Subject:

Notification per PR Notice 98-10 (marketing claims)

EH-1513 Weed and Feed EPA Reg. No. 2217-963

Application Dated March 7, 2013

Dear Dr. Kunstman:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the subject product. The Registration Division (RD) has conducted a review of this request and finds that the action falls within the scope of PRN 98-10. The label submitted with the application has been date-stamped "Notification" and will be placed in our records.

If you have any questions, please contact Mindy Ondish at (703)605-0723 or at ondish.mindy@epa.gov.

Sincerely,

Kathryn V. Montague Product Manager 23 Herbicide Branch

Registration Division (7505P)

Attn: Kathryn Montague (23)

Dear Ms. Montague:

Subject: Labeling notification per PRN 98-10: Notifications Non-notifications and Minor Formulation Amendments. Section II(N): EH-1513 Weed and Feed (EPA Reg. No. 2217-963)

- I. Labeling Notification per Pesticide Registration Notice (PRN) 98-10: Sections II (N)
 - We ask to add advertising claims that are consistent with previously approved claims. Please refer to page 7 of the enclosed draft labeling.

II. Certification statements:

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to the EPA. I further understand that if this notification is not consistent with the terms of PR_Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under Section 12 and 14 of FIFRA.

III. Enclosures:

- 1. Application for Pesticide Amendment (EPA Form 8570-1)
- 2. One (1) copy the draft labeling with annotations.
- 3. One (1) copy the draft labeling without notations.
- 4. One (1) cd containing copies of the draft labeling.

If you have any questions, please call me at 816-460-6292 or contact me at jkunstman@pbigordon.com

Sincerely,

James L. Kunstman, Ph.D.

Director of Regulatory Services

Certification with Respect to Label Integrity

I certify that the information (including, but not limited to, text, tables, and graphics) contained in the electronic file identified below by file name and submitted with this certification is the same information as that on the paper copies of these documents included with this submission.

| PROPOSED LABEL | | | |

Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

These chemicals (2,4-D and dicamba) have properties and characteristics associated with chemicals detected in groundwater. The use of these chemicals in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Product Description

[Product name] is formulated [designed] to feed your lawn and control most annual grasses and broadleaf weeds commonly found in home lawns. The product contains a lawn fertilizer and three different herbicides.

- The three herbicides combine to kill many different kinds of weeds.
- Grass weeds: Postemergent control of crabgrass, foxtails, and other annual grass weeds.
- Broadleaf weeds: Postemergent control of [over] [XXX] broadleaf weeds including dandelion, chickweed, thistle and clover. [A partial list of broadleaf weeds is presented on this label.]

2. Precautions and Restrictions:

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed or for research purposes.
- EH 1513 Weed & Feed is not sold, distributed, or registered within the state of New York. Do not use in the state of New York.

3. Where To Use

[Product name] may be used on the following established turf species:

Established Cool Season Turfgrass: Kentucky bluegrass, rough bluegrass (*Poa trivialis*), perennial ryegrass, fine fescues, tall fescue

Established Warm Season Turfgrass: Bermudagrass, buffalograss, seashore paspalum, zoyolagrass

[Product name] may NOT be used on: annual bluegrass (*Poa annua*), bahiagrass, bentgrass, carpetgrass, centipedegrass, dichondra, St. Augustinegrass. Do not use this product on turfgrass where desirable clovers are present.

Guidelines to follow: The use of [product name] on lawns and ornamental turfgrasses that are not well established, or have been weakened by stress due to mechanical operations, chemical injury, disease, insects, pests, excessive temperatures, or lack of moisture may increase the chances for turfgrass injury. Allow turfgrass weakened by these stresses to recover before application of this product.

| When applied as directed | , this product will control and | or suppress* the following weed: | s: |
|----------------------------|-------------------------------------|-------------------------------------|---------------------|
| Annual Grass Weeds: | | | |
| Barnyardgrass* | Crabgrass (smooth, southern, large) | Foxtail (green, yellow, giant) | |
| A partial listing of estab | lished broadleaf weeds: [s | ee appendix for complete list or in | nclude here] |

| Clover, hop | Mallow | Pokeweed | and other broadleaf |
| Clover, strawberry | Matchweed | Purslane, common | weeds |
| Clover, white | Morningglory | Ragweed | |

4. When To [Apply] [Use]

This product may be applied in the spring, early summer, or fall. Do not apply more than 2 applications per year [season] with at least 30 days between applications.

