PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

First Aid	
If in eyes:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information in case of emergency, call toll free 1-877-800-5556.	

Environmental Hazards

This product is toxic to plants. Drift and run-off may be hazardous to plants in water adjacent to treated areas. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinsate. See Directions for Use for additional precautions and requirements.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Application Restrictions

- Do not enter or allow others to enter treated areas until sprays have dried.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.
- Do not use on feed or food crops.

2. Use Information [What It Does]

[Product Name] is a nonselective herbicide which kills most annual and perennial grasses, broadleaf weeds, vines, brush, and trees. The product is absorbed through leaves, stems, and roots and moves throughout the plant. Treated plants stop growing soon after application. [Product name] will also provide residual control for up to 12 months in the treated area. Heavy rainfall will reduce the length of residual control. Heavy clay soils may increase the length of residual control.

3. Use Sites [Where To Use]

[Product name] may be used to control weeds in: [In fencerows. Around domestic dwellings, outdoor buildings, structures and shelters such as dairy barns. In roadsides, paved areas (including crack and crevice), curbs, sidewalks, driveways, parking areas, brick walks, gravel paths, paths, patios, and vacant lots, urban areas, play areas, and tennis courts. Along fences.]

IMPORTANT: Use only in areas where you want to 1) kill all existing vegetation and 2) suppress regrowth for up to 12 months. Do not use in gardens, flower beds or in areas intended to be seeded or planted within 12 months. Newly planted trees, shrubs and flowers are especially sensitive. This product is not intended for treating aquatic plants. In lawns, do not use for individual weed control.

[If you **do not** desire to suppress regrowth, use a product which only contains glyphosate [such as product name] instead.]

4. Application Directions

The maximum number of applications is 1 broadcast and 1 spot treatment per year OR 2 spot treatments per year OR 1 brush control application per year. The maximum annual rate is 2 gallons per 1,200 sq.ft. per year [or equivalent rate expressed as: XX gal/fl.oz. per XX sq.ft. per year]. [1.31 lb imazapyr ae/A/yr, 2.61 lb glyphosate ae/A/yr].

Equipment Cleanup: Thoroughly flush application equipment with water after using this product. Do not flush equipment near desirable plants or their root zones

4.1 For Total Vegetation Control (Including Bareground Treatment)

Use hand-operated spray equipment such as backpack sprayers, pump-up sprayers, or sprinkling can. Dilute product with water before applying. For maximum effectiveness, apply when weeds are vigorously growing.

[To Reviewer: In the following 3 paragraphs the rate is equal to 0.65 lb imazapyr ae/A, 1.30 lb glyphosate ae/A.]

For Broadcast Treatments: Uniformly spray or sprinkle the area where no vegetation is desired. Mix 1 gallon of [product name] with 3 gallons of water to cover 1200 sq.ft. [or equivalent rate expressed as: Mix XX gal/fl.oz. of [product name] with XX gal/fl.oz of water to cover XX sq.ft.]

For Fence Lines: Uniformly spray or sprinkle the strip where no vegetation is desired. Mix 1 gallon of [product name] with 3 gallons of water to cover 1200 sq.ft. (equal to 2400 linear feet of fence line with a 6-inch band width). [or equivalent rate expressed as: Mix XX gal/fl.oz. of [product name] with XX gal/fl.oz of water to cover XX sq.ft. (equal to XXXX linear feet of fence line with a X-inch band width)].

For Spot Treatments: Spray or sprinkle the spots where no vegetation is desired. Mix 1 gallon of [product name] with 3 gallons of water to cover 1200 sq.ft. [or equivalent rate expressed as: Mix XX gal/fl.oz. of [product name] with XX gal/fl.oz. of water to cover XX sq.ft.]. One spot treatment may be used after a broadcast treatment if weeds persist.

4.2 For Brush Control

Use hand-operated spray equipment such as backpack sprayers or pump-up sprayers. Apply product undiluted. Uniformly spray the foliage of woody weeds. Do not wet foliage excessively. Weeds should be growing vigorously at the time of application for maximum herbicide activity.

5. For All Application Types: Avoiding Injury to Non-Target Plants

Movement of the product from the target plant or site may injure non-target plants. Follow these precautions to manage off-target movement.

- 1. Runoff:** Do not over apply causing runoff from the treated foliage. Do not apply to slopes.
- 2. Spray Drift:** Spray drift from applying this product may result in damage to sensitive plants adjacent to the treatment area. Avoiding spray drift is the responsibility of the applicator. Applications with wind speeds greater than 10 mph are prohibited. Applications into temperature inversions are prohibited.
- 3. Roots of Trees and Shrubs:** Untreated plants can be affected by root uptake. Do not use over the root zone of desirable trees and shrubs. Roots extend beyond the drip line and can extend under fences, driveways, patios, sidewalks, paths, and similar landscape elements.
- 4. Movement of Treated Soil:** Do not treat powdery, dry or light sandy soils when the soil may be blown by wind. If necessary soil surface should be settled by rain or irrigation.

6. Weeds Controlled

[Product name] will control or suppress most grasses, broadleaf weeds, woody brush, vines, and trees. The degree of control and residual varies by plant species. [List of weeds controlled:]
