

DANGER—POISON—PRECAUTIONS

POISONOUS IF SWALLOWED

This product can kill you if swallowed even in small amounts. spray mist or dust may be fatal if swallowed.

POISONOUS BY SKIN CONTACT

Poisonous if touched by hands or spilled or splashed on skin, in eyes or on clothing (liquid goes through clothes)

POISONOUS IF BREATHED

Breathing vapors, spray mist or dust may be fatal

POISONOUS TO FISH AND WILDLIFE

This product is toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from treated areas. Do not apply where runoff is likely to occur.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label

DIRECTIONS FOR USE

COTTON To control overwintering Boll Weevil, Thrips, Aphids, Fleahoppers and certain Mites, use 1 qt. amount of water to cover 1 acre.

FRUIT TREES To control Boll weevil, Leafworm, Fall Armyworm, use 1 qt. - 2 pt. in the amount of water to cover 1 acre.

FOR BOLL WEEVIL during the early season, apply at the 2- to 4 leaf stage or at first squaring. If weevils are present, and make 3 to 4 applications at weekly intervals as necessary during mid and late season. Every 10 percent of squares or bolls are punctured and repeat 4- to 5 day intervals as necessary. For leafworms, apply when eggs and 3 to 4 small bollworm larvae are found per 100 bolls. Terminals and repeat at weekly intervals as necessary. Late season control of bollworm may require applications to be repeated at 4- to 5 day intervals.

FOR THrips apply when thrips are present in the buds and on the leaves of seedling cotton. Repeat when necessary. For fleahoppers, apply when they are present on the leaves of seedling cotton. Repeat as needed.

FOR THrips and fleahoppers, apply at the 2- to 4 leaf stage and make 2 to 3 applications at weekly intervals as needed.

FOR Fall armyworm, apply when damaging infestations occur. For leafworms, apply when weevils are present usually during the mature period. Repeat as needed. For spider mites, apply at the first sign of infestation when whitish or yellowish speckling of the leaves indicates damage. Repeat as needed.

When spraying by aircraft dilute with 3-10 gallons of water per acre depending upon the size of the field.

When using ground equipment dilute the spray in 7-15 gallons of water depending on the size of the field.

Do not harvest or pick within 7 days of application.

**USE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE
EQUIPMENT AND CLOTHING**

1. Wear a long-sleeved shirt and long pants or rubber overalls.
2. Wear safety goggles.
3. Wear a respirator.
4. Wear protective rubber gloves.

WORK SAFETY RULES

Keep children and pets away from treated area or where there is danger of drift. Workers entering fields within 24 hours after application should wear protective clothing.

Do not rub eyes or nose with hands. If you feel sick in any way, STOP work and get help right away. Do not use this product if you are pregnant. Immediately. Explain that the victim has been exposed to this material and to the hazard of death. After first aid is given, see First Aid Treatment for more information.

IMPORTANT! Before using this product, wash thoroughly with soap and water. Always wash hands, face and clothes with soap and water before eating, drinking or smoking.

AFTER WORK Wash all work clothes and shoes. Shower, using soap and water. Wear only clean clothes when leaving job. Do not wear contaminated clothing. Wash protective clothing and protective equipment with soap and water after each use. Respirator should be cleaned and kept repaired according to instructions included with respirator.

POISON SIGNS (Symptoms)

Parathion is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: headache, nausea, vomiting, tremor, weakness, dizziness, blurred vision, difficulty in breathing, increased sweating, watery eyes, itching, numbness, tingling, and muscle spasms and cramps.

FIRST AID TREATMENT

Remove clothing and shoes immediately. Explain that the victim has been exposed to parathion and is in a life-threatening condition.

If breathing has stopped, start artificial respiration immediately and maintain until doctor sees victim. If eyes are wet with this material, remove contact lenses and flush with water. Continue flushing by pouring water into the eye or by spraying with a fine stream of water. Repeat until eyes are clear. Never give anything by mouth to an unconscious person. If a victim is down and unresponsive, call for help immediately.

If poison has been swallowed, flush the mouth with plenty of water for at least 5 minutes. Do not induce vomiting. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN

This product is a mixture of parathion and the fluorinated toxic ingredient, piperonyl butoxide. The active ingredient, parathion, is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die. The active ingredient, piperonyl butoxide, is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. ACCEPTED

COTTON SAVER
CONTAINS 6 LBS. TOXAPHENE AND
1 1/2 LBS. METHYL PARATHION PER GALLON

1. Wear water proof pants, coat, hat, rubber boots.
2. Wear mask or respirator approved by the manufacturer.
3. Wear heavy duty, natural rubber gloves.