[Optional additional text for more specific timing for grass weeds] **CRABGRASS (large and smooth):**

• **Spring:** For the best results, apply this product from crabgrass emergence until the 6 leaf stage (2 tillers) or before the crabgrass is 3 to 4 inches in height. Generally, this period begins or corresponds to the first time that you can see crabgrass in your lawn.

FOXTAIL (GREEN, GIANT AND YELLOW):

• **Spring and early summer:** For the best results, apply this product to foxtail during the early growth stages or when foxtail is 1 to 4 inches in height.

BROADLEAF WEEDS:

- **Spring:** Apply when **dandelion**, **plantain**, **buttercup**, **speedwell**, **knotweed** and other broadlean weeds are young and actively growing with adequate soil moisture and favorable temperatures (50°to 80°F) for best results.
- Fall: Apply when henbit, chickweed, white clover, ground ivy, lawn burweed and other broadleaf weeds are young and actively growing with adequate soil moisture and favorable temperatures, (5C° to 80°F) for best results.

[End optional text]

5. How To Apply

- This product needs to stick to the leaves of broadleaf weeds and should be applied when the grass is wet from dew or rain.
- Poor results will occur if applied to dry lawns. When dry conditions exist, irrigate [or water] the turfgrass 24 hours before application.
- For best results, irrigate after the application. However do not irrigate [or water] sooner than 24 hours after application.
- Apply this product when the wind is calm.
- Do not spread granules onto flowers, vegetables, and ornamental shrubbery.
- Turf species listed on this label can be seeded, sodded, sprigged, or plugged into the treated areas 4 weeks after the application of this product.
- When treating newly planted areas, wait approximately 6 weeks after seedling emergence before applying this product.
- Delay mowing 2 days before and until 3 days after the application of this product. Additional stress from low mowing heights may increase the possibility of turf injury.
- Clippings from the first three mowings should be left on the treated area. Do not use clippings from the treated areas as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.

6. How Much To Use

Use a drop or rotary spreader designed to apply granular fertilizers. Avoid skips or excessive overlaps as poor weed control or turfgrass injury may result.

[Apply 2.4 to 4.5 pounds of product per 1,000 sq.ft. per application to established turfgrass.] [Apply [2.4] [3.6] [4.5] pounds of product per 1,000 sq. ft. per application to established turfgrass.]

[For products using the 4.5 lb/1000 sq.ft. rate:] The maximum broadcast application rate is 4.5 pounds of product per 1,000 sq.ft. per application [1.32 lbs 2,4-D ae, 0.12 lb dicamba ae, and 0.68 lb quinclorac per acre per application]. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum annual (seasonal) rate is 9 pounds of product per 1,000 sq.ft. [2.64 lbs 2,4-D ae, 0.24 lb dicamba ae, and 1.36 lb quinclorac per acre].

[For products using the 3.6 lb/1000 sq.ft. rate:] The maximum broadcast application rate is 3.6 pounds of product per 1,000 sq.ft. per application [1.06 lbs 2,4-D ae, 0.10 lb dicamba ae, and 0.54 lb quinclorac per acre per application]. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum annual (seasonal) rate is 7.2 pounds of product per 1,000 sq.ft. [2.12 lbs 2,4-D ae, 0.20 lb dicamba ae, and 1.08 lb quinclorac per acre].

