

CONTAINER DISPOSAL:

If empty: Do not reuse this container. Place in trash or offer for recycling if available.

If partially filled: Call your local solid waste agency or toll free number (1-800-CLEANUP) for disposal instructions. Never place unused product down any indoor or outdoor drain.

LIMITED WARRANTY AND DISCLAIMER.

FOR USE ONLY AS DIRECTED. THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTIAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. If these terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full. The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere.

APPENDIX

I. Advertising claims that may be presented on container labeling, advertisements, brochures, and other marketing/sales promotional materials.

- Rainfast in as little as 1 hour
- Rainfast [Rainproof] in 1 hour
- Visible results in just 24 hours
- Clover control in as little as one week
- Proven cool-weather performance
- Consistently fast control on tough weeds like clover, plantain, ground ivy and spurge [various other listed weeds].
- [This product] Smokes weeds, fast
- From the makers of Trimec[®] herbicides.
- For information call XXX-XXX-XXXX [contact <u>www.xxx-xxxx.com</u>]

This product offers these advantages:

- Rapid and effective weed control for common and troublesome weed species in turfgrass
- Superior cool weather performance.
- Fast acting with evidence of injury within hours. Generally, the injury symptoms can be noticed within hours of the application and plant death can occur within 7 - 14 days.
- Kills the weeds, not the lawns
- For a beautiful lawn
- Kills [controls] broadleaf weeds
- [See] Results in 24 hours
- Control you can see in 24 hours
- Use on northern and southern turf
- Use on northern turf
- Use on southern turf
- Guaranteed
- Won't harm your lawn [when used as directed]
- · Kills the hard to control weeds
- Kills over 250 [tough] lawn weeds
- Kills the toughest [lawn] weeds
- Scientifically formulated for lawns
- Special lawn formula
- Maximum weed [root] kill
- Kills weeds, not lawns
- Overnight results
- Treats up to XXXXX sq. ft.

Page 10 of 20

- Just attach to hose and spray
- Attach to hose and spray
- Tough on weeds, easy on lawns
- Easy to use
- Results overnight
- Use with dial type sprayers

TRIMEC[®] is a registered trademark of PBI/Gordon Corporation.

Sublabel 2: Directions For Use will be intended for use by homeowners only on lawns and turfgrass in residential sites and marketed by supplemental registrants.

13 72,

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Do not enter or allow people or pets on treated area until sprays has dried.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

 PRODUCT FACTS: Treats up to 8,000 square feet. Pint Size Treats up to 16,000 square feet. Quart Size Treats up to 64,000 square feet Gallon Size 				
KILLS WEEDS:	Dandelion, clover, chickweed plus over xxx additional broadleaf weeds			
WHERE TO USE:	On lawns			
AMOUNT TO USE:	For bentgrass, hybrid bermudagrass and buffalograss St. Augustinegrass (except 'Floratam') and centipedegrass Use: 2 fluid ounces (4 Tablespoons) / gallon of water / 1,000 square feet For Kentucky bluegrass, fescues, perennial ryegrass, bahiagrass, common bermudagrass and zoysiagrass; Use: 4 fluid ounces (8 Tablespoons) / gallon of water / 1,000 square feet			
S.	Questions, Comments or Medical Information? Call: 1-800-xxx-xxxx • <u>http://www.company name.com</u>			

WHERE TO USE:

EH-1441 Herbicide is intended for use on most ornamental lawns including Kentucky bluegrass, perennial ryegrass, fescues, common bermudagrass, hybrid bermudagrass, bahiagrass, bentgrass, buffalograss, centipedegrass, zoysiagrass, and St. Augustinegrass.

WHEN TO APPLY	 Spray when air is calm to avoid spray drift onto landscape plants as contact with foliage may injure flowers, shrubs, trees, and other desirable plants. Spray when: 				
	o weeds are small and actively growing.				
	 temperature is below 90°F. 				
1	 air is calm to avoid spray drift onto landscape plants as contact with foliage may injure flowers, shrubs, trees, and other desirable plants. 				
1	 Reapplication can be made in 2 to 3 weeks if necessary. 				
j I	 Newly seeded lawn can be sprayed after first mowing. 				
Seeding:	• Treated areas can be reseeded at 2 weeks after the application of this product.				
Irrigation:	 Adequate soil moisture and favorable growing conditions enhance the performance of this product. If soil is dry, water 1 to 2 days before application. Rain or watering more than 1 hour after application should not reduce effectiveness. 				
Mowing:	Avoid mowing 1-2 days before and after the application of this product.				
Nontarget plants:	 Do not apply this product to carpetgrass, dichondra, food crops (gardens, fruits and vegetables), forage crops, or ornamental plants including flowers, trees, shrubs, hedges, woody ornamentals, groundcovers established in landscape plantings and other nontarget plants. Avoid spraying exposed roots of ornamentals and trees. Do not use this product on 'Floratam' St. Augustinegrass, or lawns containing desirable clovers. 				