WORK SAFELY

Keep all unprotected persons and children out of the field. Workers entering field within 24 hours after application. Do not rub eyes or mouth with hands. If you feel dizzy, call a doctor, physician, clinic or hospital and describe his condition. If a doctor cannot come, take victim to hospital.

IMPORTANT! Before removing gloves, wash them and arms with soap and water before smoking.

AFTER WORK, take off all work clothes and clean clothes when leaving job. Do not wear protective equipment with soap and water after use. Replace according to instructions included with product.

POISON SIGNS

Parathion is a very dangerous poison. It rapidly acts on the eyes. Clothing wet with this material may receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: blurred vision, pinpoint pupils, tightness in breathing, watering of eyes, drooling or frothing of mouth.

FIRST AID

Call a doctor, physician, clinic or hospital and describe his condition.

If breathing has stopped, start artificial respiration. If swallowed and victim is awake, keep sticking finger down throat or by giving soup if clear. Never give anything by mouth to an unconscious person. See doctor immediately.

In case of contact, immediately flush eyes or skin with water while removing contaminated clothing and shoes.

NOTE TO USER

In this product mixture, methyl parathion is the active ingredient. It is a stimulant of the parasympathetic nervous system. It should be treated promptly with atropine to the limit of tolerance to improve chances for survival. 2-PAM may be used if atropine is not available. Administration of oxygen is helpful. Morphine should not be given. Toxaphene produces central nervous system depression and derivatives, but this drug should not be used to relieve symptoms. **VERY CLOSE SUPERVISE AT ALL TIMES. AT LEAST 48 HOURS.**

POST TREATMENT

Consult your State Agricultural Extension Service for more information.

- 4) Wear heavy duty, natural rubber gloves.

WORK SAFETY RULES

Keep all unprotected persons and children away from treated area or where there is danger of drift. Workers entering fields within 24 hours after application should wear protective clothing.

Do not rub eyes or mouth with hands. If you feel sick in any way, STOP work and get help right away. Call a doctor, physician, clinic or hospital immediately. Explain that the victim has been exposed to parathion and describe his condition. After first aid is given (see First Aid Treatment Section) and if a doctor cannot come, take victim to clinic or hospital.

IMPORTANT! Before removing gloves, wash them with soap and water. Always wash hands, face and arms with soap and water before smoking, eating or drinking.

AFTER WORK, take off all work clothes and shoes. Shower, using soap and water. Wear only clean clothes when leaving job. Do not wear contaminated clothing. Wash protective clothing and protective equipment with soap and water after each use. Respirator should be cleaned and filter replaced according to instructions included with respirator.

POISON SIGNS (Symptoms)

Parathion is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: Headache, nausea, vomiting, cramps, weakness, blurred vision, pinpoint pupils, tightness in chest, labored breathing, nervousness, sweating, watering of eyes, drooling or frothing of mouth and nose, muscle spasms and coma.

FIRST AID TREATMENT

Call a doctor, physician, clinic or hospital immediately. Explain that the victim has been exposed to parathion and describe his condition.

If breathing has stopped, start artificial respiration immediately and maintain until doctor sees victim. If swallowed and victim is awake, conscious, make him vomit quickly to induce vomiting by sticking finger down throat or by giving soupy or strong salty water to drink. Repeat until vomit is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet. See doctor immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. See doctor immediately.

NOTE TO PHYSICIAN

In this product mixture, methyl parathion is the dominant toxic ingredient exerting muscariniclike effects, that is, stimulation of the parasympathetic nervous system. Poisoning victims should be treated promptly with atropine to the limit of the victim's tolerance to relieve symptoms and to improve chances for survival. 2 PAM may be administered in conjunction with atropine. The administration of oxygen is helpful. Morphine should not be given to persons suspected of parathion poisoning. Toxaphene produces central nervous system excitation which ordinarily responds to the barbituric acid derivatives, but this drug should be considered only if complete atropinization fails to relieve symptoms. **VERY CLOSE SUPERVISION OF THE PATIENT IS INDICATED FOR AT LEAST 48 HOURS.**

POST TREATED AREA

Consult your State Agricultural Extension Service or Experiment Station regarding post-treatment areas.