[For products using the 2.4 lb/1000 sq.ft. rate:] The maximum broadcast application rate is 2.4 pounds of product per 1,000 sq.ft. per application [0.71 lbs 2,4-D ae, 0.06 lb dicamba ae, and 0.36 lb quinclorac per acre per application]. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum annual (seasonal) rate is 4.8 pounds of product per 1,000 sq.ft. [1.41 lbs 2,4-D ae, 0.13 lb dicamba ae, and 0.72 lb quinclorac per acre].

7. [Spreader Settings] [Coverage] [Distribution] [Note to Supplemental Registrants: Choose one or more of these application or distribution patterns]

Use the rate listed on this bag. This XX pound bag should be used on XXXX square feet of lawn. A uniform broadcast distribution of product on the treated area is essential. The listed spreader seitings are approximate. The age and condition of spreader, speed of operation and evenness of terrain may require slightly different settings for desired coverage. Never apply by hand.

| Spreader Settings | | | |
|-------------------|---------|--|--|
| Spreader | Setting | | |
| Spreader 1 | XXX | | |
| Spreader 2 | XXX | | |

SPREADERS AND CALIBRATION [or SPREADER CALIBRATIONS AND PATTERNS]: Drop spreaders and rotary spreaders should be calibrated for uniform application of this product.

- For 4.5 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 220 square feet and adjust to apply at the rate of 1 pound of product per 220 square feet.
- For 3.6 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 275 square feet and adjust to apply at the rate of 1 pound of product per 275 square feet.
- For 2.4 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 420 square feet and adjust to apply at the rate of 1 pound of product per 420 square feet.

SPREADERS AND CALIBRATION:

Drop spreaders and rotary spreaders should be calibrated for uniform application of this product. Choose one of these application or distribution patterns:

- 1. Single Pass Operate the equipment at intervals corresponding to the width or swath of the spreader. For drop spreaders, overlap the wheel tracks to ensure complete coverage. Close the spreader openings when turning to change directions or when stopping. [OR Single Pass Always apply EH1352 Weed & Feed with a properly calibrated rotary or drop type fertilizer spreader. NEVER APPLY BY HAND. To avoid gaps or streaks, first spread border of lawn. Fill in center with uniform, parallel passes. Spreader settings are approximate. Be sure to check spreader before beginning, adjusting if necessary.] To avoid gaps and streaks, first spread border of lawn and then fill in center with uniform, parallel passes. Walk at a steady pace so as to apply evenly throughout the lawn.]
- 2. **Double Pass -** Reduce the application rate by one-half of the recommended rate, calibrate the spreader, and adjust the settings for the desired application rate. Operate the spreader over the lawn two (2) times. Close the spreader openings when turning to change directions or when stopping.
- 3. **Cross Hatching -** Reduce the application rate by one-half of the recommended rate, calibrate the spreader, and adjust the settings for the desired application rate. Operate the spreader over the lawn two (2) times. For the second trip, operate the spreader perpendicular to the wheel tracks or the spreader pattern of the first trip. Close the spreader opening when turning to change directions or when stopping.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep in original container in a cool, dry area, away from extreme heat and cold.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. To avoid wastes, use the entire contents in this bag by application according to the label instructions. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container (bag). Completely empty bag into application equipment. Then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

LIMITED WARRANTY AND DISCLAIMER

FOR USE ONLY AS DIRECTED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTIAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. If these terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full. The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere.

