An excellent deodorant, especially effective in controlling odors that are bacterial in origin. Mixes readily with water and makes a clear stable solution. In use dilution, it is non-corrosive and non-staining to plastic, vinyl, synthetics, enamel, tile and most common metals. Has a pleasant mint odor. May be used through automatic floor scrubbing equipment.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR GENERAL DISINFECTION of hard, non-porous inanimate surfaces (glass, metal, plastic, glazed porcelain, linoleum, tile, leather, vinyl, enamel and finished wood surfaces) on walls, floors, appliances and furnishings. In industrial and commercial offices, restrooms and work areas. Before disinfecting, pre-clean surfaces as directed above. Prepare 5 ounces per gallon of water and thoroughly wet the surfaces to be disinfected. The disinfecting solution must contact the surface for 10 minutes for proper disinfection. If desired, the surface may then be rinsed with clear water or wiped with a clean damp cloth.

CLEANING AND DEODORIZING: Whenever practical, flush away gross soils with water. For cleaning and deodorizing, use 5 to 8 ounces per gallon of water. Cleaning may be accomplished with a clean mop, sponge, squeegee, wet vacuum system, or a mechanical spraying device. After cleaning remove suspended soils with a clear water rinse, vacuum pick up, or wipe with a clean mop, sponge, squeegee or cloth.
