INERT INGREDIENTS:

99%

100%

*U.S. Patent No. 2,748,146; Canadian Patent No. 523,206

DIRECTIONS FOR USE

IMPORTANT: Read these entire Directions and Conditions of Sale, including the Warranty and Limitation of Damages provision, before using CPA Cattle Dust Bag.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals, and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the Seller. Cotton Producers Association and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

HORN FLY CONTROL:

Suspend CPA Cattle Dust Bag in areas frequented by cattle or in gateways or lanes through which the animals pass daily for water, feed or mineral. Bags may also be suspended in loafing sheds or in front of protected mineral feeders. For Lactating dairy cows, CPA Cattle Dust Bag may be suspended in the exit through which cows leave the milking barn. In all cases, the dust bags should be adjusted so that the bottom of the bag will hang four to six inches below the topline of the cattle.

INSTALLATION OF CPA CATTLE DUST BAG:

Suspend the dust bags by inserting rope, chain, or wire through the grommets at the top of the bag and attaching to an overhead structure or by hooking the grommets into hooks fixed to a stationary overhead 2 x 4 at the height recommended for horn fly control. In areas of frequent or heavy rainfall, CPA Cattle Dust Bag should be protected from the weather.

Install as many 20 pound CPA Cattle Dust bags as necessary in lanes or other openings to assure proper dusting of the animals. After the bags are in place, pull the rip cord to allow the insecticide to fall into the bottom of the bag. When dust bags are provided on a free-choice basis, allow one 20 pound CPA Dust Bag per 20-40 animals.

RESTRICTIONS:

Do not hang dust bag over feed, mineral, or water troughs.

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if inhaled or absorbed through the skin. Harmful if swallowed. Do not get in eyes or on skin. Do not breathe dust. Wash thoroughly with soap and warm water after handling.

Do not contaminate food or feed. Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

If poisoning occurs obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression.

To Physician—Atropine sulfate is antidotal. 2-PAM is also antidotal and may be administered in conjunction with Atropine.

WARRANTY AND LIMITATION OF DAMAGES

Cotton Producers Association warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use and Conditions of Sale; subject to the risks referred to therein. CPA makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of CPA is authorized to do so except in writing, with a specific reference to this warranty. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

CO-RAL IS Reg. TM in U. S. and Canadian Pat. Offs. by Farbenfabriken Bayer A.G., Chemagro Corporation licensee.