14 721

HOW MUCH TO USE:

A. For Tank Sprayers

Spot treat broadleaf weeds with this product as they appear. Repeat treatment for hard-to-control weeds in 2 to 3 weeks. Do not exceed specified dosages for any area.

For St. Augustinegrass, centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

- Mix 2/3 fluid ounce (1 1/3 Tablespoon) of product per gallon of water to cover 300 square feet of lawn.
- Do not use on 'Floratam' St. Augustinegrass. Do not apply to St. Augustinegrass or centipedegrass emerging from winter dormancy. Temperatures below 45°F within 72 hours of application may cause damage.

For Kentucky bluegrass, fescues, perennial ryegrass, bahiagrass, common bermudagrass and zoysiagrass:

- Mix 1½ fluid ounce (3 Tablespoons) of product per gallon of water to cover 300 square feet.

Equal measures: 1 Tablespoon (Tbs.) = 3 Teaspoons (tsp.) = ½ fluid ounce (fl. oz.)

B. For Ortho[®] Dial-N-Spray[®] hose-end sprayers

THREE EASY STEPS TO MIX AND APPLY

- 1. Measure the lawn area to be sprayed. Calculate square feet by multiplying length by width.
- Carefully mix the proper amount of concentrate with water. See below for directions for the Ortho[®] Dial-N-Spray[®] hose-end sprayer below

15 2 21

3. Spray evenly over the lawn.

Narrative format:

For St. Augustinegrass, centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

 Add 2.0 fl.oz of product into sprayer jar for each 1,000 sq.ft. of lawn. Do not add water to jar. Set dial to 4 teaspoons (tsp.) and spray.

For Kentucky bluegrass, fescues, perennial ryegrass, bahiagrass, common bermudagrass and zoysiagrass:

 Add 4 fl.oz. of product into sprayer jar for each 1,000 sq.ft. of lawn. Do not add water to the container jar. Set dial on 1½ oz. and spray.

Equal Measures: 1 Tablespoon = 3 Teaspoons (tsp.) = 1/2 fl. oz.

Lawn Grass	Sprayer Type	Product To Measure	Area to Treat	Comments
St. Augustinegrass*, centipedegrass, bentgrass, hybrid	Tank Sprayer	2/3 fl.oz. (1 1/3 Tbs.) into 1 gallon of water and spray.	300 sq.ft.	*Do not use on 'Floratam' St. Augustinegrass.
bermudagrass and buffalograss	Dial 'N Spray®	2 fl.ozs. (4 Tbs.) into sprayer jar. DO NOT ADD WATER. Set dial on 4 teaspoons (tsp.) and spray.	1,000 sq.ft.	Do not apply to St. Augustinegrass and centipedegrass emerging from winter dormancy.
	Ortho Piant & Weed Sprayette®	2 fl.ozs. (4 Tbs.) into sprayer jar. Fill with water to the 5 gallon mark and spray.	1,000 sq.ft.	Applying when temperatures below 45°F within 72 hours of application may cause damage
Kentucky bluegrass, fescues perennial ryegrass,	Tank Sprayer	1½ fl.oz. (3 Tbs.) into 1 gallon of water and spray.	300 sq.ft.	
Common bermudagrass, bahiagrass, and zoysiagrass	Dial 'N Spray	4 fl.ozs. (8 Tbs.) into sprayer jar. DO NOT ADD WATER. Set dial on 1 oz. and spray.	1,000 sq.ft.	
	Ortho Plant & Weed Sprayette	4 fl.ozs. (8 Tbs.) into sprayer jar. Fill with water to the 5 gallon mark and spray.	1,000 sq.ft.	

16 2 21

Equal Measures: 1 Tablespoon = 3 Teaspoons (tsp.) = ½ fl. oz.

The maximum application rate to turf is 0.4 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year. The maximum seasonal rate is 3 gallons of product per acre excluding spot treatments.

Page 15 of 20

17 721

C. Ready-to-use hose-end sprayers

THREE EASY STEPS TO MIX AND APPLY

- 1. Measure the lawn area to be sprayed. Calculate square feet by multiplying length by width.
- 2. See below for directions for the ready-to-use hose-end sprayer below.
- 3. Spray evenly over the lawn.

AMOUNT TO SPRAY

Use the amount indicated for your type of lawn:

St. Augustinegrass (except 'Floratam'), centipedegrass, bentgrass, hybrid bermudagrass and buffalograss:

(Quart size): This container covers approximately 16,000 square feet.

(Pint Size) This container covers approximately 8,000 square feet

Bahiagrass, bermudagrass, fescues, Kentucky bluegrass, perennial ryegrass and zoysiagrass:

(Quart size): This container covers approximately 8,000 square feet.

(Pint size): This container covers approximately 4,000 square feet.

The maximum application rate to turf is 0.4 pound 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year. The maximum seasonal rate is 4 gallons of product per acre excluding spot treatments.

BROADLEAF WEEDS CONTROLLED:

18 721

EH-1441 Herbicide will control or suppress the following broadleaf weeds. A partial list is presented below.