APPENDIX

- 1. Statements which may appear on different label components depending on packaging configuration.
 - · See next panel for additional Precautionary Statements and First Aid
 - Net Weight ____
 - EPA Est. No.
- 2. Advertising claims that may be presented on container labeling, advertisements, brochures, and other marketing/sales promotional materials:
 - Use [Apply] where [anytime] weeds are actively growing.
 - Kills [Controls] existing crabgrass
 - Kills existing weeds, [and feeds your lawn] in one step
 - Apply Spring and Fall
 - Controls [kills] desired weed species [from attached listing may be inserted here] and other grass and broadleaf weeds [and many other listed broadleaf weeds].
 - Control of grass and broadleaf weeds [as listed]!
 - 2 in 1: Kills existing grass and broadleaf weeds and fertilizes [in one step]
 - Kills [Controls] over XXX grass and broadleaf weeds
 - Kills the weeds present in your lawn
 - Kills two types of weeds with one product
 - Kills all major weeds [as listed]
 - Kills major lawn weeds
 - Kills dandelion, clover and crabgrass!
 - Kills existing weeds
 - Kills dandelion, crabgrass and more
 - Northern and Southern Grasses, Bluegrass, Fescue, Zoysia, Bermuda, Perennial Ryegrass
 - Treats Northern and Southern Grasses
 - Kills [Over] [XXX] [+] Weeds [Weed Types], Even [Including] the Roots.
 - Especially effective on hard-to-kill weeds
 - Kills broadleaf weeds in lawns
 - Kills major broadleaf weeds, even the roots.
 - Kills dandelion and many other broadleaf weeds.
 - Use on Lawns to Kill the Toughest Weeds like Clover and dandelion.
 - Tough weed killer
 - Kills [Destroys] [even] the tough[est] [hard-to-kill] broadleaf weeds [like clover, dandelion, oxalis].
 - Kills [major] broadleaf weeds [like clover, dandelion, oxalis]
 - Provides broadleaf control
 - Controls [Kills] clover, dandelion, plantain, chickweed and [other broadleaf,weeds] [others as iisfeo]

- · Clobbers clover
- Kills the root
- Kills weed roots!
- Kills tough lawn weeds
- Consistently fast on: tough weeds like clover, plantain, ground ivy and spurge [various other weeds listed]
- For home lawn care
- Targets weeds, leaves [grasses][the lawn] unharmed
- Controls Dandelion, White Clover, Plantain, Chickweed, Spurge and Many Other Listed Weeds
- Kills Weeds While Feeding Your Lawn
- Kills major broadleaf weeds including roots.
- Use as directed to kill major broadleaf weeds in your lawn.
- For use on: Kentucky bluegrass, fescue spp., perennial ryegrass, common bermudagrass, zoysiagrass, hybrid bermudagrass
- Kills Crabgrass and Fertilizes
- Covers [X,XXX] [XX,XXX] square feet [sq ft] [sq. ft.].
- Feed for 3 months guaranteed!
- Starts working on contact
- · Quick greening and extended feeding
- Phosphorus-Free
- Kills over 250 weeds as listed
- · Controls a wide spectrum of broadleaf weeds
- · Controls crabgrass
- Kills weeds down to the roots
- Kills dandelions and feeds grass
- · Builds strong, deep roots
- Kills dandelions and other major lawn weeds
- Kills the weeds not the lawn
- · Lawn fertilizer plus weed control
- Promotes root growth for a thicker, greener lawn
- Controls crabgrass escapes

3. Trademark acknowledgement statements:

TRIMEC® is a registered trademark of PBI/GORDON CORPORATION.

4. Fertilizer Labeling Requirements in States:

- Information regarding the contents and levels of metals in this product is available on the internet at: http://www.aapfco.org/metals.htm.
- Typically a lawn will utilize 1 to 4 pounds of nitrogen per 1,000 square feet per growing season.
 When used as directed this product will supplement your regular fertilizer program by providing _____
 pounds of nitrogen per 1,000 square feet. Consult your local Extension office for questions regarding a fertilizer program suitable to your geographical region.
- If the use rate applies less than 1 pound nitrogen per 1,000 sq.ft. per application, the following statement may appear: Supplemental applications of lawn fertilizer are needed to achieve a minimum of 1 pound nitrogen per 1,000 sq.ft.
- Advisory for Fertilizers Containing Iron: Keep this product off sidewalks, patios, driveways, etc. This
 fertilizer may stain concrete and painted surfaces. If it comes in contact with concrete surfaces,
 sweep off immediately before flushing with water. If concrete is wet when contact occurs, staining
 may be impossible to prevent. Be careful when using rotary spreaders which scatter fertilizer beyond
 lawn edge and onto concrete.
