Use Instructions:

A. Control of Flies, Cockroaches, Mosquitoes

Flies -- Use $2\frac{1}{2}$ fl. oz. of 62% Chlordane to 1 gallon of water or oil. Spray on all resting places such as around doors, windows, along baseboards inside the house. Use 7 fl. oz. of 62% Chlordane to 1 gallon of water or oil for control of flies outside. Repeat as often as necessary to maintain effective control.

Cockroaches -- Use $2\frac{1}{2}$ fl. oz. of 62% Chlordane to 1 gallon of oil. Spray or brush onto roach harborage--cracks, baseboards, behind sinks, etc. in the home.

Mosquitoes --

Residual Spray -- Use $\frac{1}{2}$ fl. oz. of 62% Chlordane to 1 gallon of water. Apply at the rate of 1 gallon per 1,000 sq. ft.

Space Sprays -- Use 2 teaspoons of 62% Chlordane to 1 gallon of water. Apply the emulsion to foliage, at the rate of 1 gallon per 1,000 sq. ft.

Caution: Do not use on or around food crops. Do not apply oil solutions to foliage or flowers.

B. Lawn or Ornamental Turf Applications:

For ants, army worms, crickets, grasshopper, spiders, chiggers, earwigs, ticks -- Use 18 fl. oz. of 62% Chlordane in enough water to treat or spray one acre.

For chinch bugs, sod webworms, lawn moths -- Use 36 fl. oz. of 62% Chlordane in enough water to treat one acre of lawn or ornamental turf.

For white grubs, Japanese beetle grubs, white-fringed beetle and wire worms -- Use 45 fl. oz. of 62% Chlordane in enough water to treat one acre. Wash the Chlordane into the soil immediately after application.

Caution: Keep children and pets off treated areas until this material is washed into the soil and grass is dry.

C. Household Applications:

For ants, silverfish, brown dog ticks, carpet beetles, crickets, spiders, centipedes, and boxelder bugs -- Use $2\frac{1}{2}$ fl. oz. of 62% Chlordane to 1 gallon of water and treat thoroughly all areas where these pests congregate. Use around windows, doors, porches, baseboards, cracks, etc. For boxelder bugs, spot treat those areas where the insect enters the home. Do not contaminate food or eating utensils with this product. Repeat spot treatments as often as necessary to maintain effective control.

Caution: Applications in the home should be limited to spot treatments only.

D. Termite Control Applications:

Use 3 fl. oz. of 62% Chlordane per gallon of water, and impregnate the soil around the building to a depth of 1 or 2 feet away from the building by pouring along the wall or by digging a trench and treating the soil as it is replaced. Apply 2 gallons of the diluted Chlordane solution per 5 linear feet. Treat all surfaces in the building where termites appear by painting or spraying with the diluted Chlordane solution.
